is now Epidemic!

Compared with 1918, this epidemic, so far, is mild; and yet, in spit of vastly increased capacity, the Vicks laboratories are once more operating night and day to meet the emergency demand for more and more Vicks VapoRub.

### How best to use Vicks VapoRub

1. AS A PREVENTIVE

Several times a day, insert Vicks up the nostrils. Also melt a little night and morning in a bowl of boiling water and inhale the steaming medicated vapors. This helps to ward off germ-infec-

2. IF A COLD STARTS

If possible, go home and go to bed. Take a laxative and a hot lemonade. Apply hot, wet towels over throat and chest until the skin is thoroughly reddened. Then rub vigorously with Vicks. Spread on thickly and cover with warm flannel. Leave the bedcovering loose, so that the vapors, released by the body-warmth, may be freely inhaled. At the same time, Vicks also acts through the skin like a poultice. Repeat this treatment every four hours, eat lightly, and stay in bed until the cold is broken. Complete rest helps the body throw off cold more quickly.

3. AFTER A FLU ATTACK

Physicians advise that the chief danger in this epidemic is after influenza. Then, more than ever, colds, attacking the weakened system, may lead to bronchitis, sinus-trouble or pneumonia. This is especially true of children or old folks. Heed even the slightest cold as a danger signal. Vicks is especially valuable here, because it is applied externally, and so can be used freely, as often as needed, without upsetting delicate digestions, as too much "dosing" is so apt to do.
