For six years he handled dry goods as well as groceries, but last June he sold out his stock to J. Kirkpatrick of this city, who has been handling it at

It was seven years ago that Mr. Dawson was appointed a director of the Canadian National Railways and since that time he has had to give a certain part of his time to that work, making frequent trips to Montreal to attend board meetings.

While Prince Rupert people will regret Mr. Dawson giving up his business, they will be glad to hear that he intends to remain in the city and make his home here. He has been for many years looked upon as one of the leading citizens and if he moved the loss would be great.

Mr. Dawson's successors are a very active firm. They have been in the wholesale grocery business many years and for a long time have had a local representative looking after northern and central British Columbia. The business is not likely to suffer any at their hands. It may even prove to be another tie, drawing Vancouver and Prince Rupert closer together.

A Vancouver despatch says H. E. DeWolf, who has been in charge of the sales department there, has sale grocery to Malkin & Co.

Australia Goes Labor Once More with Defeat of Premier Bruce; is Indicated in Two-Thirds of Vote

MELBOURNE, Australia, Oct. 12.—The defeat of the Bruce coalition of Nationalists and Country Parties was indicated as the counting of ballots in today's elections progressed. Tonight, with more than two-thirds of the vote counted, it seemed safe to assume that the Labor Party led by James Henry Scullin would have a clear majority in the next house.

The possible standing in the next house compared with that recently dissolved may be: Labor, 50; Nationalists, 16; Country Party, 9. Total, 75. 'In the last house the numbers were: Labor, 32; Nationalists, 30; Country Party, 13.

Mackenzie King Will Probably Be Asked For Views On Halifax Armament Reduction Proposals

WASHINGTON, Oct. 12. - Premier Mackenzie King probably will be asked by Premier Ramsay Macdonald whether his government would consider reduction of the fortifications of Halifax.

The forthcoming visit of the British premier to Ottawa will furnish opportunity for personal discussion of a number of matters touched upon between Premier Macdonald and President Hoover. The general impression here is that one of the topics will be the armament at Halifax. By reduction of armaments is un-

derstood to mean the removal of effective batteries. fortifications, more important at least to the American public, are the British naval bases of Bermuda and West Indies. Their proximity to the Panama canal has been stressed by the United States press and it would be considered by the lay public a notable gesture were

Mr. Macdonald will also probably canvass the views of Premier King and his government on the general question which attaches to prohibition enforcement in the United States, the smuggling problem.

More important than the Halifax All Canadians Are British and Must Be So Considered

MONTREAL, Oct. 12.—Steps will be taken by the federal government at the earliest opportunity either by means of legislation or through the next census to establish clearly the difference between British subjects born in Canada and those from other parts of the Empire or from foreign countries, stated the secretary of state. Canadian nationality will take into account that citizens of this country are part of the British Empire and that as such wherever they go in foreign countries they can be considered only as British subjects.

Deliveries of Ice in Farther North

EDMONTON, Oct. 12: - "Old Man Winter is already making deliveries of ice in the far north," says the Edmonton Journal, quoting Thomas Creighton, prospector just arrived in this city from Coppermine River delta. Most of the lakes in the far north are already frozen, the prospector said, and blizzards which have been raging along the Arctic Coast, made flying hazardous.

"Coming west from the barrens to reach the Mackenzie River at LAST EVENING Fort Norman, Oreighton found that this post, notable for the oil rush which occurred there some years ago-was also suffering from an unprecedented cold snap, for this time of the year. The distance from the mouth of the Coppermine is more than 2,000 miles from the city via Great Bear Lake and Fort Norman."
