CIRCULATION CAMPAIGN

Most readers of this paper will know by now something about the circulation campaign starting in connection with this paper. The idea is to increase the circulation of a northern newspaper as against those in the south or outside the province so that people in this section may become imbued with a sense of loyalty to the north and may keep in touch with all its activities. There is no other way of doing this at present except through the columns of this paper. For that reason we ask them to consider the campaign and its possibilities as applied to themselves and urge that readers generally co-operate and make it as great a success as possible.

The election is over and we are now back to normal and plan to devote all our energies to keeping our readers both at home and abroad informed on the developments taking place in this huge country and also in giving them the best possible general news service.

WELCOME SIR HENRY

Sir Henry Thornton comes to see us every year and we are glad to have him pay us a visit occasionally. He knows as well as we that he has not been able to carry out all his plans in connection with this port, but we hope he will give earnest consideration to some of them this time and try to have them carried out. He knows what they are as well as we.

And possibly we may be able to help the railway to some extent. We might for instance persuade the government to give us a daily mail service during the summer months and to pay the railway for it. That would be a great thing for us and would also benefit the railway. The new mills starting here recently will benefit the line and we hope there will be other industries develop that will provide business for the railway.

BIG MISSOURI MINE

The taking up of the option on the Big Missouri mine is a great event in mining circles. It means an immense lot to the Salmon River section of Portland Canal and has an influence in drawing attention to the whole district. If the option had been dropped it would have been a serious blow. To have two big shipping mines in the same valley is a great thing but it is only the beginning of what it is hoped will be much better times for Stewart and the surrounding country.

EXTENSION OF SCHOOLS

Possibly it is not generally recognized what a healthy sign is the extension of educational institutions in a community. When the Booth School was built here it was twice as large as was actually needed, yet today all the schools in the city are crowded and others will have to be erected soon.

In Terrace they are planning a new high school to provide for the increase in number of children attending, a second room having to be opened there after the holidays.

There are other advances, all of which point in the direction of increased development.

LARGE INCOME RADIO CONTROL

SUM OF FOUR AND HALF MILLION RECEIVED BY COMMISSION IN BRITAIN

LONDON, July 20.—Government control of the Radio here has proved a profitable matter, at any rate for the Government. The first report of the British Broadcasting Commission, shows that its income for the year was \$1,500,000 and that after setting aside \$300,000 for construction of regional stations there was still \$900,000 to be carried forward. The sum of \$4,000,000 was derived from wireless licenses. It spent \$2,500,000 on its programs. Many interesting facts are given in the report. There were, for instance, 68,000 hours of transmission during the year, with only about 20 hours of breakdown. Music occupied about two-thirds of the programs. Lessons by wireless seem to be growing in favor in schools, for 4,000—double the number of the previous year—were known to listen to London and Daventry alone. The total number of listeners increased by 217,000 during the year to 2,395,174. The Earl of Clarendon is chairman of the Commission and receives a salary of \$15,000. Lord Gainsford is vice-chairman, and has a salary of \$9,000. As ordinary members Sir Gordon Nairne, Dr. M. J. Rendall, Mrs. Philip Snowden, and Brigadier-General Reith receive \$3,500 each.

News of the Mines

AROUND PRINCE RUPERT

To Develop Silver-Bell at Stewart—Strike Made on Old Penetang Claim—Georgia River Gold Active

The contract has been completed for 4,500 feet of horse trail and the construction of camp buildings on the Silver Bell Mining Co.'s property near Stewart and everything is now in readiness for the commencement of actual development work as planned for this year. The property consists of sixteen claims and fractions on the east side of the head of Portland Canal, about one and a half miles southeast of Stewart and extends from just above tidewater to an elevation of some 4,500 feet. It is bounded on the north by the Silverado Consolidated and on the east and southeast by the Prosperity, its easterly boundary being only 750 feet from the Porter Idaho. The tram which the Premier will have to construct in order to handle Silverado ores will run directly across the Silver Bell property to the Premier terminals at the mouth of the Marmot River where it will join the tram now being built to the Porter Idaho. Considerable development work has already been done on the Silver Bell, under the direction of E. G. Riebe, consulting engineer, the funds having been advanced by Messrs. Backus and Engberg of Seattle. Mr. Riebe reports that there are four well defined veins vividly traceable throughout the length of the claims, these veins varying in width from six inches to eighteen feet with gold, silver and lead values from a few dollars a ton to \$96.20. The extensive work being done on Silverado, Prosperity and Porter Idaho should greatly assist and encourage development on the Silver Bell.

A discovery which may prove of considerable importance has been made on the old Penetang crown-granted claim which adjoins the Dalhousie group on the east and has been owned by W. D. Brown, one of the Dalhousie directors, for several years. The discovery was made in a gulch beside and partly underneath a small waterfall and as near as could be ascertained by picking around beneath the spray the vein is twelve feet wide with eight inches of solid ore on one wall that assays sixty-one per cent, the balance of the vein being well sprinkled with galena and showing some ruby silver. An effort is being made to work out the continuation of the vein.

With the exception of two bridges that are required, the trail up the Georgia River, south of Stewart, has been completed for six and a half miles and is now within four miles of the Georgia River Gold property. A commodious floating wharf has been built at the mouth of the river near the company's beach camp. It is the intention of the company to start development of the property at once back-packing sufficient supplies for immediate needs.

The Premier management has moved a compressor plant on to the Silverado mine at Stewart for the purpose of driving a 1000-foot tunnel to be used as a working tunnel when ore is encountered. From the portal of this tunnel it will be pretty well a straight shoot through to the site of the dock which the Premier is constructing at the mouth of Marmot River for the purpose of shipping ore from the Porter Idaho and Prosperity properties.

A crew of a dozen men in two shifts is now employed in driving two tunnels with power drills on the Marmot Gold property, consisting of fourteen claims and fractions, at the head of Magee Pass on the south fork of Marmot River, some eight miles from the beach. Arrangements have been made for the surveying of the property preparatory to crown granting. Camp construction has been completed and development is being rushed. The work is at present confined to two main veins, other showings being left for future exploration. No. 1 vein has been traced a distance of from 3,000 to 3,000 feet and has a width of from six to fourteen feet, containing a sulphide ore carrying values in gold and silver with some lead and a little zinc. Open cuts in a number of places have given assay returns of from \$27 to \$400 per ton, mostly in gold and silver. There is also some free gold and native silver. No. 2 vein has been traced for some 1800 feet on the surface and has a width of from 6 to 12 feet. Values are identical with No. 1 vein. Two cross-cut tunnels have been started for the purpose of gaining depth. One is now in fifty feet and will have to be continued another 300 feet to reach the vein. The other tunnel driver for No. 2 vein crossed the formation for 3 feet and was turned and driven on the strike of the vein for 65 feet. Another 80 feet should put it under the surface outcrop from which assay returns of \$170 across three feet in gold and silver were taken. When the objective is reached the drift will be continued for the purpose of developing the vein and gaining depth. Herbert Bush is managing director of the Marmot Gold.

TALKING ABOUT NEW CABINET

SUGGESTION MADE AS TO WHO MAY GET PORTFOLIOS IN TOLEME GOVERNMENT

State making is the popular pastime just now. Every person interested in politics has some suggestion to make as to who will be in the new cabinet. When Dr. Tolmie is called upon to form a government, following the resignation of Dr. MacLean it will be his duty to select the best material, not necessarily from the members elected but probably from them. Any person chosen for the cabinet has to go back to the people for re-election, this being so that the constituents may agree to his taking the position. It is impossible for anyone at this distance from the centre to make anything like a certain prediction as to who will take portfolios but the following guess has been made locally.

Premier and Minister of Agriculture, Dr. S. F. Tolmie.
Attorney General, R. L. Maitland.
Provincial Secretary, R. H. Pooley.
Minister of Finance, W. C. Shelly.
Minister of Public Works, J. W. Jones.
Minister of Lands, Col. Fred Lister.
Minister of Mines, W. A. McKenzie.
Minister of Education, Joshua Hinchcliffe.

POLITICAL SITUATION AS SEEN YESTERDAY

Tom Uphill of Fernie the Only Labor Man in the New Legislature

VANCOUVER, July 20.—Yesterday afternoon's election news showed Colley has a majority of eleven with three polls to come. Bruhn has a lead of a thousand in Salmon Arm where the count is practically complete. McKenzie is re-elected in Similkameen. Tabulation of the situation in 48 ridings yesterday showed Liberals elected in Alberni, Cranbrook, Nanaimo, New Westminster, Yale, Omineca, total 5.

Liberals leading in Columbia, Kamloops, North Vancouver, Prince Rupert, Revelstoke.

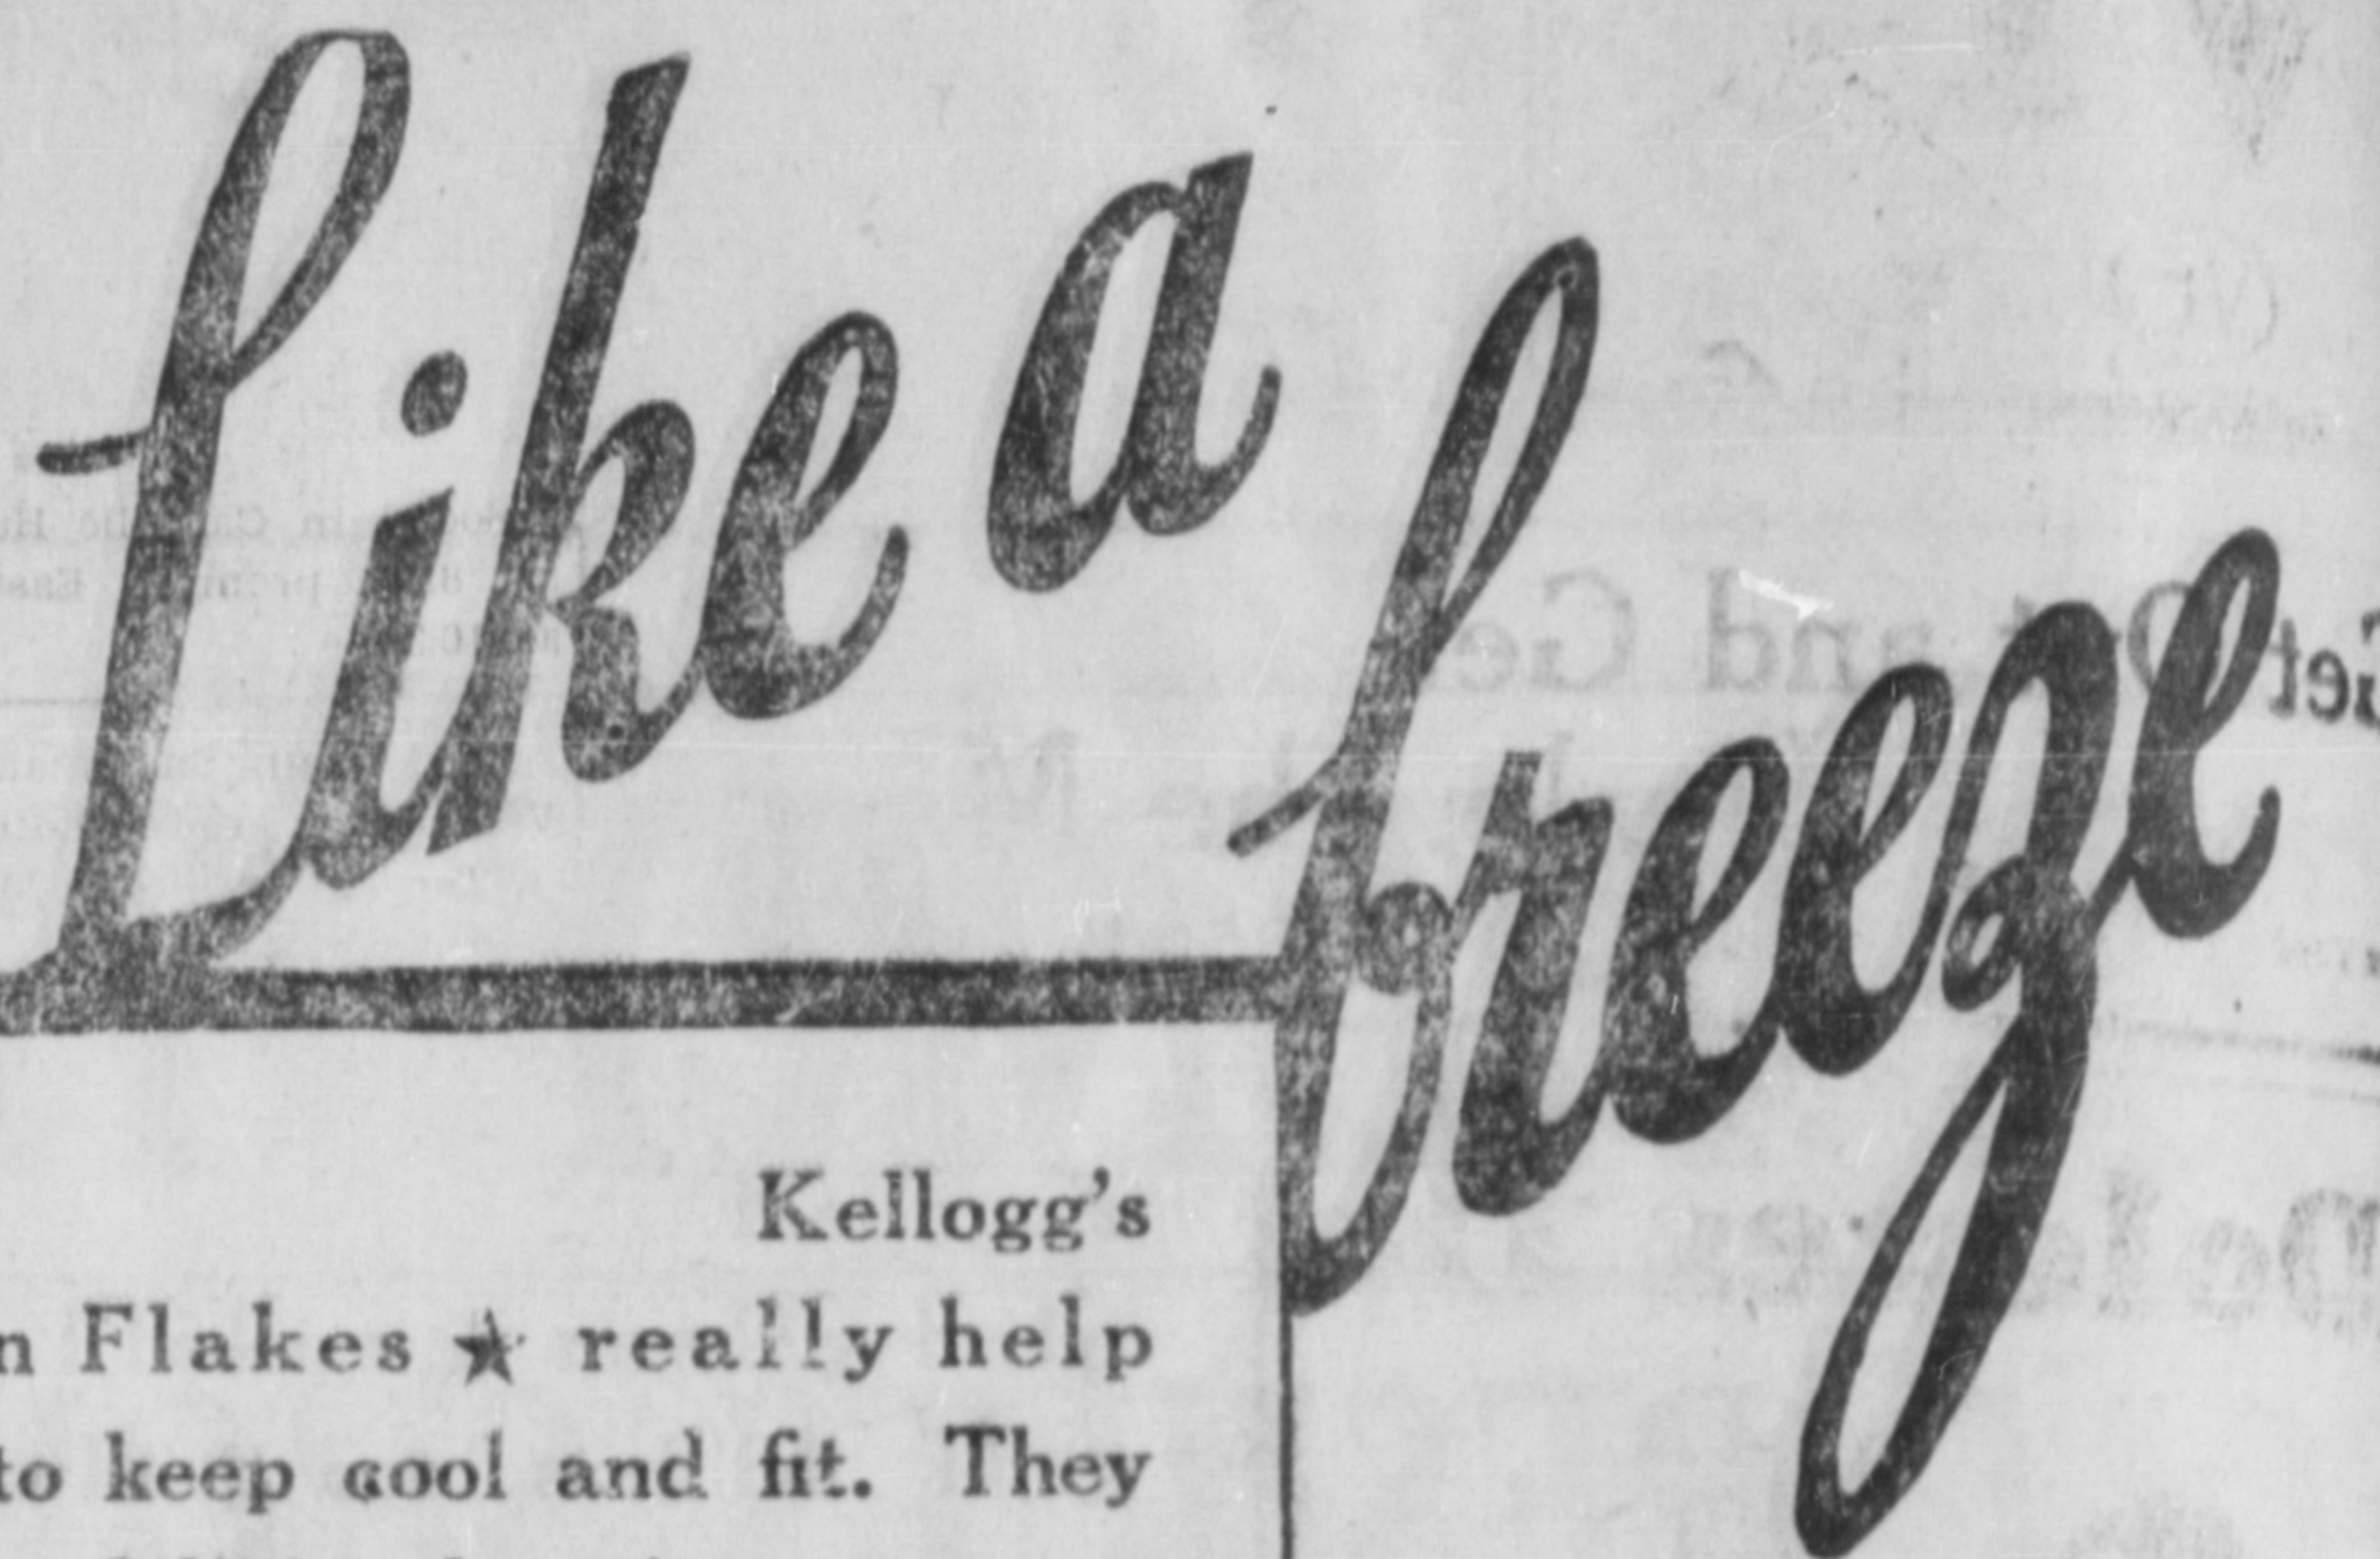

Conservatives elected in Burnaby, Chilliwack, Comox, Cowichan-Newcastle, Delta, Wewdney, Esquimalt, Grand Forks-Greenwood, The Islands, Nelson, North Okanagan, Richmond-Point Grey,

"BLACK AND WHITE ALWAYS RIGHT"

BLACK AND WHITE SCOTCH WHISKY

This advertisement is not published or displayed by the Liquor Control Board or by the Government of British Columbia

Kellogg's Corn Flakes really help you to keep cool and fit. They are so deliciously crisp—so easy to digest. Which is just another reason why more than 11,000,000 people demand them daily!

Kellogg's CORN FLAKES

No other corn flakes equal Kellogg's for flavor and crispness. Kellogg's are never tough-thick. Never heavy. Always extra light and crisp!

Serve for lunch, dinner or breakfast. Delicious with milk or cream—fruits or honey added.

Order at hotels, cafeterias. On dining-cars. Sold by all grocers. Made by Kellogg in London, Ont. Always oven-fresh!

We are pleased to announce that the Ford Canadian factory will soon be in full production.

The exceptional value in the Model A car has been worth waiting for.

The following models will be on display at our Third Avenue showroom on and after July 17 for a few days:
