Help
To a
Young
Cook

A young woman who has just furnished a home of her own and is "learning to cook," as she writes, has asked us a few things about making different dishes. Our questions are so well to the point we suspect she is not such a novice as she believes. Mrs. D. had heard Pacific Milk had a well she asks us to give exactly the proportions to use when fresh milk is called for. We are more than glad to help young cooks who want to learn to "feed the brutes."

THERE'S A SPLASH... the placid waters of the crystal pool take life as the pebble disappears. First a circle, then two, then six, then twelve, as if by magic the ripples race over the surface of the pool to its furthest edges.

The stone that stirred the pool to life was one of your dollar bills, the pool is British Columbia... B.C. with its industries and natural resources, you, me, and everyone. The ripples are beneficial disturbances set up by your dollar... all the elements of B.C. industry responding to replace that commodity purchased by your dollar.

What is the moral of the stone in the pool? Every dollar you spend for B.C. products helps sustain B.C. labour and all its dependent sources of production and distribution. Your own prosperity is dependent on your purchasing interest in those articles manufactured for you by your fellow men and women. Every man employed earns wages, spends wages, and keeps others employed. Demand the B.C. product! It is an expression of faith in your local industries and pride in the products of your Homeland.
