Purchase Of Trouble Finding Radio Set Is Recommended By Superintendent Of Utilities

Last night at the city council meeting J. J. Little, superintendent of utilities laid before the city council a copy of correspondence and his report on interference with local radio disturbances.

Mr. Little stated that the majority of complaints are the local situation in regard to made when reception is poor due to the fact that the music interference with radio recepever is lower than the noise level. He also says that tion. Sometimes a concert or 'natural disturbances in the atmosphere cause serious dis- speech will be coming in well and turbances to reception. These set up electro-magnetic a party will settle down to an eve-

velogues.

waves which cause sudden clicks, *constant hissing and continuous JACK AND ETHYL rattling noise, something like the tumbling down of a brick wall.

The report says the most annoying interference originates with radio set owners themselves, whose "bloopers" send out an interference within a considerable cial charm, "Jack and Ethyl, the radius of their location. When Motor Mates," will sound their reception is poor these particular horn before the microphone at 9.00 offenders send out cat calls, o'clock tomorrow night and for the squeals and other noises. De- following thirty minutes their fective tubes, connections, loud travels will be dramatized in a speakers and batteries also cause Broadcast. interference.

Mr. Little says that consider- the states of Washington, Oregon ing to eliminate interference from cess. He suggests that a trouble finding set might be purchased at a cost of \$300. A man to operate it would be required and; there would also be battery charges. He suggests that often it would be found that radio sets would be at fault, possibly within the homes of the complainants.

The whole correspondence is KFI Los Angeles. see the singer or speaker. ery interesting and only pressure of space prevents the full report being published. The council laid Mr. Little's report on the table for two weeks.

CLEARING UP

Step Toward Change

There is little change so far in ning's pleasant entertainment, when the buzzing local interference will begin and all the pleasure is gone until the air clears once more.

The general opinion is that the BRIGHT TRAVELOGUE trouble lies with the city utilities but that is not at all sure. What is needed is an instrument to locate the source of the trouble. It is hoped that the new Radio Association will take the matter up and secure early action in regard to it.
