AROUND PRINCE RUPERT Aerial Prospecting Campaign in Cassiar; Big Crew of Men on Mountain Boy; Ore Strike at Tiger

The great practically unexplored regions of the Cassiar mining district, if various plans that are now being made materialize, will be prospected during the coming summer as they were never prospected before. There has been a feeling about mining men that the pay country in this listrict has not all been located and now most of the unprospected country in the placer belt is being investigated. Success in eastern Canada of prospecting by airplane has fired several outfits to try this latest idea out in British Columbia and a number of planes *-

Hyland River is all promising the next few days. L. A. De-Creek to Pase Lake and a good gasboat service on Dease Lake and Dease River, should make it easy to get around the Cassiar. Renorts from all sections of the district are very gratifying and al the outfits that have been worked in the vicinity of Dease Lake will being to the effect that for the again be in operation this year.

Owing to water in the workings, operations in No. 3 The tunnel being driven to tap tunnel have been suspended temporarily and the crew moved to No. 4 tunnel, which will encounter the ore, it is expected, at a depth

> The tunnel on the Rufus-Argenta mine at Stewart, which is being developed by the Duthie interests, was recently in 495 feet from the nortal. Formation consists of greenstone heavily mixed with calcite and indications are that the big Erickson vein will be reached within a short time.

> The mill at the Silver Cup mine, near Hazelton, is now running on tonnage basis and producing igh grade concentrates for shipment to Trail smelter. Operations are being continued at the mine which looks promising. Two and half feet of excellent ore has been encountered in the face of No. 4 tunnel at a depth of over 500 feet and a length of over 600 feet. No. 3 tunnel is in rich ore with a width of between three and five feet. A gang is at work widening and ditching the Nine-Mile mountain road over which 'he concertrates will be transported by trucks from the mine to he railway. The power plant at he mine is also working in good

The Consolidated Mining & Smelting Co. is making preparaions to carry out important operations in the central interior this reason following the company's etivity last year. For testing the ore bodies on H. J. McDonald's Copper Island property on Babine Lake, Convolidated has just moved considerable earipment in over the Tonley road and more will be sent in so that diamond drilling of the property may be instituted. The head driller is already on the ground and; as soon as the ice moves off the lake, the machinery will be moved on a scow. Consolidated is also making arrangements to re-open exploratory work on several groups near Pacific. which it has optioned and on which considerable work was performed last fall before the advent of snow made it necessary to discontinue operations. These will include the property owned by Mack Orr and Russell Smith. chipment of horses for this work has left Smithers and equipment and supplies will soon be asassembled. It is understood that Consolidated will establish central office at Smithers this year and that an engineer will be stationed there who will have supervision of work on all the properties in the district.

NO PUNCH LEFT Referee (excitedly)-Hey, the bell has rung for the eleventh

Bexer (who has lost his enthusiasm) -- Aw, let's sit this one out .- Tit-Bits.
