AROUND PRINCE RUPERT

Granby Co. Opening up New Mine Near Anyox-Is Also Increasing Power Facilities-Activity at Dalhousie Mine

The Granby Co. has completed all plans for the operation this year of the Bonanza mine which lies about two miles from Anyox values being recoverable by hydraulick- until they came to Terrace in 1921 near the head of Granby Bay. Surveying has been completed for ing, and that field may be develop to and have many friends there who will an aerial tramway which will be about two miles long and which some importance. will connect with the company's concentrating mill and smelter. About fifty men will be employed when operations are in full swing. As mining proceeds, further development will be carried on to explore the copper deposits of the property. Previous development work has been instrumental in blocking out a considerable tonnage of ore of good grade.

H. L. Batten, Vancouver mining engineer, who recently visited the Topley field in the interior is now at Alice Arm making an examination of the La Rose property. The extent of this year's operations will be based on his findthe company.

Plans are being made for an intensive program of development work on the Dalhousie mine at Stewart which recently received the tram line which was formerly used on the Rocher de Boule mine at Hazelton. The work will be chiefly by European capital.

music

With the new Orthophonic Victrola the music is real---you may have any kind--and you may have it when you want it.

There is always a "first time" during which we form certain impressions that never again leave us. So it is with that amazing new instrument, the new Orthophonic Victrola. Whether you first meet it during day or night,-you will never forget that great surprise at hearing real singers, real players, real orchestras, -real music. Liquid trebies, -gruff basses,-all there!

How do they come here so completely? What magic put them there?-to release them for you, in such profusion of choice, at the precise moment you command?

For this magic of the new Orthophonic Victrola,-you and we must thank the scientists who spent so many of their years in developing the principle of "Matched Impedance" or "smooth flow of sound", Placed in Victor's hands only two years ago, this principle swept away old methods and traditions, and has been transmuted into all the music of all the world, to be spread into millions of homes.

So now you may have beautiful, real music, as you wish and when you wish, from graceful cabinets which anyone can own,from \$1400 down to as low as \$115. Electrical drive, if you choose, at slight additional cost, eliminates winding. At all His Master's Voice dealers on convenient payments.
