DAILY EDITION

HOOVER OR SMITH

Only a month elapses now before the people of the raises from level to level. A big United States will choose their president. The Literary ore tonnage is indicated by the Digest is taking a straw vote which while it shows Hoover fact that ore was encountered in leading also indicates that Al Smith is drawing heavily the 240 foot level tunnel at a from former Republican sections and will make a very point three hundred feet south of strong running against the Republican even if he does not become president.

The personality of Smith is strongly in his favor. He eral opinion that the Tiger will is said to be a man whom people like to meet. That goes rapidly develop into a large proa long way, especially in these days of "listening in" on the ducer and that the property will radio when the speeches of candidates are heard by many be on the shipping list within a thousands of people, possibly millions.

To Canadians this is one of the greatest sporting nance Co., which is in a strong events of the season, rivalling even the world series base- financial position, are: President, ball in interest.

AN UNKNOWN COUNTRY

Recently the Daily News drew the attention of one of C. O Wickenden and G. A. dethe banks to the fact that in its report on crop conditions Haseth in British Columbia no mention was made of the Bulkley The Esperanza Mine at Alice or Nechaco Valleys. Now we wish to draw attention to Arm, the directorate of which inthe report of the Provincial Agronomist of the Depart- cludes Thomas McMeekin, D. B. ment of Agriculture at Victoria to the fact that the Bulk- McDougall and E. H. Mortimer, ley Valley has been missed from its report. There is a de- all of thic city, will be operated tailed account of conditions in the lower mainland. Then on a larger scale this winter than Central British Columbia is mentioned, that including Lil- ever before in the history of the looet, Cariboo, Ashcroft to Clinton, Forest Grove, Wil- ed to arrive at the property withliams Lake, Soda Creek and Quesnel. Possibly the Bulkley in the next few weeks and will be is supposed to be included in the general report on the used to operate two drills. A new Prince George district, although there is no hint given that tunnel, which was commenced resuch is the case.

We respectfully draw the attention of the Provincial any of the present workings, has Department of Agriculture to the fact that there is a feet and is expected to encounter wonderful farming district in the Bulkley Valley and that the ore at any time at much it should be included in any survey of conditions. Also we greater depth. If this tunnel is draw attention of the people who live in the Bulkley and successful, a new tunnel at still Nechaco valleys that they are not looked upon officially as Central British Golumbia, in spite of the fact that the As-mill will possibly be installed at sociated Board of Trade for that section of the country is some future date but nothing deso named.

BRITISH LABOR AND PEACE

Probably every party in every civilized country of the den Creek and Premier Mines, and world stands for peace. Both Liberals and Conservatives ore shipments will be considerably and Labor in Britain and Canada certainly do. The difference of opinion lies in the policy either would take to bring about the desired end.

The general Conservative policy is to keep the peace made an appropriation to cover by being prepared for war. The Labor policy is to set an the cost of constructing a winter example of peacefulness which it is claimed is more power- road to the Owen Lake mining ful than the use of provocative measures.

Yesterday Ramsay Macdonald proposed a resolution extensive program of development at the big Labor convention at Birmingham which sets will be carried out during the forth the Labor attitude very clearly. It calls for arbitra- coming winter. As a consequence, tion of international disputes, abandonment of the Anglo-French naval pact, moving for a disarmament treaty and the withdrawal of British troops from Germany. The re- and the work will be completed solution was carried after some discussion, all of it of favorable nature.

NOVA SCOTIA ELECTION

Both of the great parties are elated over the result of taken in including compressor of the Nova Scotia elections. Conservatives are pleased that large capacity. The property was they won, while Liberals are pleased that they have so far bull of the University of British covered their prestige in the Bluenose province as to Columbia who made a flattering ome very close to upsetting the government. Everybody is happy. That is the way to be after an election.

AROUND PRINCE RUPERT

Tiger Property at Alice Arm Attracting Attention-Esperanza Extending Operations-Taylor Starts Work at Owen Lake

The Tiger property at Alice Arm, which is being developed by the Utility Mining & Finance Co., is attracting considerable attenion just now. The ore bodies have been encountered underground with comparative ease and their richness is outstanding. Outside construction work and underground operations are being rapidly pushed and a new camp is now under construction. This new camp, providing accommodation for twenty men, will include blacksmith shop, assay office and general office.

It is being built on the main trail from the Toric to the Wolf and it is expected that the main including new camp, compressor new tunnel, which was commenced level, has been driven a distance of over eighty feet. This tunnel is expected to encounter the ore at a depth of 400 feet. When this has been done a main tunnel will be driven and ore will be blocked out on the three upper levels. This work will consist of driving on the ore bodies and driving where the 140 foot tunnel struck

it. A compressor plant will be installed next month. It is genshort space of time. The directors of the Utility Mining & Fi-F. L. McDonald; vice-president, W. M. Brewer; managing director, E. H. Martin; secretary, W. J. L. King; directors, W. J. Renix,

property. A compressor is expectcently at a lower elevation than lower elevation will be driven. An aerial tramway and concentrating finite on this has yet been decided upon. The Esperanza has been the most persistent shipper in the north, except for the Hidenlarged with the new machinery which is to be installed.

The provincial government has properties now controlled by Frank H. Taylor and on which an three large crews have been put o work on new road construction over a distance of seventeen miles in time to get machinery in before winter conditions arrive. For the development of the several properties under option to Mr. Taylor considerable machinery will be report upon it. H. L. Batten, M.E., also examined the property recently. It is said that the mine may warrant the installation of a mill within six or seven months. Mr. Taylor is now in the south arranging the necessary finances.

Extensive development work has been conducted throughout the past summer on the Silverado mine at Stewart by the Premier Gold Mining Co. An electric transmission line has been built from the International Electric Co.'s plant on the beach to the workings at 3500 feet elevation where a large amount of building con-

ter, the expectation being that the vein toward which the tunnel is being driven should be reached in about three months. Ore will be shipped by Premier from Porter-Idaho, Silverado and Prosperity as soon as the new aerial tramway is completed. The value of the ore is being well maintained. Tramway terminals at tidewater at the mouth of the Marmot River have been secured. Two aerial systems will be used; one connecting the terminal with the tunnel outlets of the Porter Idaho and Prosperity and a second with the Silverado. Premier is spending upwards of two million dollars in bringing these properties struction has just been completed into production.

working tunnel will be on about house and snowsheds. With the Railway offices stated this the same level as the camp. The completion of the electric system, morning that the season's first working tunnel which is expected full trainload of grain for the a short time ago, after ore had power drills will be used in the Alberta Wheat Pool's Prince Ruto be 1000 feet long. Winter sup- pert elevator would probably be plies are now being landed at the in tomorrow or the day after. A mine and work will be carried on few individual cars are expected continuously throughout the win- today.

HE material progress of our Province is known the world over. We speak with pride ... and rightly ... of its vast natural resources awaiting conversion into merchandise and wealth. We take the figures of ten years ago and compare them with those of today ... and the world agrees that our progress . . . considering our population . . . has been the brightest feature in the recovery of the British Empire from the war.

And if this progress, of which we are so justly proud, is to continue, does not the most vital force of this country lie in our children? Some day, they will take the helm. Events will follow their judgment, skill and decision. THEY ARE OUR GREATEST ASSET!

The Boy of today is the Man of to-morrow ... the Girl, the future Mother of our citizens.

On us rests the responsibility of shaping their formative years so that when we hand over the reins, they may carry on the Torch of Progress, undimmed.

How have we met our responsibility? Can we look Young British Columbia in the eye with the feeling that all will be well with the future of the province for which we have planned so carefully and labored so faithfully?

SURELY!

In the last ten years our school population has grown from 64,570 to 101,688 . . . 58%. We have 1,065 schools manned by 3,396 thoroughly trained, competent teachers . . . an increase of 31.7% and 71% respectively!

Recently we have established special vocational schools for our girls and boys, where they may be fitted for those occupations for which they have a natural bent.

Higher education is amply provided for at our University of British Columbia, where two thousand students are now enrolled, the majority studying for their degree in Science and Agriculture.

And to the school training of our children we add the powerful influence of Home, the religious and other organizations, each of which is contributing its full measure of the physical, mental and character upbuilding of our dearest, most treasured asset . . . OUR CHILDREN!

With confidence and faith we will hand over our beloved Province's future when the time comes!

Read these announcements and understand your province's T progress . . . clip them out and send them to friends. If you desire extra copies of these announcements a note to this newspaper will bring them. Advertise your Province!
