Why Are Prescriptions Written in Latin?

The reason is this—language changes. Words take on new meanings. This would be disastrous for prescription work so medicine uses a language which does not change. Another reason is the fact that doctors all over the world use this one language to write directions and instructions so that pharmacists in any country can read and interpret them.

HUGE SLOTH 14 FEET LONG

Member of Armadillo Family Found in Oklahama Stood Six Feet High

NORMAN, Okla., Oct. 27.—Discovery of a fossil shell of a glyptodon, largest prehistoric member of the armadillo family, near Frederick, Okla., has proved the mammals followed the retreat of the glaciers to the Arctic circle much further than previously supposed, it is announced by Dr. Charles N. Gould, geologist. He said the shell and some bones were fairly well preserved. Similar shells have been found in Mexico and the southeastern part of the United States, Dr. Gould said. The sloths measured as much as fourteen feet in length and stood six feet high. These mammals were toothless and scientists believe, lived entirely on vegetation.
