

# Radio Broadcasting and Reception

Now it is here  
the Radio-Phonograph Combination  
you have always wanted

## MARCONI'S LATEST De Luxe

### Thermion-ic Phonograph and Radio

HERE, for you to see and hear today, is this superb new combination offering 7-Tube Batteryless Radio with electric reproduction of recorded music. Tune in with the single dial to a Broadcast from afar—or play the latest record, as your mood dictates. Experience a new delight—reapture the thrill of a memorable record by the artist in person. Know a realistic "presence" in Radio interpretation.

When you come in today, expect to see and hear something unusual—at such an unusually low price.

ROSE, COWAN & LATTA, LTD.  
Prince Rupert, B.C.

## If You Would Have

Tone Quality that is Perfect; Power with Minimum Interference; Selectivity with Choice of Program; Clarity that is Realism Itself

AN INSTRUMENT that will win your appreciation and the admiration of your friends.

Then you will have

## VICTOR RADIO

Hear VICTOR—of the famous trademark.

McRAE BROS. LTD.

### TEX RICKARD GIVEN REWARD BY LISTENERS

Contributions ranging from fifty cents to two dollars were received by Tex Rickard as expressions of thanks from members of the radio audience for making possible the broadcasting of the Tunney-Haney fight. Rickard, upon receipt of these donations, expressed the opinion that they were evidence that the broadcasting companies have been receiving something good for practical nothing for a long time.

### CONDITIONS HAVE NOT YET IMPROVED IN RADIO RECEPTION IN THE CITY

Complaints still come in to the effect that there is no improvement in radio reception in the city, especially in the downtown section. There is a rumbling roar which it is thought comes from the city electric system but this is not at all certain. What is needed is an instrument to check up on the trouble, locate it and then eradicate it.

## No Aerial Needed Philco Electric Radio "Neutrodyne-plus"

Thanks to Philco's "super power" it brings in distant stations as well as near by ones without any adjustment whatsoever and with no strain on the tubes.

### Batt and Kinslor Radio Work In Connection With Stoll-McCracken And Other Long Distance Sending

The only effective amateur broadcasting station in Northern British Columbia is that operated by two young men, Felix Batt and Norman Kinslor, of Prince Rupert. There is nothing contentious about it but it reaches its objective as was made clear recently by the fact that Station VE5GT was the only station that kept almost continuously in touch with the Exploration Schooner *Morrissey*, carrying to the Arctic and back the Stoll-McCracken expedition which found at the Aleutian Islands some excellent examples of early Indian mummies which are supposed to have an important bearing on the solution of the question of how and when the first people came to the American continent from Asia.

Pete is the acknowledged head best man of the firm of the two but he discloses the fact stating that Norman does just as important work as he and that when any important new work is to be done Elmer is the man who does it.

The other day I paid a visit to Station VE5GT. It is located in a little shack built by the lads on the back of the Kinsler lot. The place is up to no good."

The young radio fans were much amused one evening when they received an account of the manner in which the Eskimos received "Tough," the English bulldog that was with the McCracken party. They thought he must have had his nose frozen badly during a cold snap and lost it. Never had they seen a dog of that description before. One Eskimo told another and they all came running to see the wonderful dog.

Another interesting message was that in which was told how most of the Eskimos at Diomede Island in Behring Strait had Irish names, one being named Murphy, another Kelly, and a third O'Neilley. It seemed that the early whalers had taken them to help them in the whaling expeditions and had given these nicknames which they had ever since adopted and of which they were very proud.

Ed. Manley was the radio man aboard the *Morrissey* and the lads declare he is "white all through," one of the finest men they have ever met. He left the *Morrissey* at Prince Rupert and returned to New York by train.

**Long Distance Work**  
Communicating with the *Morrissey* was the most interesting work ever done by 5GT but the farthest away message they have sent was to Tasmania, approximately 7,500 miles away. They also communicated at different times with Australia, Hawaii, Tahiti, and Moscow. They had cards from these and dozens of other places confirming the fact that they have communicated. They say it is easier to talk to Tasmania than to New York although one is three times as far away as the other.

Both Batt and Kinslor are members of the American Radio Relay League. They are strictly amateurs making no charge for their services. There was until last summer a third lad in the partnership, Clarence Insulander who is now at the Tri-state college of engineering at Angola, Indiana. They get radio messages from him occasionally, only recently one having been sent to them from him by way of the New York Times transmitting station. What is interesting is that these young men are able to make real success of a useful hobby which may have a distinct bearing on their future careers.

The work of communicating with the expedition may seem to be a simple thing to those who simply twist a dial and listen in, but to get messages from the Arctic required patience, persistence and often long waiting. Just as a communication was commenced some kind of interference would begin. Sometimes it was static or it was rolling of the ship, noise aboard the vessel, the interference of the Digby station or keeps them up to the minute.

A radio can make in close touch with the outside world and some squeaking single tube set of a neighbor. It was not uncommon for daylight to come creeping in through the chinks of the house.

There is no fear of becoming moshack if you have a radio in the house.

### RADIO PROGRAM FOR THE WEEK

Tuesday October 23  
8:30 p.m.—Emergency Programs: KHQ, KOMO, KGW, KGO, KPO, KFL  
8:30 p.m.—Amaize's Gitanee: KHQ, KOMO, KGW, KGO, KPO, KFL  
9:00 p.m.—Longines Correct Time: KHQ, KOMO, KGW, KGO, KPO.  
10:00 p.m.—The Trocaderans: KOMO, KGW, KPO 10:30 to 11:30; KPO 10:30 to 12:30.

broadcast to all pupils of all of a certain grade. Educational What singing joys come in work of this nature has been carried on for England for several years. More than 4000 schools in London and Daventry are equipped to receive programs radiated through the British Broadcasting network.

#### RADIO

Along the trackless air, in harmonies serene and To charm away our time, the radio's rare magic wing. New beauty to the day As on its swift and winged wings, it cheers once-lonely night.

Yet sweeter than the wail of song, in tender melodies It is to know that no throng A thousand harmonies.

Through all the silent hours This marvel lay unguessed But in it now man faithfully Enfolding love expressed.

Many people are asking Prince Rupert should be the important place on the map where there is bad interference with radio reception.

This manless station, one of the largest in the world to be operated without a single attendant, will be controlled from another station more than three miles away. The distant operator can close or open any switch, placing in service the various transformers and circuits in the new station, simply by pressing keys which send over wires electric impulses of the dot and dash system used in telegraphy. Also he will receive automatic signals from the station, which will inform him whether the equipment is functioning properly.

It will be necessary for human beings to visit the station only once a week to inspect the apparatus.
