### WORK ON HIGHWAY

The visit of Hon. W. H. Sutherland, minister of public works in the MacLean Government, has made it quite clear that the government is in earnest in its desire to give Prince Rupert connection by road with the interior. The minister while here stated that the road would be continued beyond the bridge, which would be built this year. He also stated that the present road would be much improved over its present condition and next year would probably be surfaced with tarvia.

Roads are today very much in demand and the government apparently realizes this for highways are being constructed all over the province. In the past Prince Rupert has not shared in this work to any large extent but now the work is in hand and will be prosecuted steadily.

### WORK AT DRYDOCK

When times are rather dull here, the pessimists get in their deadly work and suggest all sorts of doleful possibilities. The suggestion that the drydock might be closed, was stopped with a bang Saturday when it was declared by the management that not only would it continue to operate but it was expected the work there would be increased. That is the sort of talk we like to hear. It is what we expect.

### FLIGHT OF WILKINS

It is to be supposed that the flight of Captain George Wilkins has some scientific value, otherwise we would suggest that the man is foolish to take such risks. Later we shall hear more about the observations he made.

Soon there will be no more flights which would tend to bring notoriety to the flyer. The Pacific has to be crossed but owing to the fuel problem it is hardly likely it will be accomplished just yet. To link Canada with the Orient, a lighter-than-air ship will probably be used.

### FORESTS IN DANGER

The people of Canada can hardly realize how fast fire and axe have eaten into Canada's forest resources during the present generation. Forestry experts state that of what was a primeval forest no farther back than 1810, practically untouched by the axe, little more than one-quarter now remains.

In Eastern Canada comparatively little timber of really prime sawmill quality is left and it is stated that 70% of such timber in Canada now stands in British Columbia. In this province also the work of devastation and waste is going on at a much faster rate than the annual growth.

A great area of forest land still remains to the north of the populated parts of most of the provinces, but this forest consists largely of spruce and other woods required for the great pulp and paper industry. This forest of recent years has come to feel full force of the United States demand for newsprint paper. It provides a very big factor in our list of profitable exports, but foresters point out we are cutting and burning at a rate that will exhaust our accessible timber supplies in twenty-five years.

These experts say that with proper regulation as to cutting, reforestation and protection from fire, it is possible for Canada to have her forest industries in perpetuity. Fire has always taken greater toll than the axe. Fire prevention, the forestry men say, is the only salvation.

Forest fire fighting methods are being improved. The aeroplane has been called into requisition to locate fires at their first break and thus prevent fire spreading beyond control. But experience has proved to Canada's cost that fire fighting is not nearly as simple as fire prevention. Every single individual whose business or pleasure takes him or her into the woods, must, while there, be impressed with one idea above all others and that is to prevent forest fire.

EMPIRE SHOPPING WEEK  
April 21 to 28

# SHREDDED WHEAT

Made of the finest Canadian Wheat by Canadian Workmen in our wonderful new Canadian Factory at Niagara Falls. Keep the wheels of Canadian Industries turning.

"Empire Buyers are Empire Builders"

## SCIENTISTS AT WINNIPEG ON WAY TO RUPERT

FAMOUS PARTY TO ARRIVE HERE THIS WEEK TO JOIN SCHOONER MORRISSEY

### SEEK QUEER MUMMIES

Discovery and Collecting is Aim of Expedition of New York Museum

WINNIPEG, April 23.—Bound for the Siberian Arctic Coast to explore new lands and to seek for reputed Mongolian mummies, older than those of the Egyptians but, unlike the latter, mummified by nature in caves, members of the Stoll-McCracken expedition of the American museum of natural history will reach here tonight over the Canadian National Railways, en route to Prince Rupert, from which port they will sail on the good ship Morrisssey, under command of Captain Bob Bartlett of Arctic fame. The party comprises Harold McCracken, leader; Charles E. Stoll, director; Captain Robert A. Bartlett of the Morrisssey; H. E. Anthony, naturalist; Mrs. Merle E. Stoll, still photographer; F. L. Jacques, artist and assistant to Dr. Anthony; Edward M. Weyer, archaeologist and assistant to McCracken; Andrew Johnston, taxidermist and Edward Manley, wireless operator.

With the exception of McCracken, Mr. and Mrs. Stoll and Manley, the members of the expedition are all from the staff of the American museum of natural history.

### MONGOLIAN MUMMIES

The Mongolian mummies which the party will seek, were reported several years ago by the late Dr. William H. Island refused to molest the mummies in existence. It is said that none have been taken from the caves, where they have been lying for possibly thousands of years or since the post-glacial period.

The earliest settlers on the Aleutian Islands, according to Dr. Dall buried their dead in caves and in some of these the atmospheric conditions were such that the bodies were preserved in a natural state. The natives of the islands refused to molest the mummies, there being a tradition fostered by the medicine men of the tribes that any one interfering with them or with their resting places was courting certain death. On one occasion a Swedish fisherman is reported to have taken one of the mummies into his boat with the expressed intention of bringing it to the United States. His boat sailed away and was never again heard from according to the story.

### MUSEUM SPECIMENS

In addition to searching for mummies, the expedition will explore Czar Nicholas II land, an island of unknown extent north of Cape Chelyuska, off the coast of Asiatic Siberia, about 600 miles south of the pole. It will study the economic possibilities of Kamchatka which is rich in timber, coal, gold, lead, zinc and other minerals, but will be chiefly concerned in seeking for the museum specimens of birds and animals of the far north, hardly any of which are found in any museum. These will include Siberian sheep, transitional ruminants between the ovine and the sheep of this country; Siberian grizzlies and moose; sea otters and ribbon seals, which are unique in that they have a band of white across their breasts. Only one specimen of this species has so far been secured and it is not good. In addition, Capt. Bartlett will conduct oceanographic work, dredging and collecting plankton or fish food in the northern waters.

### BOAT FROM SYDNEY

Early in December Captain Bartlett moved the Morrisssey from Sydney, N.S., where she had remained for some time, to New York to be outfitted for the expedition, after which she was sent via the Panama canal to Prince Rupert where the party will board for their expedition trip, which will last for six or seven months.

From Prince Rupert they will sail to Kodiak, Alaska, and thence to Unimak Island on the western end of the Alaska peninsula where grizzlies and bird life are to be found. Thence the party will sail to Kamchatka and up the Siberian coast, then, when weather permits they will go through the Bering Straits to the Arctic coast near the mouth of the Kolima River where they expect to find the Siberian moose and specimens of fresh water fish which are unknown to museums in this country and the United States.

Mr. and Mrs. Stoll and Captain Bartlett are joining the other members of the party at Prince Rupert where the final details of outfitting are now in the hands of Captain Bartlett.

## ASSISTANT ENGINEER OF PUBLIC WORKS TO MOVE TO WESTMINSTER

Transfer to New Westminster for Ernest E. Smith, assistant district engineer for the public works department, who came here from there about a year ago, was announced during the visit here of Hon. Dr. W. H. Sutherland, minister of public works. Mr. Smith will be leaving for the south in about two weeks to take up his new duties. Mr. Smith is already in the south.

Mr. Smith left Saturday night on the Prince John for the Queen Charlottes Islands on official duties.

Alex McRae left this morning for Skeena River cannery points on a brief business trip.

## "ROUGH RIDERS" ROMANTIC YARN

ROOSEVELT TROOPS OF SPANISH AMERICAN WAR GAVE WARTIME FLAVOR TO PICTURE

The much-publicized picture of Teddy Roosevelt and the Spanish-American War certainly lives up to its advance notices. Seeing that these films must crackle with action this celluloid treatment of the hectic days of '98 sets a fast pace and keeps it through the finish. "The Rough Riders" is not so episodic as its title indicates. True its moving moments have to do with the exploits of the famous troop, but the director has enlarged the theme to capture a romantic yarn having to do with a couple of San Juaners and the girl they left behind in San Antonio.

The story is told in simple style and builds directly to its climax. No attempt has been made to paint a halo over the head of Roosevelt. He merely takes his place here as one of the boys, and Frank Hopper, a remarkable double for T. R., does his work without any ostentatious swagger. The picture balances its war scenes with a deal of comedy gags and keeps from waving the flag as a result. The high spots are found in the training camp at San Antonio and in the climb of San Juan Hill.

There is some good pathos and some worthy heroics, noticeable when Charles Farrell carries his rival, Charles Emmett Mack (who, sad to relate, was killed a few days ago in an auto accident) through the enemy lines to a hospital tent. The acting is good.

## "THE WHIP WOMAN" IS TONIGHT'S PICTURE

"The Whip Woman" is a sensational story of Hungary after the war. It deals with a beautiful peasant girl, much sought by men, who repulses them all, only to fall in love with a disolute nobleman. The adventures that befall them both make up a story that holds interest from beginning to end.

Many novel sets were provided as a background and the production is rich in color.

By her clever work as "The Whip Woman," Estelle Taylor will win additional friends, for she has never appeared to better advantage. Joseph C. Boyle directed the picture.

## ALL-COMEDY NIGHT AT THE WESTHOLME

"Adam and Evil" is Comedy-Farce and Two Minor Comedies Follow

Tuesday is an all-comedy night at the Westholme. The main feature picture "Adam and Evil" is a comedy-farce, and there are two minor comedies, which make a whole evening of merriment.

The story, based on the somewhat time-worn theme of twins and mistaken identities, has been treated from a new angle, and a number of unusual twists have made it into a first class vehicle for the talents of these extremely clever players.

Cody has handled the dual role with exceptional ability and Miss Pringle has shown that she has unlimited ability as a comedienne.

## "THE MAGIC FLAME" IS A TALE OF EUROPE

The action of the "Magic Flame" here at the week-end occurs in a Mediterranean country, Barrett's circus furnishing

## No Substitute for "Fruit-a-tives"

It Cleanses, Strengthens and Tones up the System

SOME people buy laxatives casually and then wonder why constipation persists.

Ordinary laxatives merely goad the system into action; then, weakened by harsh treatment, the body lapses into worse condition than ever.

While relieving constipation Fruit-a-tives builds up general health. Made of juices of fresh fruit and tonics, for 24 years it has been aiding people to positively overcome constipation. Try it yourself. 25c and 50c a box.

"My success is in keeping Healthy."

To me YEAST will always be as necessary as water"

GETTING along, and keeping happy at it, depend pretty much on what folks think of me, and how I strike them. And I've learned that that depends largely on my own outlook on people and affairs in general. Clear thinking, rightness of feelings, mood, attitude, and decisions—the sunny-side habit—fitness, energy, poise—they mean everything to me. So I'm one of these HEALTH CUSTOM people, eating yeast three times a day, with every meal, and that means 360 days this year. More than two years since I started. Made some wrong starts the first few days, too. At my yeast last instead of first. Mixed it with other food, or put it on top of the meal. . . . instead of the right way, eating it before or between, sending it ahead to prepare the way, and get all the forces of appetite and digestion at their best. I was missing a lot of the benefits. But I knew what it was doing for other folks. And I kept right on. Found the best way. So much better it amazed me. Stuck to it ever since. No off-and-on about it.

To ever-increasing thousands, their thrice-daily yeast with each meal is a confirmed and matter-of-fact HEALTH CUSTOM, bringing a daily well-being, physical and mental—a serene joy of living—which they will never willingly forego. A Health Custom now as essential to their physical self-respect as their twice-daily brushing of teeth.

Tell your grocer to add your name to his list for regular delivery, three cakes daily for each member of your family.

A very interesting booklet, "Regaining Health," will be sent you, gladly, if you will write to The Fleischmann Co., Dept. 11, 1166 Bullard St., Vancouver, B.C.

THOR JOHNSON

the background against which Vilma Banky and Ronald Colman make love. It is when Colman, the Clown, has triumphed over Colman, the Count, that the locale is switched to the Royal Court with the Clown accepted on all hands as King of Illyria. When Vilma Banky arrives at the court to avenge the murder of her lover, the Clown, she does not suspect the true identity of the monarch. It is with the disengagement of this tense situation that the plot thereafter is concerned.

Gustave von Seyffertitz, who will be remembered as the Grimes of Mary Pickford's "Sparrows," appears in the court sequences as the chancellor Others in the east are Augustino Borgato, who supported Duse on the stage; Harvey Clarke, a descendant of Henry Wadsworth Longfellow; Shirley Palmer, new-est Samuel Goldwyn discovery; Cosmo Kyrie Bellew and George Davis.

## Ten Years Ago in Prince Rupert

APRIL 23, 1918

Principal J. C. Brady of the High School appeared before the city council last night asking for assistance in the matter of securing a rifle range for cadets. The Exhibition Hall has been suggested as a suitable place. It is requested that the building be adequately lighted.

Slides and washouts have been giving continuous trouble on the railway. There have been no trains in for over four days but it is expected one may arrive early tomorrow morning. The trouble is east of Kitwanga just now.

Eighty-five members are now enrolled in the new musical association here. John E. Davey has been elected as conductor and it is expected a recital will soon be given.

## ANNIVERSARY OF PATRON SAINT ENGLAND TODAY

St. George Lived in Third Century and Was Great Champion of Christianity

Today is St. George's Day, dear to the hearts of all Englishmen since it is the anniversary of the tutelary saint of England, adopted by Edward III. St. George is believed to have been a native of Cappadocia and a vigorous champion of Christianity in the days of Diocletian. He suffered martyrdom, according to accounts, at Nicodemus in the year 303 A.D. The dragon, which St. George is said to have slain, symbolizes the powers of evil over which he triumphed.

The Royal Society of St. George plans to observe the occasion fittingly tonight.

Ex-Governor D. W. Davis, head of the D. W. Mines, Ltd., arrived in the city on yesterday afternoon's train from Cedarvale.
