> Some signs of this were seen in the debasing of the English language so very noticeable in the States and to some degree in Canada. Older countries realized the importance of their heritage of language and were slow to mutilate it. Shoddy language and produced a poor type of education, a great conceit and state of unteachableness.

grade movement.

New Outlook

The new outlook was progressive and its high ideals of life was based on recognitions of the value of personality. Education was a process of teaching to live not merely to earn a living; to live richly, rather than to be rich. It emphasized the person of the child, not merely its brain. It aimed at giving the pupil a thirst for knowledge, a keener sensibility to what was great and good. Less stress was laid on the value of the examination though there was no conflict between character developing and brain developing. It insisted that a starved heart was poor company for life. The teacher strove to get behind the mind of the pupil and find the pupil himself. The teacher who could do so was

of rare value. The speaker felt that there was a great advance in modern education in the changed relationship between the teacher and the pupil. There was no longer a feeling of fear on the part of the pupil. With the removal of
