VANCOUVER IS BUSY

Vancouver has organized an "On to the Peace" com- arithmetic be taught and well by Mrs. S. G. Lawrence, local mittee with the object of securing the early construction indicated, were but tools to be of the railway into the Peace River country. Premier Tolmie has declared in favor of extending the P.G.E. into the Peace River country. The forces in the south are strong and it will take all the fighting force of Prince Rupert to bring the line to a point where it will best serve this port and the farmers of the Peace River country. It looks as if the big club is to be wielded to force the building of the line to the big port.

While it is possible that we may lose, we shall blame religion. The subject was so wide at Bitter Creek, Rev. C. J. Lee ofourselves if we do not put up the best fight we know how. Alderman Collart is making a splendid leader and it is up branch and a general acquainto the rest of us to back him to the limit.

NEVER GIVE UP

The finding of the McAlpine party in the Arctic after being lost for over two months shows that it is not wise ever to give up. There is always hope as long as there is life. We are glad to know that these intrepid adventurers are alive and well.

The lesson this conveys to the people of Prince Rupert is that there is always hope. We want that Peace River railway and there is every hope that it will come this way. ability to sketch the animals. Too At any rate, it would be foolish to abandon hope unless we are satisfied we have lost. If we keep a stiff upper lip and refuse to be beaten we shall probably win.

RIDEOUT'S ILLUSTRATION

The illustration given in yesterday's paper by Page Rideout of Peace River is one to be remembered. We repeat it here in case any person did not read it or in case it did not sufficinetly impress them:

"The last time the river steamer arrived here from B. C. points she carried some 7000 bushels of wheat grown in the wheat fields of the Peace River block in B. C. 580 miles east of Prince Rupert. When the boat landed at the eleva- and Mr. Gee. tor at the waterfront the wheat was 290 miles still farther away from its own port of Prince Rupert. Here it was put hope, Miss Grassie, Miss Lamb, claims, on Lime Creek across the through the elevator and loaded on six cars and shipped to Edmonton for the long haul. But the wheat on arrival in Edmonton is 315 miles still farther away from Prince Rupert, the natural port of the country."

ALL SEE POSSIBILITIES

There is no doubt that Prince Rupert is being spoken of throughout the country as at least a possible outlet for the Peace River grain. The people of the Peace country want their grain to come here because they feel they will get a better price for their product if it goes out by the Rupert East Straw Vote Gives Him nearest and best outlet. That is why they look across and visualize the time when it will be rolling westward to the Pacific and on to the Orient. Even the financial papers of the east are mentioning this port and we are at any rate getting our share of advertising from the campaign being carried on here.

sociation on Nature Study. He em- manent. phasized the importance of this very extensive subject. It was the taught, yet these, as their name nurse, both of grown-ups and children. tially covered by insurance. Nature was the revelation of the work of creation and the study of a specialized knowledge of tance with other branches.

Mr. Pullen then went on to deal with one branch, that of bird life. To illustrate his talk the speaker had a fine series of nature photographs taken by himself and prepared as slides. These proved to be of rare interest to his listeners and gave much information and not a little humorous insight into

the ways of birds. The ability to photograph aniwas of great value to the nature often the lighting and difficulty of focussing made photography impossible while the sketche could make a valuable drawing of the situation. Coupled with were many interesting descriptive

A very hearty vote of thanks was accorded the speaker for his talk. It was fully realized that the successful photographing of birds had entailed enormous expenditure of patience and the teachers were not slow to recognize this.

Refreshments were then served
