

Prince Rupert

Northern Pacific Terminus of the Canadian National Railways

Prince Rupert has three of the greatest things in the world

The Largest Fish Cold Storage Plant

The Largest Fresh Halibut Market

The Largest Undeveloped Hinterland

The City of Prince Rupert has a payroll of considerable importance, derived from:

- RAILWAY SHOPS
- RAILWAY OFFICES
- DRYDOCK AND SHIPYARDS
- GRAIN ELEVATOR
- PROVINCIAL GOVERNMENT OFFICES
- COLD STORAGE
- FISH PACKING HOUSES
- FISH MARKET
- OILERY AND FISH REDUCTION PLANT
- SALMON AND HALIBUT FISHERMEN
- SALMON CANNERIES
- LUMBER MILLS
- MINING
- TRAPPING AND FURS

The grain export business of Prince Rupert is steadily developing. Last year about eight million bushels of grain was shipped through the terminal elevator and this year promises to greatly exceed that mark.

The City owns its Power, Light, Water Supply and Telephones.

The schools are excellent.

Roads are paved and concrete sidewalks are being laid.

PRINCE RUPERT IS ONE OF THE COMING COMMERCIAL CENTRES OF THE PACIFIC COAST, THE PROBABLE OUTLET OF THE GREAT PEACE RIVER COUNTRY, AND SURROUNDED BY A RAPIDLY DEVELOPING TERRITORY

Prince Rupert is the logical site of a customs smelter which would serve the mines of Portland Canal, the Bulkley and Skeena Valleys and coast points.

B. C. TELEPHONE PLANS CONNECT NORTHERN B. C. BY RADIO TELEPHONES.

lines after telegraph hours, and we have further plans for improving this service, but still it will not take care of a great number of points which cannot be reached by wire.

The conditions that prevail on the island exist also on the mainland coast, where we find such points as Ocean Falls, Prince Rupert, Anyox, Stewart, etc., incapable of being reached by telephone wires from the south owing to the obstacles which would make the cost prohibitive. Other examples are the Queen Charlotte Islands and the Peace River country. The executives of the B. C. Telephone Company have been watching carefully the development of radio telephony and we believe that it is a branch of the communication art that lies the solution for our problems of serving such communities as I have mentioned.

Our plan is to operate radio telephone service in conjunction with our present wire service so that a party in one point of the province may be able to pick up his telephone receiver, ask for a party in another part of the province and talk to him by a combination wired telephone and radio telephone circuit as is now being done across the Atlantic ocean. This would mean that men in isolated logging camps for instance, would be able to ring up Vancouver business men in their offices and hold conversations with them just as if the calling parties were right in the same city. It is not difficult to imagine what a boon such a service would be.

Another development would be the giving of the same service to coasting vessels plying in B. C. waters.

These are our plans. There are many problems to be solved before we attain success, but we feel that there are no people in a better position to develop a communication service for the outlying points than the men who are at present supplying most of the telephone service in British Columbia. Our project will be carried forward with the co-operation of both the provincial and federal authorities.

Fenwick, Ont.—"I am taking Lydia E. Pinkham's Vegetable Compound during the Change of Life for nervous feelings, loss of appetite and to gain strength. It is a great tonic and I have taken a dozen bottles of it. It was recommended to me by a friend and now I recommend it to all women for such troubles as come 'round' time."
