## LEARNING TO SWIM

This is the time of year when every boy and girl should learn to swim. Only two days ago we published a dispatch which told how the men on a steamer on Puget Sound swam ashore from the ship to save themselves when the vessel was afire and exploded. Many people are drowned because they have not learned to swim.

## TOLERATION NECESSARY

Ramsay Macdonald says he hates Bolsheviks but he believes in hecognizing them as a matter of public policy. To do otherwise he thinks is to invite hostility.

That is all very well. Mr. Macdonald knows there was a good reason for Britain breaking off just as there was in Canada. Probably the lesson may prove salutary and it may be desirable again to enter into diplomatic relations with that country if they are prepared to abide by the ordinary rules of courtesy to a friendly country and not plot against our government.

Toleration is desirable but we do not tolerate traitors to the country, even among our own people.

## THE FOREIGN SECRETARY

Sir Austin Chamberlain, the British foreign secretary, and one of the most outstanding men in the British cabinet, is, ill and for a time at least must give up his work. Another man has been appointed to the position.

It is interesting to note that Mr. Chamberlain's father was one of British Liberals until Gladstone introduced his Irish Home Rule bill when he went over to the Union party, which merged later with the Conservatives. For a long time he was known as a Liberal Unionist.

Austin was brought up to statesmanship and early in life entered the House of Commons. He followed his father later as member for Birmingham and soon entered the cabinet. His greatest work has been in connection with the Locarno conference for which he was knighted.

## NO COMPULSION

(Edmonton Bulletin) Premier Hertzog of South Africa has been getting into the press despatches again, by saying something which sounds more like a new discovery than it is. He says South Africa could step out of the British Empire without having to fight for separation from the other members, if its people were unanimous in wanting to do so. There is no doubt about that. So could Great Britain, or any of the other dominions.

Membership in this commonwealth of British nations is no compulsory. This is a voluntary partnership of self-governing peoples, held together by racial instinct, considerations of security, and business sense. If any section really wanted to get out, it could do so without bloodshed. Which is one of the strongest possible reasons why none fo them is at all likely to want to get out.
