FOREIGN RELATIONS

Some few people seem to be criticizing the Mackenzie King government for opening legations in foreign countries just like full-fledged nation would do without having the diplomatic correspondence trickle through the office of the secretary for the Dominions. They can go on criticizing the government if they want to but we should like to just point out that it was the Borden gov- and has established obligatory town ernment that made the first arrangements for the American lega- planning on all towns of 20,000 popution, although it was only recently that the first appointment to lation and over and has now nearly 600 the office was made.

POSITION OF P.G.E.

It must be terrible to be a "not wanted" child like the P.G.E. The poor creature has no mother or father, is disowned by everybody, has no visible means of subsistence and everyone is wishing it would with about 20 regional plans in preparcommit suicide. Possibly it may grow up to be great and useful ation. and even spectacular but the chances are against it.

FISHERIES REGULATIONS

The Dominion fisheries department is doubtless in a difficult position. The fishermen and canners cannot agree as to what they prising about 65 municipalities on the want, but the salmon must be protected. First an order goes out to cut off the licenses of all those who are not full fledged citizens, regardless. Protests at once reach the department and they change the order in accordance with the wishes of the protestants. Then it is understood that one line trolling is to be the rule, but the department through its officials in the south denies this when protests have begun to arrive. Possibly pretty soon order may develop from the present chaos. At any rate it is to be hoped that nothing will be done to injure the industry either by decimating the fish or by putting the fishermen out of business or working a hardship on

WHAT IT MEANS TO B.C.

Yesterday an enlightening article was published in this paper telling of the benefits that would accrue to the province through the Dominion recognizing the claim of the province of British Columbia to the railway lands and the Peace River Block. So far these lands have not been turned over but the promise is made that legislation will be introduced into parliament providing that this be done.

The lands and forests and mines should be worth a great deal to the province. Not only is there the present income derived from those lands but there is a prospective extension as the development of the country takes place. When the Peace River belt is surveyed in Canada of educational effort is the doubtless is will be found to be even more valuable than is at present suggested. At any rate it is a good thing to have this ques- exception of 'Quebec (which province tion settled and the lands managed from the province instead of from Ottawa.

EQUALITY, CO-OPERATION AND RESPONSIBILITY

Premier Mackenzie King says that the desire of the government in regard to Imperial relations shall be "equality, co-operation and staffs to make the acts effective and responsibility." That seems to be a pretty good motto and would be just as good if it had been uttered by Mr. Bennett. In fact it is cerned. the motto of both sides speaking for all of Canada. We want equalify with all other parts of the Empire, we want to work with them and expect them to work with us. The last mentioned work is the hardest to live up to. We must realize our own responsibility to the Empire and do our part as a member equal with all the others. We must be ready to defend ourselves and help defend them just as we bylaw has been passed and this will buy back the loans. expect them to defend themselves and help defend us. They cannot soon be superseded by a comprehensive do that without ships and neither can we. They must have airplanes bylaw. A major street report has been and aviators and so must we. The time has not yet arrived when we may look very confidently for world peace. A good police force, railway transportation and harbor deat any rate, is necessary and this police force must be equipped. velopment. Point Grey and all the mu-Canada must do her share in this matter if she is to properly realize her responsibility as an equal factor in the British Empire.

CANADA QUITE BACKWARD IN TOWN PLANNING

Report to Surveyors' Convention Says Municipal Heads Were Inclined to Scoff at Move-

VANCOUVER A SHINING LIGHT

Much is Being Done in Pacific Coast City, and Whole Dominion is Urged to Take Hold of the Idea

OTTAWA, Feb. 2. - (By Canadian Press) .- "There is really a remarkable awakening to the significance and value of town-planning throughout Canada. even though the movement is not yet commensurate in its scope with that of ther countries," said Carl Engler, D.L.S., in concluding the report of the Town Planning Committee presented at the annual convention of Dominion Land Surveyors which opened here yes-

No sensible man, said Mr. Engler, is now asking whether town planning is fad. The movement has justified itelf in all directions and is accepted broughout the world, as is shown by the fact that each year representatives from about 40 nations are gathering in iternational town and regional planing conferences. It seems to have passed the experimental stage and to have become an established and expandng practice in all civilized countries.

WORK IN BRITAIN The report of the committee draws attention particularly to the present tatus of town planning in Great Britain and the United States. It is surely lignificant, it is stated, that a leading country like Great Britain has come to legard town planning as a health measire comparable to universal sanitation. owns under planning law, with 52 regional plans in course of development. comprising vast aggregations of cities. towns and rural areas, and that the United States has also about the same number of towns under planning law.

While Canada is indeed making some orogress it is significant of our backwardness on this side of the line, said Mr. Engler, that the Niagara Frontier Regional Planning project, now com-American side of the river, had its origin in the suggestions of Canadian planners. The Americans caught on to the idea and established an organization to realize it. In Canada, he said, .was scoffed at by municipal authori-'es as both visionary and impossible.

PROGRESS IN STATES The amazing progress of town planning in the United States is attributed to a central or federal government town planning agency which assists the movement in every possible way, especially by the periodical issue of zoning priners, model enabling acts and other terature. Canada also established central educational agency in the fedoral town-planning office established in staff, including two engineers and two architects. It has not functioned disruption of the Commission of Conservation to which it was attached, its staff was largely disbanded and its ac-

Livities severely limited. The most striking evidence of result fact that all the provinces, with the Zional plan for the whole district and in however, is understood to be shaping provincial act), have passed Town Planning Acts. Some of these have been antirely fruitless due to indisposition or the part of the provincial governments to appoint technical and educational Canberra being built on garden city you can eat and sleep well. Acts on intelligible to the municipalities con-

VANCOUVER QUOTED

Vancouver was referred to as th shining light among Canadian municipalities in regard to town planning. A great regional plan for Greater Vancouver is in progress—an interim zoning prepared and presented to the city nicipalities around Vancouver are engaged in town planning. In Victoria a zoning bylaw is ready for final passags by city council. The planning of the University Endowment Lands at Vancouver is referred to as a magnificent project resulting in the growing up of a university city on the headland of Point Grey planned in every detail on modern town planning lines. Vancouver is making full use of the authority conferred by the British Columbia Town Planning Act passed in 1925. That city. by the way. said Mr. Engler, is being entered in a thousand town-planning documents al over the world as the most progressive city in Canada.

PRAIRIE TOWNS Reviewing progress in other parts of Canada the committee report stated that | interest is reviving in Catgary, where a city plan was prepared in 1914 but was considered too elaborate to follow; Edmonton is forming town-planning committees and the Premier of Alberta has declared his intention of promoting town-planning; Regina has passed town-planning bylaw; Saskatoon has appointed a Town Planning Commission: the province of Saskatchewan has town-planning director who is guiding the destinies of new towns and during

the past year has examined no less own accounts?" than 18 proposed new townsites; Winnipeg is bracing itself for action and a local branch of the Town Planning Institute is being formed.

In Eastern Canada, Kitchener passed zoning bylaw some years ago and recently London has taken similar action. 1915 with a town-planning adviser and The City Improvement League of Montreal has toiled for many years to promote a comprehensive plan and it vain, states the report, but with the now proposed to raise \$30,000,000 on town-planning debenture. Quebec committed to the appointment of a town-planning commission.

In Ottawa, the report points out, there is now a Federal District Commission whose plans may develop into a rethis respect may compare with many other capitals of the world, including want-even fried onions. London and washington, which are en- nded gas and sourness, and I enjoy gaged in such regional projects. Aus- life now."-Mrs. L. Branton. tralia on the other hand, has planned its new capital from the beginning. Tas and that bloated feeling so that lines from virgin territory.
