Seattle Airplane Makes First Non-Stop Flight Juneau, Ala., Yesterday

Flight of About 940 Miles Made in Seven Hours 48 Minutes, or Average of About Two Miles a Minute Throughtout

JUNEAU, Alaska, April 16.—Pilot C. Eckmann brought his Seattle plane down here at 2:48 yesterday afternoon five minutes after arrival over the city, completing a non-stop flight from Seattle in seven hours 48 minutes. The plane, a Lockhead Vega, with an average cruising speed of 135 miles an hour, averaged on the 940-mile flight approximately two miles a minute. The party, consisting of Pilot Eckmann, Navigator Robert E. Ellis and Mechanic Jack Halleron, left Bryn Mawr aviation field at 7 a.m. and met with bad winds, fog and rainstorms which caused some delay. The flight followed the usual ships' course, the birdmen going slightly out of their way to circle around Prince Rupert and other centres, where the pilot and navigator wished to examine from the air possible landing sites.

The plane will be used in making surveys and also for patrol purposes in these waters.

Kingsford Smith was represented as most touched that Anderson started so that the huge British airship R-100 quickly to search for him.

UNIVERSITY PRESIDENT UNDERGOES OPERATION

Limited Tariff Revision is Urged and Reorganization of Federal Tariff Commission

WASHINGTON, April 16. — President Hoover in a message of unusual brevity and directness recommended to Congress today the creation of a federal farm board with authority and resources to remedy the recurring causes of depression in the agricultural industry. He also recommended limited revision of the tariff with reorganization of the tariff commission.

In the matter of the tariff revision, the president declared the test in the main was whether there had been a substantial slackening of activity in an industry during the past few years and a consequent increase of unemployment due to insurmountable competition in products of that industry.

The president emphasized that no discrimination against any foreign power was involved in equalizing the different costs of production at home and abroad and told Minister of education in the Congress that in determining changes in the tariff ac-Tolmie administration who is to count must be taken of the broad interests of the country as a whole, adding that such interests include American trade relations with other countries.

The president asserted that seven years experience had proved the principal of flexible tariffs to be practical, but TO MAKE TOUR that the basis for administrative changes in rates of duty should be made more automatic and more comprehensive, to the end that the time required for determination by the commission be greatly shortened.

TAKES OVER GEORGE COPPER **AT STEWART**

Consolidated Moves Head Office to Trail and Appoints Directors

VICTORIA, April 16:-The Consolidated Mining and Smelting Company at the annual meeting of the George Gold, Copper Company here yesterday removed all the directors of the company with the exception of W. B. George and P. M. Linklater and replaced them with Consolidated officials.

The company ordered the George Company head office closed and removed to Trail where it is to be merged with the head office of the Consolidated, which assumes full control of the George subsid-
