### HERDING MOVEMENTS

It is difficult to understand the psychology of those herding movements which influence large groups of people to do certain things at certain times. It will be interesting to watch the outcome of this rising of the peasants and how much benefit they and the country as a whole will get from the movement.

# SPECTACLE AT VANCOUVER

It is not a very edifying spectacle that is in progress in Vancouver in connection with the police probe. The big B.C. city is the leader in many lines and it is to be hoped it will give us all a lead in the matter of the orderly running of the affairs of the community. The washing of dirty linen in public and the efforts of the criminally inclined to cover themselves is most demoralizing and tends to make people wonder whether it is a good thing to live in a big city.

# THE PRINCE CAROL CASE

The British government undoubtedly has the right idea when it says that a visitor to that country must not use it as a base from which to interfere with the properly constituted authority of some other country.
