A GREAT FLIGHT

The two Australians who piloted the Southern Cross to Suva by politicians who made frequent apin the Fiji Islands from Honolulu as part of the journey from California to Australia and also the two Americans who accompanied them as navigator and radio operator, made a wonderful record and they will be looked upon as among those who have blazed the future air routes of the world. It is to be hoped that they finish their long flight successfully, thus placing Australian air navigators along with those of the United States and Britain as leaders in that line of endeavor.

MAY THEY CHOOSE WISELY

Today the Synod of the Anglican Church in session here is made for the next meeting on Tuesday choosing a bishop to have charge of the whole of the northern half of next week and also for a picnic the of British Columbia. It is an important position and the choice of week following which will bring the the right man means much to the whole diocese. While it would be young people's activities of the past out of place to make any comment on the proceedings, keen interest winter to a close. is being shown in the matter and it is to be hoped that the best interests of the Church will be served.

TWO IMPORTANT CONVENTIONS

Two important conventions are meeting today in Canada. One is that of the Manufacturers' Association in Quebec and the other is the co-operative gathering in Regina under the auspices of the Canadian Wheat Pools. The former is a national gathering and the latter international.

The general feeling is that gradually the pools will extend cracked grain. their operations until they develop into a world trust. While the organizers deny any such ambition the steps they are taking all seem to indicate that end. It is the most successful development a fair flapper): "Let me sell you a of practical socialism that has yet been seen.

The manufacturers also through their association are a huge combination of those engaged in another branch of industry but it must of necessity be national rather than international in scope because its members ask for higher duties against goods manufactured in other countries. Yet the aims of this organization are not we live out of a paper bag-lovely wholly selfish. Its president in his address yesterday said:

"We believe that co-operation and a friendly spirit will help morning's playing golf-and afternoon's solve any national question that emerges, and we are always ready the club playing bridge at night to do our share. Canada is one of the most favored countries in the world in the moral and physical qualities of her people, in climate, undertaker's—all I need is a garage in geographical location, in opportunities for individuals, in secur- with a bedroom above. Nix on the ity of life and property, and natural wealth. Canadians have a great home." heritage and they should hold it fast and develop it in trust not only for themselves but for future generations."

CURIOUS WORLD PROBLEM

There is a constant movement going on in the industrial world. As social legislation is passed, hours of labor are shortened and the with some other girl, you may depend cost of manufacturing increased. The cost of manufactured goods the first one will have little use for also increase and thus there is an increase in the cost of living. So him. also the cost of food is increased through the operation of the wheat pools and other organizations formed to keep up the prices. So there is a constant circle. There is the worker trying to get more for his labor, the producers trying to get more for his produce and the other part of the population trying to secure the necessaries of life at a reasonable rate. In all this maelstrom of conflict some are bound to be crushed or badly squeezed. The fight for upper place is just as insistent as ever but it seems as if the general conditions of life are much improved. Possibly as time goes on an even more equitable system will be worked out, but in the process there will be much suffering and many will fail.

REV. A. WILSON GIVES INTERESTING ADDRESS TO YOUNG PEOPLE'S SOCIETY OF UNITED

United Church, at its regular weekly meeting last night, heard an interesting report from Rev. A. Wilson on the young people's section of the British Columbia conference which was recentheld in Vanccuver. The feature of that portion of the conference had been an address by the president of the Van-Transient Advertising on Front Page, per inch \$2.80 couver Young Men's Christian Associa-25 tion on the Pacific Relationship Cono ference which had been held some time previous in Honolulu. Mr. Wilson repeated the main impressions which the Y.M.C.A. head had conveyed.

First, the passing of the old method i diplemacy and the substituting therefor of round table conferences in settling international differences, special tribute being paid to the lead that had been taken by the late President Woodrow Wilson of the United States n this connection.

Second, the coming of economic exerts in settling inter-racial questions which had formerly been dealt with

peals to prejudice. Third, the place of Canada in interpreting the Oriental peoples to Europe. Canadians being a peace loving people practically free from racial prejudices. Fourth, the three problems which had been left to the young generation to solve-the commercializing of vice, the liquor menace and racial relation-

Mr. Wilson's address was followed by the regular business period. Plans were

Builds Industries!

PRITISH Columbia's Power resources are the envy of the world. With Power, the

portation problems solved; manufacturing industries developed, and with them

riches of the world can be won; with Power, ores can be mined . . . smelted; trans-

Side by side with our power development, Industrial Expansion has kept pace. Today 17% of Canada's external trade is handled by British Columbia. During the past decade, our basic industries have increased 101.3%. Our total payroll, including all classes, is estimated at 210 million dollars. Today, our Lumbering, Mining and Fishing industries employ 72,517 people, paying them 175 million dollars in wages . . . distributing an average wage ranking among the highest in Canada.

These 175 millions in wages are a great contribution to our annual internal trade in the province. They have given our industrial workers a buying power ranking second in the Dominion and have largely been responsible for our ever increasing prosperity, as evidenced by the fact that the number of automobiles registered in the province last year was 76,187 as compared with 8,596

British Columbia's steady and varied industrial development has changed the conception in Eastern Canada and the United States of our province. No longer are we entirely dependent on the East for our manufactured products. British Columbia is increasingly furnishing her own needs. She now ranks third in the whole Dominion as a manufacturing province.

Our phenomenal Power and Industrial growth has focused the attention of the great industrialists and investors on our province. Today, British Columbia in the eyes of the world, stands for Power, Progress and Plenty. May our efforts of the next ten years stabilize and increase our Prosperity!

Read these announcements and understand your province's ? progress . . . clip them out and send them to friends. If you desire extra copies of these announcements a note to this newspaper will bring them. Advertise your Province!
