FISHER BODY STYLE AND VALUE STANDARD OF THE WORLD

the state of the state of the BY DOLLAR MEASUREMENT

CARS WITH BODY BY FISHER ARE WORTH MUCH MORE

Fisher Body confers upon any car a value far beyond anything offered in comparison.

The actual dollars and cents measurement of this greater value varies, of course, with the cost of the car, but it is always impressively large in proportion to that cost.

In the case of McLaughlin-Buick, it amounts to several

hundred dollars in concrete, tangible return for the money invested. You can see this greater value in the richness and

the fittings, the seating luxury and the coachwork in general.

CANADA, LIMITED

As a matter of fact, the McLaughlin-Buick, in point of body luxury and value, takes rank with the high-

est priced cars outside the General Motors Group. Comparison also places the other General Motors cars relatively as

respective fields. Only General Motors and Fisher combine the manufacturing elements necessary to such unprecedented value in a motor car body.

Fully to realize the superiority in every phase of Fisher Body, compare the Fisher Body cars listed below in any price field, with any other car in that field. Only then will you be in a position to judge motor car values. Fisher Body value is so evident that it is at once apparent-but it becomes even more impressive upon point-by-point comparison. Make such comparisuperior quality of GENERAL MOTORS OF far ahead of their sons at your first opportunity.
