BRITAIN'S WONDER UNDERGROUND STATION

By switching on an electric light the Mayor of Westminster, London, set in motion for the rublic of the British Capital the most modern and the largest und rground station in the work This new station at Piccadilly Circus, which is a marvel of engineering and architectural constructions ion, has taken almost four years to finish, and it has cost more than \$2,000,000. Descending to a depth of more than two hundred feet, this vast underground station can handle approximate 142,000 passengers a day. Above is an architect's drawing showing the various workings of the new station.
