federal government to publish as early as possible the report of Dr. Kerr who recently examined the field. It is believed that publication of the report would result in the movement of many prospectors into the district and possibly the discovery of extremely valuable properties. The district referred to lies between the Stikin and Iskut Rivers and Dr. Kerr states that there are extensive ore bodies there carrying high values in gold, silver, copper and zinc. Only a few prospectors have so far examined the district, the possibilities of which have only been explored in a preliminary way. Such investigations as have been made, however, have convinced the federal expert and his associates that the province has on the Stikine a mining field of large extent and high values, ranking with the best in Western Canada. The Stikine country is not so difficult of access as is generally supposed states Dr. Kerr whose report will stress the fact that the country may be entered by way of Telegraph Creek and thence south over land to the mineralized zone. This lode zone, it is said, would surpass in importance the placer district in the same vicinity.

RITISH Columbia's Power resources are the envy of the world. With Power, the riches of the world can be won; with Power, ores can be mined . . . smelted; transportation problems solved; manufacturing industries developed, and with them population . . . pay-rolls. Power is British Columbia's strongest bid for more industries ... more people.

Of the millions of horsepower available in our province, but half a million are now harnessed to turn the wheels of industry. The great hydro-electric development at Bridge River will ultimately generate more than 600,000 horsepower, while the output at Bonnington Falls and other points is being steadily increased. The Campbell and Chilko Rivers, on the mainland, and the Nimpkish on Vancouver Island, are capable of tremendous power development for the conversion of our forest and mineral resources into fabulous wealth.

'Two of British Columbia's Electric Power systems

Thousands of dollars are being expended weekly on materials and wages; thousands are feeling the immediate benefits of this enterprise.

Side by side with our power development, Industrial Expansion has kept pace. Today 17% of Canada's external trade is handled by British Columbia. During the past decade, our basic industries have increased 101.3%. Our total payroll, including all classes, is estimated at 210 million dollars. Today, our Lumbering, Mining and Fishing industries employ 72,517 people, paying them 175 million dollars in wages . . . distributing an average wage ranking among the highest in Canada.

A NEW horizon opens out before the man A with money. With \$1,000 saved you can look to the future with confidence-start one of these easy savings plans now :--

> \$1,000 in 4 years-costs \$940.16 in weekly payments of \$4.52. \$1,000 in 3 years-costs \$956.28 in weekly payments of \$6.13.

\$1,000 in 2 years—costs \$970.32 in weekly payments of \$9.33.

are among the greatest in Canada, each generating more than 400,000,000 kilowatt hours in 1927. This represents an increase in the last ten years of 98% truly a remarkable achievement!

Foreign authorities speak of this record as a measure of the great vitality of British Columbia.

Today we rank third in power and industrial development among Canadian provinces. We have made greater progress per capita than any!

It is the policy of British Columbia to foster the development of the hydro-electric powers for the benefit of the public. They are allotted to private enterprises on condition that they will be developed within a certain time, so that no exploitation of public assets may take place.

Millions of dollars are now earmarked for Power development in our province. Dams are being built, turbines installed . . . transmission lines erected to care for the imminent industrial development.

> Read these announcements and understand your province's] progress . . . clip them out and send them to friends. If you desire extra copies of these announcements a note to this newspaper will bring them. Advertise your Province!

BRITISH COLUMBIA'S PROGRESS

These 175 millions in wages are a great contribution to our annual internal trade in the province. They have given our industrial workers a buying power ranking second in the Dominion and have largely been responsible for our ever increasing prosperity, as evidenced by the fact that the number of automobiles registered in the province last year was 76,187 as compared with 8,596 in 1916.

British Columbia's steady and varied industrial development has changed the conception in Eastern Canada and the United States of our province. No longer are we entirely dependent on the East for our manufactured products. British Columbia is increasingly furnishing her own needs. She now ranks third in the whole Dominion as a manufacturing province.

Our phenomenal Power and Industrial growth has focused the attention of the great industrialists and investors on our province. Today, British Columbia in the eyes of the world, stands for Power, Progress and Plenty. May our efforts of the next ten years stabilize and increase our Prosperity!
