DAILY EDITION

AIRPLANES FOR MINING

Almost every day our attention is drawn to the need Miscellaneous of the.. development of air transportation to meet the Workmen's compensademands of the mining interests in this part of the country. Much mineral country could be explored and developed if transportation were easier.

There are in the country plenty of lakes, but some of dent provincial pothem are not open very early in the season. With air- lice planes operating for carrying men and supplies much of Water, light and fuel the delay at present holding back development would be Keep of prisoners obviated. The outlook for the use of planes is one that has enormous possibilities.

GROUPS OF UNIONS

There are at present in Canada two groups of labor unions, one the international organization represented by the local trades and labor councils and federally by the Trades and Labor Congress and the other a newer organization represented federally by the All-Canadian Congress of Labor, which met recently in Toronto. The latter organization seems to be growing rapidly.

There seems to be keen opposition between the organizations, and the All-Canadian group accuses the older organization of paying more attention to them than to trying to improve labor conditions.

The All-Canadian organization comes out strongly against company towns, and in favor of employment and old age pensions, for the cessation of military preparations and military teaching in the schools, to improve conditions for women, for compulsory education of all children up to the age of 16, and for the resumption of diplomatic and trade relations with Russia.

HEAD OF ROYAL AIR FORCE CAR BARGE WILL BE

Sir John Maitland Salmond, Air Marshal, has been appointed Chief Marshal of the British 875.00 Poyal Air Force in succession to Scotia are at present the great 86.29 Sir Hugh Trenchard, who re-centres of the iron industry in signed last month.

FINISHED SOON NOW

Craft, Built At Local Dry Dock, Will Be Used In Grain Carrying to Victoria

It will be a few days yet before the big car barge, being built at the local dry dock for the Canadian National Railways, is completed and turned over to its owners. A tug will come north to take the craft to Vancouver. The barge is to be used in hauling grain from Port Mann to the new elevator which has been built at Victoria.

CANADA'S IRON INDUSTRY

Here are two of the aces who took part in the Schneider Cup air races. R. L. Atcherly (left) and Flight Lieut. G. Stainforth.

PRITISH Columbia's Power resources are the envy of the world. With Power, the riches of the world can be won; with Power, ores can be mined . . . smelted; transportation problems solved; manufacturing industries developed, and with them population . . . pay-rolls. Power is British Columbia's strongest bid for more industries ... more people.

Of the millions of horsepower available in our province, but half a million are now harnessed to turn the wheels of industry. The great hydro-electric development at Bridge River will ultimately generate more than 600,000 horsepower, while the output at Bonnington Falls and other points is being steadily increased. The Campbell and Chilko Rivers, on the mainland, and the Nimpkish on Vancouver Island, are capable of tremendous power development for the conversion of our forest and mineral resources into fabulous wealth.

Two of British Columbia's Electric Power systems are among the greatest in Canada, each generating more than 400,000,000 kilowatt hours in 1927. This represents an increase in the last ten years of 98% ... truly a remarkable achievement!

Foreign authorities speak of this record as a measure of the great vitality of British Columbia.

Today we rank third in power and industrial development among Canadian provinces. We have made greater progress per capita than any!

It is the policy of British Columbia to foster the development of the hydro-electric powers for the benefit of the public. They are allotted to private enterprises on condition that they will be developed within a certain time, so that no exploitation of public assets may take

Millions of dollars are now earmarked for Power development in our province. Dams are being built, turbines installed . . . transmission lines erected to care for the imminent industrial development.

BEAUTICAL DE LA CONTRA DEL CONTRA DE LA CONTRA DELIGIA DE LA CONTRA DEL CONTRA DE LA CONTRA DEL CONTRA DE LA CONTRA DE LA CONTRA DE LA

Thousands of dollars are being expended weekly on materials and wages; thousands are feeling the immediate benefits of this enterprise.

Side by side with our power development, Industrial Expansion has kept pace. Today 17% of Canada's external trade is handled by British Columbia. During the past decade, our basic industries have increased 101.3%. Our total payroll, including all classes, is estimated at 210 million dollars. Today, our Lumbering, Mining and Fishing industries employ 72,517 people, paying them 175 million dollars in wages . . . distributing an average wage ranking among the highest in Canada.

These 175 millions in wages are a great contribution to our annual internal trade in the province. They have given our industrial workers a buying power ranking second in the Dominion and have largely been responsible for our ever increasing prosperity, as evidenced by the fact that the number of automobiles registered in the province last year was 76,187 as compared with 8,596

British Columbia's steady and varied industrial development has changed the conception in Eastern Canada and the United States of our province, No longer are we entirely dependent on the East for our manufactured products. British Columbia is increasingly furnishing her own needs. She now ranks third in the whole Dominion as a manufacturing province.

Our phenomenal Power and Industrial growth has focused the attention of the great industrialists and investors on our province. Today, British Columbia in the eyes of the world, stands for Power, Progress and Plenty. May our efforts of the next ten years stabilize and increase our Prosperity!
