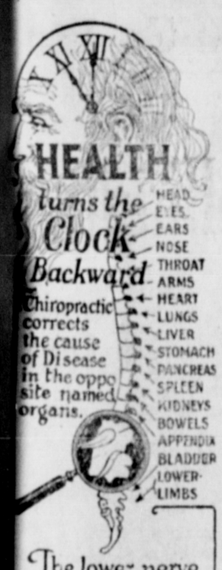
The Affliction of "Big-Neck"

The unsightly goitre—big-neck—some people call it, is not alone an affliction in itself, but in certain types of cases is the fore-runner of very serious, sometimes fatal, consequences.



Due to a deficiency in the nerve supply to the thyroid gland a dis-eased condition develops and swelling occurs, sometimes entirely upon the surface, without dangerous consequences, sometimes inwardly with strangulation and impaired sight following.

Chiropractic spinal adjustments remove the interference with nerve lines and permit normal functioning of this gland. Cases are upon record showing as much as five inches reduction in neck circumference after three months of adjustments.

AFTER FORTY YEARS WITH A GOITRE—

"For forty years I have suffered with a goitre. I had been advised to have it operated upon, but would not hear of an operation. After witnessing the result of chiropractic adjustments with several members of my family, I decided to see if I too could be helped. I have now been taking adjustments for several months and can see my goitre reducing almost daily. I feel that I cannot say too much as to the merits of Chiropractic for human ailments."—Mrs. A. Powell, Chiropractic Research Bureau, Statement No. 2075-L.

QUEEN SPENDING LIFE'S AUTUMN

AMELIA OF ORLEANS, WIFE OF ASSASSINATED PORTUGUESE KING, LIVES IN SECLUSION

LISBON, Feb. 26.—A sad faced, elderly widow is spending the autumn of her life here in near-seclusion painting away the painful memories of recent years. She is Amelia of Orleans, whose husband, King Carlos, was assassinated in 1908.

Amelia of Orleans and her husband were both distinguished artists. During the long period after their marriage when they were still Prince and Princess of Braganza, they led a delightfully artistic life, giving all their spare time enthusiasticaly to the work they both loved.

The most interesting of the sketches now given by Queen Amelie to be published in an album were made while she was still the Princess Braganza, when no one could foresee the tragedy that years later was to be inflicted upon her, as a wife and a mother. Her sketches were water colors consisting not only of reproductions of open air beauties but also of stone carvings and wrought iron work, or of the curious frescoes and ceilings of the palaces of Cintra, which were always, as she calls them, "favorite haunts."
