## FORCE SOMETIMES NECESSARY

Force is still necessary, especially in dealing with backward nations like the Arabs, Indians or Russians. Nothing else counts with them. They despise the weakling but they respect a regiment build a road connecting Aiyansh with of soldiers with guns and other equipment.

We all look on peace as the greatest blessing that could come nection with the railway and thus facilto the world but perfect peace is a long way off and must not be stating mail and freight delivery. It was expected in our day. We have to prepare to deal with such people pointed out that about thirty miles of as those now running riot in Arabia.

Peace principles do not particularly appeal to those people. They have no world outlook except it be perhaps a vision of world dominion of the Moslems. The leader of their religion enforced his precepts with the sword and it proved effective even when peaceful measures failed.

## FARM LOANS

Central B.C. will be much interested in the passing of the Farm Loans bill which has been approved by the Legislature of B.C. It will enable farmers to borrow money for the extension of to co-sperate in the matter. operations and will enable them to clear land and increase their production. This will benefit everyone.

If the farmers have money, everybody has money. They are producers and the development of Central British Columbia depends largely on them.

With the development of Central British Columbia is bound up on what will later be the cut-off or to a large extent the future of Prince Rupert. Railway service can shorter road to Lakelse Lake. be improved if the country is more closely settled, and the farmers produce more.

## NOBODY SURE OF TIME

Nobody can say just when the general election will be held were on hand to be placed in it, with but the opinion in the south seems to be that it will take place in more premised as soon as prospectors the fall, according to advices received yesterday. Probably some could get out to their claims. As a announcement will be made by Premier MacLean before the legislature rises, which will give a clue as to the possible time for the event. Under our elastic constitution the Premier can decide when he will appeal to the country as long as he does it within the time specified in the law which provides that a legislature shall not sit for more than five years.

We suggest that in any case those not registered should be busy and get their names on the voters' list at once.

## GRAIN SHIPPING ACTIVE

There is rather sudden activity here in grain shipping, due doubtless to some economic cause which makes it advisable to route the grain this way. It is nice to see the big steamers in the harbor smithers on Tuesday and will spend a and to feel that this is really a grain port which is proving its value to the country.

Once the Orient buys grain once more we may look for greater to spend the summer. development in the grain business here. Just now all the shipments are being made to Europe.

## SETTLERS COMING

Once more the spout has been opened and settlers are coming McDonald, mining man of Usk, was a to the country from Europe. So far the movement has just begun, business visitor in town during the Men are needed to help put in the crop and they are being brought week. Mr. and Mrs. G. W. Bissonnette to the prairies by the railways. Those wishing to take up land are and children have spent the past few encouraged to do so and the prospect is more of this class than ever months in vancouver, returned to Terbefore will come to the country.

Large numbers of men are being employed on railway construction and mining this year and that will tend to make labor scarce business visitor here during the week. so that Canada will be in a position to absorb a good many and some of them are anxious to go on the land as soon as they have made enough money to start.

INCLUDING ROADS AND MINERAL

Correspondence arising from action taken by the railway committee showed that the seeming discrimination against ower freight rate from Prince Rupert. way-employees, was shown to be brought about by action of the employees themselves, who annually voted where they wished their cheap rate to apply from. As the rate carried with it a free pass to the point designated, it was natural that the larger centre should be chosen in most instances. In this connection the secretary was asked to write and ascertain whether the half rate allowed was confined to only one point, or whether, if the employee requested, he might have the privilege of the reduced rate from more than

ROAD OBSTRUCTION

The obstruction on the West Hill Road and the continued inactivity of the public works department in this matter was again brought to the attention of the meeting. It was suggested lle driver being brought in soon for the Copper River bridge it be first used in repairing this hill road.
