PLEA FOR MARINE LIFE STUDY

In an address to the Rotary Club last week, Canon Rushbrook made a strong plea for the study of marine life by the young people of this city. He described in glowing terms some of the beautiful and curious things to be seen along the shores, and urged an attempt be made to interest more people in these things.

While this is perhaps not the time of year for such studies, we are glad to pass on the message. There is a sad lack of information in regard to such things here and any movement to create more interest has our warm sup-

POWER OF PERSONALITY

Victoria chose Premier Tolmie at a time when the country was at war and they wanted a man who was not in politics. They continued to support him when he left the Union group and swung in with the Conservatives and probably would have continued to support him almost as long as he wished to represent the city.

Now Dr. Tolmie has chosen another sphere of activity and Victoria has to choose between a man who is not in any respects outstanding as a Conservative candidate and Something Natty for Travelling the former Liberal premier whom it turned down in the provincial elections. We suggest that they will probably choose Dr. MacLean because he is the better man. Although a staunch supporter of the Liberal party, Dr. Mac-Lean is a very Conservative Liberal. He is the type of man that appeals to the people of Victoria. He will be elected on his personality.

RE-BIRTH OF CHINA

China is being re-born. That country has been through all the throes and the new infant is fast gaining strength and liveliness. The country is attracting attention everywhere and if only the government can remain stable we shall see wonderful things in that country within the next few years.

China has wonderful potentialities. Her people needed only this re-birth to give them the impetus to throw off the lethargy of ages and bring them in line with modern development.

Canada will do well to keep in close touch with the Chinese revival. China is one of our neighbors, almost as close as Japan, and there will be immense possibilities for trade with that country. Prince Rupert being the nearest Canadian port should be particularly interested in the change which is coming about.

LOOKING TO PACIFIC

In an address before the Vancouver Canadian Club recently Premier Brownlee of Alberta made this significant statement: "Today the face of Alberta is turned westward keep their evening engagements instead of eastward. Prior to 1923 Alberta looked down in office clothes have quite a the narrow strip of rails that led to Fort William and problem. A frock that is suitother eastern centres. Today Alberta is looking to the able for business and at the same Pacific, and the hope of the people is in the development time attractive enough for that of the Pacific, and there almost entirely."

This remark was not a bit of diplomatic and neighbor- But here is an answer to the. ly flattery for British Columbia consumption. The two problem. Simply made, the frock western provinces have much in common. Alberta is now illustrated above is one of soft shipping most of its export wheat westward because of green crepe. Chinese squares, favorable freight rates, and will continue to do so. This will establish broader trading connections between the two provinces, for, although the prairie province will build up its own industries, its imports will grow with population PRODUCTION OF GRAPHITE and it will go to its natural trading market outside. It is true that the great stretch of mountains is a dividing line, concentration of disseminated ore. but it is also a cementing link, for the two popular resorts, No lump crystalline graphite Banff and Jasper Park, are in Alberta, and visitors to (plumbago), is produced in Canathese places generally think their outing incomplete with- da. The mines and mills are out a trip to the coast.

Another link in the chain of association, and one to which Premier Brownlee referred, will be the inevitable Guenette, and St. Remi districts Pacific outlet for the Peace River country. At present in Quebec. Alberta regards this district as its own, because it is reached through Edmonton and the greater part of the The largest deposit of diatosurveyed area is within Alberta. The time, the premier mite in the Dominion at present said, is nearer at hand than most people realize when an outlet for the Peace River district will be one of the out- where material of pure grade oc-Istanding questions of western Canada life. This will curs in beds 40 feet thick that bring Alberta and the coast province closer together still. extend over a large area.

PRITISH Columbia's Power resources are the envy of the world. With Power, the riches of the world can be won; with Power, ores can be mined . . . smelted; transportation problems solved; manufacturing industries developed, and with them population . . . pay-rolls. Power is British Columbia's strongest bid for more industries ... more people.

Of the millions of horsepower available in our province, but half a million are now harnessed to turn the wheels of industry. The great hydro-electric development at Bridge River will ultimately generate more than 600,000 horsepower, while the output at Bonnington Falls and other points is being steadily increased. The Campbell and Chilko Rivers, on the mainland, and the Nimpkish on Vancouver Island, are capable of tremendous power development for the conversion of our forest and mineral resources into fabulous wealth.

Two of British Columbia's Electric Power systems are among the greatest in Canada, each generating more than 400,000,000 kilowatt hours in 1927. This represents an increase in the last ten years of 98% ... truly a remarkable achievement!

Foreign authorities speak of this record as a measure of the great vitality of British Columbia.

Today we rank third in power and industrial development among Canadian provinces. We have made greater progress per capita than any!

It is the policy of British Columbia to foster the development of the hydro-electric powers for the benefit of the public. They are allotted to private enterprises on condition that they will be developed within a certain time, so that no exploitation of public assets may take

Millions of dollars are now earmarked for Power development in our province. Dams are being built, turbines installed . . . transmission lines erected to care for the imminent industrial development.

/ 11011 Thousands of dollars are being expended weekly on materials and wages; thousands are feeling the immediate benefits of this enterprise.

Side by side with our power development, Industrial Expansion has kept pace. Teday \$7% of Canada's external trade is handled by British Columbia. During the past decade, our basic industries have increased 101.3%. Our total gayroll, including all classes, is estimated at 210 million dollars. Today, our Lumbering, Mining and Fishing industries employ 72,517 people, paying them 175 million dollars in wages . . . distributing an average wage ranking among the highest in Canada.

These 175 millions in wages are a great contribution to our annual internal trade in the province. They have given our industrial workers a buying power ranking second in the Dominion and have largely been responsible for our ever increasing prosperity, as evidenced by the fact that the number of automobiles registered in the province last year was 76,187 as compared with 8,596

British Columbia's steady and varied industrial development has changed the conception in Eastern Canada and the United States of our province. No longer are we entirely dependent on the East for our manufactured products. British Columbia is increasingly furnishing her own needs. She now ranks third in the whole Dominion as a manufacturing province.

Our phenomenal Power and Industrial growth has focused the attention of the great industrialists and investors on our province. Today, British Columbia in the eyes of the world, stands for Power, Progress and Plenty. May our efforts of the next ten years stabilize and increase our Prosperity!
