SWING OF PENDULUM

Thursday, July 19, 1928

The swing of the pendulum has followed its natural course in by the management. spite of strenuous efforts to stop it and the Liberal government at Victoria has been swept from power by the overwhelming vote of the people. In spite of the fact that there was practically a new pre- the King Tut property, which is also mier in office and that they had a splendid record of achievement being developed for Capt. O'Brien, will

as well as a fixed policy for the future, the people decided that they were not required any more at present and have handed them their pass to the opposition benches. There is no mistake about it. The Liberals are beaten and beaten badly and all they can do is to take softened with the result that headway their dismissal with good grace, bowing to the will of the people. Is rapidly being made, the tunnel being It is part of the fortune of political life.

It was rather a regrettable thing that Dr. MacLean was not given a chance to show what he could do at the head of affairs, Mining & Smelting Co. is about to but the decree of the people is final and absolute. Dr. MacLean is

THE NEW GOVERNMENT

Upon Dr. Tolmie will now devolve the task of choosing a cabinet and carrying on the affairs of the administration. It is on deposit in Taccma, earmarked for rather satisfactory to know, following the leader's published manifesto, that the Conservatives will continue the Liberal policies and that there will be no break in the general continuity of the work of government.

Dr. Tolmie is a fine type of man and he should be able to ral interior to examine the Topley choose from those selected to the House a group that will satisfactorily carry on the government. It is early yet to suggest | Hugh Harris, he will also look over who may be in that cabinet although there are several outstanding | Owen Lake properties. men who undoubtedly will be there.

We suggest that every co-operation be given the new govern- Mohawk mine near New Hazelton mapment in its work. The election is over and all party feeling should ped out by Thomas B. Lewis for the be set aside. What the government will need will be support for its Federal Smelting & Refining Co. has work and that is what those who put the country before party will been approved by J. Edward Berg of be prepared to give.

HIS MAJESTY'S LOYAL OPPOSITION

Happily for the good of the country there will be a strong opposition in the new Legislature. Hon. T. D. Pattullo, if elected, Harris, the object being to develop tonwill probably be chosen as leader, as being the senior member of nage enough to warrant the installation that group, although Hon. A. M. Manson is also mentioned in that regard. With such men as Pattullo, Manson, Buckham, Dr. Suther- til this development has been comland and Wrinch to the left of Mr. Speaker, the government will find itself compelled to hew to the narrow path. The province is fortu- produced rich ore on the fifty foot nate in its opposition. On their work depends very largely how well matured and considered the legislation of the next few years goes the better the ore appears. The

ALL FOR BRITISH COLUMBIA

Now that the campaign is over, following a strenuous fight. we suggest to both sides that after all what we are striving for is Mr. Berg and Mr. Lewis also visited to secure the best possible for British Columbia. We all want the the Silver Standard and American Boy province to prosper and if this is to come about, there must be co- properties before proceeding to the operation. Let us work as one man for the advancement of our Lillocet country to inspect other procity and district and make Northern and Central British Columbia a perties. greater factor than ever in the life of the province.

In this the Daily News will do its part. There will be no slackening because the people did not on this occasion vote according to our views. We have great plans for the future and shall at once set about carrying them out so that this section of the province may have the best possible newspaper.

After all, an election is only an incident. It has little to do with the real work that is being done.

AROUND PRINCE RUPERT

Good Ore Strike Made on Topley - Victory Strikes Ore and King Tut Expected to Soon

Good ore has been encountered in diamond drilling at the Topley mine. Several ore shoots with good values in gold and silver are reported to have been struck at depth by No. 2 drill working simply pausing for reflection. to test the east vein. Here the program calls for several holes to be run to a depth of about 300 feet. Location of the values, states the manager, F. H. Taylor, is the most important development since the property was located about two years ago. While good progress with encouraging success has followed work with the second drilling outfit. No. 1 drill has been hampered by adverse conditions. the prairies this year. The mosquitoes This hole has been under way for two work underground is being continued successfully repelled the invaders. Now mining properties in this district, armonths and has reached a depth of 440 with three shifts and the north contact they are singing that patriotic air "We rived from the south last week and feet which is within 100 feet of the tunnel is being pushed steadily forward. won the war." point where ore bodies are expected. At Recently a new body of fine ore was this point, however, difficulties have opened up in this work to greatly in- Peggy Joyce is to marry again for been encountered and it has been crease the average values. contact tunnel is also being driven to tap the rich ore at depth. The outexpected soon.

the long No. 1 tunnel at the Victory mine on Hudson Bay Mountain near Smithers which is being operated by Capt. J. J. O'Brien of Philadelphia. Great enthusiasm prevails as a result of this strike for it is taken to assure the continuity of ore measures not only on the Victory but on several other surrounding properties including the Duthie. Work under the supervision of Frank H. Taylor has been carried out continuously in the extension of No. 1 tunnel and also the No. 2 tunnel at a higher level on the Victory. Recently the No. 2 tunnel was discontinued as being of secondary importance to proving ore in the lower tunnel and to speed up this work a new and complete plant was installed about a month ago. The point where the ore was uncovered is 586 feet from the portal of the tunnel. Work will be continued on tunnel driving in the expectation of tapping a much larger vein about thirty feet ahead. This latter vein is the largest and most important on the property and, should similar sucess attend the effort, a campaign of drifting on the veins will be inaugurated

It is expected that the ore body on be encountered in the very near fuure. Satisfactory progress is being made on the long tunnel being driven to tap the ore and the formation has advanced at the rate of four feet daily.

Indications are that the Consolidated make the final payment of \$100,000 on the bond on the Big Missouri mine at Stewart which falls due on Saturday of this week. It has been frequently mentoined that the \$100,000 is already the final payment to the former own-
