(Continued From Page 1) Upon another country for its ne- cessities instead of being self- reliant as it, should be. And it was all because the present govern- ment had been reducing the tariff. It was a Liberal boast that Caada had been the only country in the world to reduce its tariff since the war. Was it possible that the policy of this small min- ority could be right and that the rest of the world was wrong? Mr. Bennett scoffed at the trade treaties that had been brought into effect by the Liberal government. The effect of these, he declared, was that Caada

ada's exports, which, indeed, had fallen off since the agreements, had been signed.

Exporting Capital Not only was Canada exporting its raw resources, but now it was exporting capital and was sending its men and women away to work on the Dominion's raw products in .

It was just to protest against

such unfair competition by using tariffs, drawbacks or the like. We would just as soon as we had a majority in parliament vote for and pass laws that would give Canadians fair competition in their own country with the rest of the world. We would not necessarily impose a high tariff, but a pro-

so often becomes contaminated, with results that are seen in rapid souring, infantile diarrhoea and the like.

The present glass bottles are open to many objections. They are used over and over again, and although the best dairymen take every precaution to sterilize them before they are filled, the consumer has no guarantee that they are sufficiently well sterilized. When it is remembered that germs breed in milk more napidly than they do in almost

EXCHANGE COAL FOR WHEAT

The suggestion has been made in London that Canada might be willing to exchange her wheat for British coal, and that the minister of unemployment there might discuss the proposal on his arrival in Canada.

Proposals of this kind are hardly reasonable. There is of the Dominion were determined plenty of market for Canadian wheat. Coal is different. not to put up longer with such structing the trans - Atlantic While there is a shortage of Canadian coal in Ontario. promises and temporizing as they the British coal would be used there if it could be used to be used there if it could be used to be used there if it could be used there if it could be used to be used there if it could be used to be used the British coal would be used there if it could be sold at government. IMPORTANT C.N.R. CHANGES

The appointment of a vice-president in charge of the Western Region of the Canadian National Railways, with headquarters in Winnipeg, was the outstanding feature of a number of important changes in the operating department personnel of the company announced to take place on August 1st. Three of the chief officers concerned are shown in the photographs. In the centre is A. E. Warren, formerly

General Manager of the Central Region, who becomes Vice-President of the Western Region. On the right is W. A. Kingsland, formerly General Manager of the Western Region, who becomes General Manager of the Central Region, and on the left is A. A. Tisdale, formerly assistant to the General Manager of the Western Region, who becomes General Manager.
