KELLOGG PEACE PACT

It seems a pity that the United States senate could not is littered with wrecks of get have passed the Kellogg peace pact unanimously. The rich quick schemes. treaty originated in the United States and was the work of the Republican party and it remained for a Republican to be the only one to oppose it when it came to a vote.

The treaty may not be very binding on the nations that have signed it and especially upon the American government that originated it, but it does crystallize public opin- friends of the culprit to know ion in most important countries today. Public opinion that he intended to pay the is coming to be strongly against war and in favor of all ef- money back. forts that make for peace.

BUILDING CRUISERS

In order to let the world know that the building of more large cruisers was not to be considered as a menace to peace, the United States yesterday commenced consid-living room. eration of the bill providing for increasing the navy, immediately after it had disposed of the treaty. Scoffers Some fooish people spend too will treat the whole matter as somewhat of a farce, believing that the increase of the American navy as a war- people moralize about it. like move more than offsets the peace pact.

ONE OF THREE PORTS

President Beatty is credited with having said that Prince Rupert is one of three possible outlets for the Peace River country. The other two are Stewart and not use automobiles. There are Vancouver. To get to Vancouver the C.P.R. would link up with the main line at Ashcroft or Lytton.

It is quite probable that the C.P.R. may take either of the proposed routes, but which one it will be they certainly will not announce until they are ready. The whole situation will be considered carefully before any definite move is made and no preliminary announcements are probable. During the waiting time it might be well for Prince Rupert to keep up the agitation in favor or their port. Stewart and Vancouver will undoubtedly do the same.

POLICEMAN: "'Ere, they said as 'ow you was murderin' a bloke called Schubert up 'ere."-Isis, Oxford.

HE WINS A THRONE

After years of battling in the courts, Rajagopala Toniaman (above), six, grandson of the younger sister of the late Rajah of Pudokotah, has been declared the logical successor to that ruler. His administration will be carried on by a regency until he comes of age.

Man in the Moon

If we only kept some of our oil stocks and mining stocks long enough the certificates might fetch tidy sums as antiques.

The road to the old man's home

If this hatless craze keeps up, there should be a good demand pretty soon for wigs.

How much better it is to rent a house than to own a home. In your home you cannot very well bruise the woodwork, scratch the plaster, drive nails into the walls or wear hob nailed shoes in the

EMBARRASSING MOMENTS

DRITISH Columbia's Power resources are the envy of the world. With Power, the riches of the world can be won; with Power, ores can be mined . . . smelted; transportation problems solved; manufacturing industries developed, and with them population . . . pay-rolls. Power is British Columbia's strongest bid for more industries ... more people.

Of the millions of horsepower available in our province, but half a million are now harnessed to turn the wheels of industry. The great hydro-electric development at Bridge River will ultimately generate more than 600,000 horsepower, while the output at Bonnington Falls and other points is being steadily increased. The Campbell and Chilko Rivers, on the mainland, and the Nimpkish on Vancouver Island, are capable of tremendous power development for the conversion of our forest and mineral resources into fabulous wealth.

Two of British Columbia's Electric Power systems are among the greatest in Canada, each generating more than 400,000,000 kilowatt hours in 1927. This represents an increase in the last ten years of 98% ... truly a remarkable achievement!

Foreign authorities speak of this record as a measure of the great vitality of British Columbia.

Today we rank third in power and industrial development among Canadian provinces. We have made greater progress per capita than any!

It is the policy of British Columbia to foster the development of the hydro-electric powers for the benefit of the public. They are allotted to private enterprises on condition that they will be developed within a certain time, so that no exploitation of public assets may take place.

Millions of dellars are now earmarked for Power development in our province. Dams are being built, turbines installed . . . transmission lines erected to care for the imminent industrial development.

Thousands of dollars are being expended weekly on materials and wages; thousands are feeling the immediate beneats of this enterprise.

Side by side with our power development, Industrial Expansion has kept pace. Today 17% of Canada's external trade is handled by British Columbia. During the past decade, our basic industries have increased 101.3% Our total payroll, including all classes, is estimated at 210 million dollars. Today, our Lumbering, Mining and Fishing industries employ 72,517 people, paying them 175 million dollars in wages . . . distributing an average wage ranking among the highest in Canada.

These 175 millions in wages are a great contribution to our annual internal trade in the province. They have given our industrial workers a buying power ranking second in the Dominion and have largely been responsible for our ever increasing prosperity, as evidenced by the fact that the number of automobiles registered in the province last year was 76,187 as compared with 8,596

British Columbia's steady and varied industrial development has changed the conception in Eastern Canada and the United States of our province. No longer are we entirely dependent on the East for our manufactured products. British Columbia is increasingly furnishing her own needs. She now ranks third in the whole Dominion as a manufacturing province.

Our phenomenal Power and Industrial growth has focused the attention of the great industrialists and investors on our province. Today, British Columbia in the eyes of the world, stands for Power, Progress and Plenty, May our efforts of the next ten years stabilize and increase our Prosperity!

Read these announcements and understand your province's progress . . . clip them out and send them to friends. If you desire extra copies of these announcements a note to this newspaper will bring them. Advertise your Province!
