GUM-DIPPING

Builds Extra Miles The Firestone process of Gum-Dipping is one of the most important of the many Firestone contributions to more economical highway transportation.

It thoroughly saturates and insulates every fiber of every cord with rubber, minimizing friction and heat, so destructive to tire life.

On the cars of hundreds of thousands of motorists, in the service of the largest truck, bus and taxicab fleets, in the battle of tires on race tracks, Firestone Gunz-Dipped Tires, because of their greater stamina, are delivering longer mileage with added safety and comfort.

The Firestone Dealer in your locality will gladly explain to you the extra value of Gum-Dipping. He is prepared to demonstrate how the cords of the carcass are saturated in a rubber solution, insulating every fiber of every cord with rubber, which minimizes friction.
