### VERY FINEST FOR HOLIDAY

Mrs. Rajout Has Opened Her New Farm Home at Tiel With 14 Rooms

The holiday season is here and many people are looking for a place at which to spend a real holiday. Here is a suggestion. Mrs. Rajout has just opened a new farm home at Tiel on Queen Charlotte Islands, and is prepared to receive summer boarders.

The new home is situated in the midst of a 200-acre farm of open park-like natural meadow decorated with clumps of trees. It faces on the straits at one side and the Tiel River on the other. In one trout fishing is excellent, and salmon trolling is the sport in the other.

For children the place is ideal because there are huge sand drifts on the shore. The food is wholesome and there is an abundant supply of milk and cream supplied from the farm cows. River and sea bathing may be enjoyed.

A few Prince Rupert people have been in the habit of holidaying at the Rajout Farm but the accommodation was limited. Now all that is changed. A fine new building has been erected and all is in readiness for the visitors.

passing through water in which there is drifting ice, and it not only gives heat but light which penetrates fog so that photographs can be taken showing if there are any drifting icebergs in the path of a ship. The other ice-fighting weapon, solite, is a substance with which ice is melted and exploded, and it is the only agent known that will cause ice to explode.

### HONEYMOONERS ON COAST STEAMSHIPS AND AT JASPER PARK

JASPER, June 20.—Coming as it does in June, the inauguration of the summer Alaska service is great allure to honeymooners, according to Robert Creelman, passenger traffic manager of the Canadian National Railways, who was in Jasper last night on his way back to Winnipeg after enjoying the first trip of the season in the Canadian National Steamships service from Vancouver to Skagway. There were no less than eight honeymoon couples on board, he said. Three of them came to Jasper and were added to the four already here.

Passenger traffic to Alaska would be very heavy this summer, Mr. Creelman said, the list of the first sailing was a good indication. The interest of Callaghan in the more northern ports of their coast was growing by leaps and bounds every year. Many of them took a round-trip from Prince Rupert to Jasper and down to Vancouver by train.

### URGES EDUCATION IN HOME ECONOMIES FOR GIRLS OF COUNTRY

SASKATOON, June 20.—Recommendations that the organization's work of surveying home economics education in Canada be carried on until finished was recommended in the report of the Committee of Household Economics by Mrs. T. L. Guild, national convener, to the Federated Women's Institutes of Canada here today. She also urged that more opportunities to study economics be given girls in rural sections.

Prince Edward Island branches had asked for a more serious attitude toward the daily round within the house, toward the responsibility of community work and developing the aesthetic side of home-making through music, pictures and literature.

Ontario, Nova Scotia, New Brunswick, Manitoba and Alberta had sponsored extensive short courses in all branches of economics. Alberta had provided scholarships for girls attending agricultural colleges. Saskatchewan also offered a scholarship for the highest standing in home economics upon graduating from the University. The Farm Girls' Camp at the University, the summer five-weeks short courses for farmers' daughters at the University were all to the credit of Saskatchewan. British Columbia had completed its survey on the home economics education of that province.

Michigan has by far the greatest east line of any state.

### TRYING TO START THINGS

There is a little story told in one of the Alberta newspapers about four people passing a closed factory and three of them commented on the waste of money. Then the fourth spoke up and remarked that at any rate somebody had tried to start something, which was more than the rest of them had done. There was a long silence.

If we might be excused for doing so, we might ask Prince Rupert people individually if they have ever tried to start anything. Some have done so and have failed; others have done so and have succeeded. To make the effort is worth while even if three out of four of the remainder of the community stand aside and make caustic remarks.

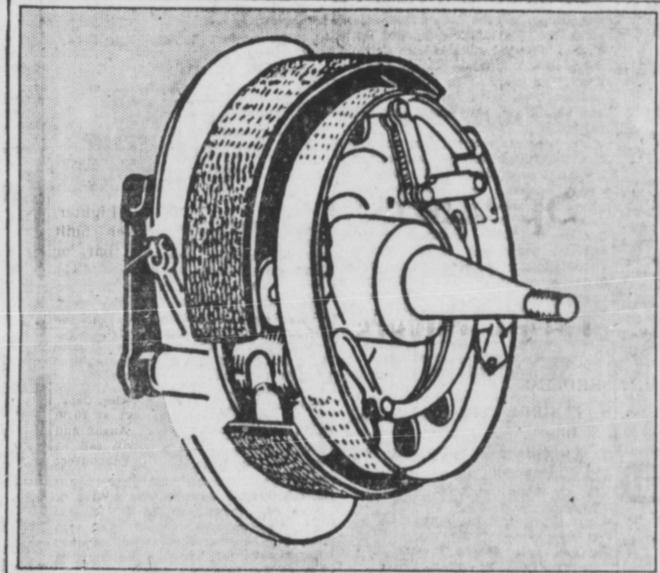

Start something. Perhaps someone else will keep it going and perhaps not, but if nobody starts there can be nothing done.

### KEEPING RIVER OPEN FOR OCEAN VESSELS

Montreal Ice Expert Has Two Powerful Weapons For Fighting Ice In St. Lawrence

MONTREAL, June 20.—Two new weapons for fighting ice in the River St. Lawrence by which Dr. Howard T. Barnes, ice expert, hopes to keep navigation open to Montreal for a longer period than seven months in the year, as is the case at present, were explained at a meeting here recently by a brother of the ice expert, Wilfred M. Barnes, a painter, who is familiar with his brother's work and methods in the matter of prolonging navigation to this port. The two weapons are the thermit flare and solite, comprising the heat unit with which ice-packs were destroyed during the high water this spring, when floods were thus prevented. The thermit flare, it was explained, is projected from the bow of a ship

### THE FORD CAR SIX-BRAKE SYSTEM

### Grips with Silent Power

THE greatest safety feature on any automobile—the braking system—has been developed on the Ford car to a degree that insures absolute driving confidence. Being fully enclosed, the internal expanding brakes on all four wheels are free from any danger of impaired performance from mud, sand, road dirt, grease or other foreign matter entering the mechanism or between the bands and drum.

The four wheel system is operated by a foot pedal, while the emergency or parking system of two brakes, one on each rear wheel, is distinct and separate, operated by a hand lever. This added security is made possible through the unique design of the Ford steel spoke wheels to which drums are fitted to accommodate two sets of internal brakes on the rear wheels.

The smooth, even braking of the Ford car yields more advantages than maximum safety at all times, since it makes tires last longer and adds immeasurably to riding ease and driving comfort.

Drive it Yourself—there is no Better Test

**Ford Car Features**

- Choice of colours
- 55 to 65 miles an hour
- 40-horse power engine
- Full balloon tires
- Fully enclosed six-brake system
- 4 Handbuilt hydraulic shock absorbers
- 20 to 30 miles per gallon of gasoline
- Shatterproof glass windshield
- Theft proof ignition lock
- Reliability and low upkeep

Arrange for your demonstration ride with the nearest Ford dealer

### Babies

EAST, west, north, south, in city, town and country—babies. Everywhere, too—Eagle Brand milk, the safe food for bottle-fed babies. Eagle Brand is pure, rich milk, obtained under perfect sanitary conditions from healthy cows, condensed and blended with the best refined sugar; especially prepared for babies. On each can are the simple feeding directions, from first week onwards. More infants are successfully reared on Eagle Brand than on all other baby foods combined. It is particularly effective in difficult feeding cases.
