DAILY EDITION

BREEZY MESSAGE FROM INTERIOR

L. B. Warner, editor of the Interior News, brought a breezy message to the board of trade here, a message of cheer and hope and friendship such as we like to get. We are glad to know of the bright prospects of the Bulkley. We feel sure that it will not be long before the country is developed to such an extent that Smithers will be a good city and the other towns will be much more pros- Cantata, "Kings Triumphant." the perous than they are today.

FALL FAIR MEETING

Tonight it should be definitely decided whether the fair is to visiting teams and after a farewell rego ahead this year or not. We feel like Mayor McMordie that it would be a pity to let it drop, but at the same time we must have their home villages on the early tide some enthusiasm in regard to the matter, otherwise it would be foolish to proceed. It would be construed as a sign of weakness if the fair were to be dropped. We should miss the annual visits from suppers from Friday to Monday, and the the people of the district and think it would be best to go ahead. However, it is up to the people of the city and they should be at the meeting tonight to say yes or no to the proposal.

SETBACK TO BAITING BRITISH LION

The game of baiting the British Lion carried on by Mayor Thompson and his myrmidons at Chicago has been amusing to us and humiliating to real Americans. However, they have expressed themselves in no uncertain manner at the primaries in the state of Illinois where nominations have been refused to members of the faction. It is the first step toward eradicating this disease.

RAILWAY SETTLEMENT

It is satisfactory to know there is every likelihood of the P.G.E. Railway question being settled permanently so far as this province is concerned. The minister of public works would hardly mayor? have made the statement unless there was very great likelihood of its being carried out.

It is to be hoped that the Canadian National will get the line, out of other people's business. This is The next best thing would be for the C.P.R. to have it and get run- a hint to Russia. ning rights to Prince Rupert. In any event ratepayers will be glad to get rid of at least part of the burden of the railway, the overhead on which is considerable in addition to the annual loss on operating.

If the C.N.R. gets the P.G.E. it will be possible for Prince Rupert people to use the rail route to Vancouver as an alternative IT has been difficult to the boat. A great many people are always sick on a boat and started this year but now it seems as would be willing to pay a little more for the land route. To go by if she is likely to get away tonight. way of Jasper is too long a distance but by the P.G.E. it would be Only the brave deserve the fair. shortened immensely.

GAIN FOR THE COAST

Sir Henry Thornton in his review of operations stated that the railway lost \$600,000 by the reduction of the grain route to Vancouver and Prince Rupert from the prairies. This means that the coast and the prairie people benefited to that extent. It is probable that as a result the traffic this way will have increased to such an extent that it will make up to the railway for any losses and will make a saving of over a million dollars a year to the people. GATHER TO NUMBER OF THREE HUNDRED AT KINCOLITH FOR FOUR DAY EVENT

ALASKANS WERE THERE PRESBYTERIANS AND SALVATION ARMY JOINED WITH ANGLICANS

FOR EASTER

KINCOLITH, April 12. - The annual gathering of the native Christians of Northern B.C. and Alaska was held his year at Kincolith at the mouth of the Naas River, instead of, as has been the custom hitherto, at Fishery Bay. The Church Army of Kitkatla arrived on Wednesday last led by Captains Brown and Nelson. On Thursday a large delegation representing the Salvation Army came in from Port Simpson and Ketchikan. Staff Capt. Parkinson was in charge. On Friday morning a seine boat came in with about forty members of the Church and Church Army of Massett. Chief Edenshaw and Mr. Adams led the contingent. The Presbyterian Church of New Metlakatla sent .50 a body of clders with their minister, Rev. Edward Marsden.

Church Army of Alyansh, the Salvation there were about three hundred visitors in the village from Good Friday until 25 combined Church Army and Salvation Army. The services in the large parish church of Kincolith were crowded at all services. There were eighty communicants at the celebration of the holy communion at nine o'clock. The choir of Aiyansh led the singing at the morning service and also sang several anthems from Haydyn's "Creation." Capt. Brown of Kitkatla preached in the native tongue and Capt. Paul Mercer of Aiyansh and Bandmaster Calvert Thursday, April 12, 1928 of Ketchikan read the lessons.

At the evening service, when the church was crowded to the doors and many could not get in, Rev. Edward Marsden of the Presbyterian Church of New Metlakatla, preached first in English and then in his native tongue. Herbert Nurchison of New Metlakatla and Alfred Adams of Masset read the lessons. The choir of Greenville led by Con-

ductor Herbert Robinson sang the sacred splendid rendering of which greatly impressed the large congregation. During Monday several games of

football and basketball were played by vival meeting in the Church Army on Monday night, the visitors dispersed to of Tuesday morning.

The ladies of the village entertained all the visitors at public dinners and visitors wished to publicly express their appreciation of the generous hospitality of the people of Kincolith

Man in the Moon

EVERY healthy man who works hates to get up in the morning.

MARRIED men are creatures who second the motion when it is proposed.

THE first step toward preventing wars is to learn to keep your fingers

IT'S easy to forgive most offenses but not that of asking for money loaned

IT'S easy enough to get things on time, except perhaps the repair job.

CHICAGO CONTRACTOR CON

The Telephone is the Voice of the Nation

If one could but listen in he would hear the speech of the market-place, the language of the law-makers, the talk of the home.

If nature's great boon to man is the gift of speech which embodies in it so much of the personality behind it, certainly that of science is the ability to transmit that voice and the accompanying personality over thousands of miles of space.

The four corners of the earth are searched for the materials which contribute to the making of the telephone on one's desk in the office and on one's table at home. Cotton, copper, gold, silk, antimony, lead, rubber and other fibres and minerals are hidden within the modest dress of this indispensable little instrument upon which so many of our skilled workmen are continually employed.

One of the best uses to which electric power in Canada is put is in the daily operation of the more than a million telephone sets, with their accompanying wires and cables, switchboards, and all the rest of the paraphernalia which go to make up Canada's great telephone systems.

Vorthern Electric

Scientifically Designed Efficiently Constructed

With often (through parking) only onethird, of the city streets available for driving on, isn't it vital that you have "three-thirds" tires to drive on? In other words, have tires like Dunlop "Tractions" which are scientifically designed and efficiently constructed to assist you in hand-

ling your car to the best advantage in heavy traffic.
