DAILY EDITION. Saturday, August 2, 1919.

Chautauqua Becomes Popular Institution.

For fifty years the Chautauqua has been a more or less popular institution in the United States, growing in favor every year. For only three years have circuits been established in Canada, but already 300 towns are included in the circuits, whereas the first year there were but 42. The idea is largely educative, but amusement also enters into the programs.

The Chautauqua was originated by the Indians, it being an annual festival at which oratory and song were combined. The late Bishop Vincent conceived the idea of adapting the idea of the Chautauqua Indians so he established a summer school which gradually developed into the present institution. Already it has spread to New Zealand and Australia, and has been taken up with enthusiasm in the former country. Prince Rupert will hold her second Chautauqua Festival next month.

Much Good Land Along G. T. P.

One of the speakers at the banquet at Prince George given to the members of the visiting Boards of Trade stated that less than ten per cent of the land in this province was agricultural land and that more than half of it was along the line of the Grand Trunk Pacific Railway. If that is true, and there is no reason to doubt it, the future of the country between here and Prince George seems very bright. It takes time to develop an agricultural community, but, where the clearing is light, as it is in those districts, it is not many years before an energetic people are getting results.

Britain Has Back To Land Policy.

Great Britain has a "back to the land" policy, especially with a view to caring for the returned soldiers. She proposes to make available certain tracts of farm land and the Board of Agriculture has been empowered to spend \$100,000,000 in settling returned soldiers. The Board has authority to purchase 60,000 acres in England and 20,000 acres in Scotland. Four small colonies totalling 6,000 acres have been established. The settlement is following largely the plan of colonies divided into small farms with a central demonstration farm which will supply instructors for the settlers in the colony and where implements for working the land will be available.

An educational qualification is exacted. The British scheme is designed to settle all ranks providing they are of suitable educational promise.

Allowances amounting to \$725 a year are provided for residential training with experienced farmers. A man who has been a life long agriculturist is required to put in at least one season in this way on probation before the Board will settle him in a colony. A longer period for less experienced farmers is provided.

The plan does not contemplate extensive credit to the occupants of land in soldier colonies. A co-operative credit bank is to be established in partnership with the State and will extend credit for the purchase of stock and equipment.

Time to Think About the Winter.

The autumn will be here very soon and it is time the people of this city were considering whether they are going to drift through without making any provision for winter sports. Last autumn the influenza came and upset all our plans. This year it is to be hoped that there will be no such visitation.

The city is fairly well provided for summer sports, but there is nothing to do in the winter. A strong amateur organization is required that will make provision for the physical development of the young people, men and women. Whatever is done there will have to be a manager or paid secretary who will give his whole time to the work. Now is the time to begin thinking about it. We hope to have more to say on the subject later.
