ANOTHER MESSAGE TO THE MAN WHO DOES NOT OWN A CAR

"If I'd known how easy it was -I'd have owned a car long ago"

THE man or woman who would not *like* to own a car is rarely met.

Yet large numbers of people are going without cars simply because they do not realize how very easy car-ownership really is.

There is no need to wait till you have the price of a new car. A good used car offers you just as much comfort, just as much convenience, just as quick and satisfying transportation and at far less cost; because the original owner has stood the first depreciation.

Come in and look over our fine selection of GOOD used cars, remembering that you can buy here with every confidence of satisfaction. The buyer of a used car receives the same consideration here as the buyer of a new car. His goodwill is just as valuable to us. His satisfaction is of just as great interest.

See the Cars . . check up their prices . . figure their low cost-per-mile of transportation. Then you'll say, with scores of delighted used-car owners, "If I'd known how easy it was, I'd have owned a car long ago." UC-22-9-28C

The G.M.A.C. Plan affords the most convenient and economical way of buying out of income.

INAUGURATION OF THE FIRST AEROPLANE SHIP-TO-SHORE SERVICE: The French line started its ship-to-shore aeroplane service when an Amphibian plane, carrying mail from France, was catapulted from the upper deck of the westbound Ile de France, about 450 miles from the American coast, and got to shore in about four hours.

FLORAL FOSSIL GROWTH FOUND

Paul Tickoles Makes Interesting Discoveries in Sand Rock of Hudson Bay Mountain

Paul Tickoles, who has been prospecting in various sections of the central interior for the past few years, has discovered some highly interesting fossil of the plant life of this part of the province when the world was young. The fossil are contained in sand rock taken from the formation of the Hudson Bay Mountain, in the vicinity of Smithers. The discovery came accidentally with the splitting of a piece of rock which disclosed the outline of the leaf of what appeared to be a tropical leaf, the coloration of which on the sand rock was very marked. This led to the splitting of other pieces of rock and added upwards of a dozen speciments of plant life fossil. The majority of the leaves appear to have come from tropical palms which would indicate that ages ago this section of British Columbia enjoyed a very different climate from that which obtains today.

Another discovery which Tickoles has made and which has greater interest for him is a secretion of a grease which occurs in a fracture of rock. The rock appears to be impregnated with grease which also makes up the filling of the fracture. The grease has the appearance of an ointment and Tickoles intends to have an analysis made of it to determine whether it posseses and commercial possibilities.
