CIVIC PRIDE INFECTIOUS

One of the greatest assets today is a beautiful city and every H W. M. Rolston, managing director, The others are the Moose, Climax, Dolly citizen can aid in making it that. Flowers and trees and well kept and B. A. White, secretary-treasurer. A Varden and Wolf. The Silver Hoard buildings and gardens, with neatly mown lawns are one of the large fund has been appropriated for consists of four claims and adjoins the greatest attractions any city can have.

The first thing in every city is for the people to be of the right kind. They must be alive to their opportunities, courteous to strangers, keen for the common weal as well as for their individual advancement. Given such people and the city will of necessity be made beautiful. People who are alive to their opportunities will be alive to the value of beauty in the building of the community.

But no city ever started out under perfectly ideal conditions, receive more attention from the min-There are always numbers of people who are not interested in any-ing engineers and scouts," stated Dr. Moose and contains some large showthing that does not directly concern themselves. These have to be H. T. James, resident mining engineer educated to the idea that no person can possibly succeed to himself, for this district, in a recent address commenced by the owners to strike ore It is in community success that lies the hope of everyone. By united effort, each doing his part and doing it well, a city may be made so attractive that the right kind of people will wish to live there, unfortunate and shut down. and those who are not naturally keen on artistic development will be drawn into the movement through the enthusiasm of others.

Civic pride is infectious. It spreads rapidly if given a proper examine. There are four distinct min- renewed before that date to protect start and kept growing by a little judicious encouragement. People eral zones, each containing very little mining claims. who have been slaves to their work become freed through the development of their artistic and altruistic tendencies and the city bene-

THREE-CORNERED FIGHT

There seems to be every prospect that Prince Rupert will have a three-cornered fight at the forthcoming provincial election. This is a pity. There are at present two Tolmie candidates in the field. One is J. H. Thompson, the regularly chosen candidate of the party, a zinc property. The situation is ideal. and the other, S. M. Newton, who represents what is usually known right at the head of the canal and here as the Newton faction.

Of course both these men have a perfect right to be candidates. "On the opposite side of the river is the troubled waters. Also there could be a dozen more candidates if the men wished to another string of properties in which offer themselves. There is no law against it. However, no good the values are silver, lead and zinc. purpose is to be served by their running or even by two Conserva- into the silver-lead type which you find there is an ignorant speaker talking tives offering. AROUND PRINCE RUPERT

Henton Interests of Tacoma Take "96" Group at Stewart-Resident Engineer Draws Attention to Alice Arm-Spencer Acquires Two More Mines

The Henton interests of Tacoma, who made the first big deal on the Big Missouri, have taken the "96" group, between Texas Creek pass and Salmon River, under bond and will thoroughly investigate the property this year. Mr. Henton accompanied by Harry Townsend, consulting engineer, intends to make a surface examination of the property as soon as the snow has sufficiently disappeared. The bin at the mouth of the prospect tunnel now contains about ten tons of ore and a shipment is to be made to three smelters to determine values. Dan Woodmore and Ray Snyder are the owners of the property.

CLAIMING WAGES

Pickering and seven other men who are seeking collection of wages from the defunct Dumont-Emerson logging concern is adjourned until Friday morning.

TIE'S an artful angler, is Mr. "Cheap" Paint. "Low price"-"just as good" -"save you money"-that's the kind of bait he effers you when the question of painting or re-painting your house comes up. But-don't be fooled. Don't bite on that kind of "applesauce."

After all, it's paint you want, not something that looks like paint.

You want coverage and SWP House Paint gives you coverage. A gallon of SWP will put two coats on 425 square feet of good surface. A gallon of the "cheap" paint will put two coats on 300 square feet. SWP costs a bit more by the gallon but it costs a lot less by the job. And it gives you a job to be proud of. For SWP has color beauty. It has durability. It stands the racket of wear and weather as

SWP House Paint is perfected by the Master Touch - a thing that no cheap paint can ever attempt to give you. This Master Touch is possessed only by the world's great scientists. Burbank had it in the field of horticulture. Edison has it in the electrical world. Marconi discoverer of wireless, has it. And the scientific men at the head of the Sherwin-Williams laboratories possess it and add it to the tested, proved materials used in the making of SWP.

That's the thing about SWP that can't be duplicated. So when you hear or read that some "low

priced" paint is just as good as SWP-don't bite. Put it down as "applesauce" to catch the unwary. Take your paint problem to "Paint Headquarters," the store of your local Sherwin - Williams dealer, He sells SWP and will tell you the quantity you need for the job. He has interesting literature to give you, as well as a free copy of the Sherwin-Williams "Household Guide."
