BEAUTIFUL INDIAN HOUSE OF PARLIAMENT ENDANGERED BY BOMBS

When a number of fanatics got into the new House of Parliament at Delhi, India, recently, and flung bombs during a debate of the Legislative Assembly, five members were injured and the noble structure, just completed, was in serious danger of demolition. The timely intervention of the British military authorities prevented a tragedy. The above picture shows the magnificent building as it is seen from the air.

FISHER BODY STYLE AND VALUE STANDARD OF THE WORLD

Additional Valle P REU VIERUE CER can give

Fisher Body gives General Motors cars additional value no other cars can give. No other cars can put this several hundred dollars worth of additional value into their bodies because no one else has Fisher advantages or Fisher resources.

Everyone can measure this greater dollars and cents value in a minute because they can see it with their own eyes. The advantages Fisher has over others are shown in finer finish than the others can afford-finer hardware and interior fitments than they can afford-finer upholstery than they can

afford-finer and stauncher structural work than they can afford. Because they have not Fisher advantages and resources, others have to skimp on the inside and the outside of their bodies in order to hold down the price.

Whether you are chiefly interested in only two or three body features, or in body quality as a whole, you should by all means compare the Fisher Body car in the price field in which you are interested, with any or every other car in that field. Only then can you base your decision upon intimate knowledge of the facts.

RESCUE SCENES AT SCHOOL DISASTER

Left shows some of the 52 children injured when a tornado caused the collapse of the school at Red Cove, Va., being placed on the train to rush them outside for medical treatment. Some of the little tots are shown (upper right) being carried from the ruins on stretchers by many of the willing volunteers who rushed to their aid. One of the remarkable stories told by the survivors is illustrated below (right). Principal A. S. Noblin of the school, was outside the building and saw the wind approaching. He was picked up bodily and hurled 75 feet into the pond shown in the foreground. The ruins of the school can be seen in the rear of the pond.
