The VALUE of BOVRIL to WOMEN

Women who are easily tired need Bovril to prevent them from getting "run down"! Bovril is especially valuable in replenishing a woman's reserves of energy. It acts so quickly. You feel the benefit of Bovril-its warm, stimulating action upon the wearied system—as soon as you have swallowed it.

And if you keep up your Bovril daily you will soon find your strength become equal to the work and worries of everyday life. For Bovril builds up health and fitness by sound nutrition. Bovril is the best of the beef-its vitalizing and energising properties in concentrated digestible form.

BOVRIL prevents that Sinking Feeling

SOME FACTS ABOUT THE

Production and Demand for New Ford Exceeds All Previous Records

The manufacturing schedules of the Ford Motor Company of Canada, Limited, have been steadily built up until a new daily record for Canadian automobile production has been reached.

Despite this peak output, orders for the new Ford keep uniformly ahead of the rising tide of manufacture. It is therefore necessary to continue a high rate of production. To this end a steady flow of material from more than 385 Canadian sources streams into the Ford plants. And here, with more than 10,000 men on the payrolls (almost double the previous employment record) these materials are converted into New Ford cars.

Ford Quality of Manufacture Has Been Strictly Maintained

In the effort to build enough New Ford cars to meet requirements, no deviation from the high standard of Ford precision has been permitted. This standard, unbelievably strict, was set before the car was placed upon the market, and it has since been rigidly adhered to.

In the New Ford Car 40 different steel alloys are used. Each is chosen for the specific use for which it is best adapted. In the transmission gears alone there are seven different kinds of alloys. Likewise, the forged steel spring perches, hardly bigger round than a man's thumb, will withstand a strain of 15,000 pounds. This is 30 times greater than the strain put on them in ordinary use.

The excellence of materials used is matched by the careful precision of its manufacture. For example, the eight valve guides in every engine may deviate from perfection only by 1/30th of the thickness of the average human

The simplicity and soundness of Ford design is unparalleled. Such manufacturing methods ensure a

high degree of satisfactory performance over a long period of

Ford Performance is the New Standard for Judging Automobiles

The rapidity of get-away and acceleration of the New Ford is a by-word. Its endurance, which

permits sustained driving at the higher speeds hour after hour, is little short of marvelous. The ease with which steep hills are climbed in high gear is equally as impressive. Shifting gears, steering and handling the car under the most trying road conditions are exceptionally simple. 25 to 30 miles per gallon of gasoline and remarkably low oil consumption give a worthwhile operating economy.

In city traffic and on country highways, the New Ford performs as well as and often better than considerably heavier and higher priced cars. In the light car field it is absolutely without equal. By these marks of Ford performance

other motor cars are being judged. It simply means that price is no longer the gauge of automobile quality.

Ford Beauty Is More Than Skin Deep

On the surface the New Ford car is all that you want it to be. Beautiful low lines, harmonious color combinations, sparkling nickel, sturdy steel spoked wheels and balloon tires all play their part in making this a car of graceful proportion and handsome appearance.

But its real beauty is invisible. The quality of materials; careful workmanship; correctness of design; the things that really matter-these are the points in which the New Ford is

Windshield of shatterproof glass and a six brake system, fully enclosed, safeguard occupants in any emergency. Four efficient shock absorbers in conjunction with the best proven light car spring system, give matchless riding comfort. All models are completely equipped to provide the ultimate in comfort, convenience and safety.

If you have not ridden in the new Ford car, or experienced the thrill of driving it, there awaits you the knowledge that car values have actually changed; that a really fine car has come into the light car field; and that values offered by the new Ford cannot be duplicated anywhere. Your local Ford dealer will prove these statements by demonstration.
