DAILY EDITION

WELCOME OUR VISITORS

Welcome to the members of the Fisheries Association who are arriving today for the convention which opens at present being moved across the tomorrow. We hope they will have an instructive time and glacier by pack horses. Meanthoroughly enjoy their visit to Prince Rupert. There are a number of things to see and a lot of jolly good people to ward completion of the whole tram meet and we miss our bet if it is not one of the most inter- line. esting conventions they have attended.

If Prince Rupert is to prosper there must be men who are willing to devote time and money to making her great without thought of any reward except the execrations of the multitude.

PRINCE RUPERT AND HER NEIGHBORS

Yesterday we published an interview from the publisher of the Financial News of Vancouver in which hel showed how one place benefits from the development of other places. There is a community of interest in the country. Take the specific case of Stewart and Prince Rupert. Many Stewart people do business in this city. Creek section of Portland Canal. They send their ores here to be analyzed and they buy During the past fifteen years or E.P. Ranch. from local merchants. If they are going east they stop more, Nesbitt and Archie have haven't we?" he asked. off and take the train here. Later perhaps Prince Rup-done a large amount of prospect- "Yes, I'm rather sorry to say," ert people will sometimes take the train at Stewart for some interior point. Stewart has the mines and Prince results. There are a number of Rupert may possibly have a smelter after awhile. We have veins exposed and the ore is everything to gain from working together. A great many principally high-grade galena, Prince Rupert people have money invested in Stewart though there are some shoots car- you don't really work for. And besides, mines. Some have bought them on the stock exchange be- rying high percentages of copper lieving that they were a good investment and they probably are. Our interests are closely allied. If they build it is expected that this summer's a railway they will tap a country not now tapped by, any development will greatly enhance railway coming into Prince Rupert. We shall not be the value of the property. jealous of Stewart even if the port should happen to grow faster than we did. We wish every town and village in ried out all summer on the Unicorn the north to grow and prosper, for if they all grow and property at Stewart, supplies havprosper we shall expect to do the same. If they do not, ing been packed in and accomodawe cannot.

A strong arm is strengthened even more by the knowledge that it is being used in a righteous cause.

COW BAY SITUATION

The main road leading to the Government dock and the drydock as well as to the fish docks, yacht club and vari- has arranged the financing and is ous industrial docks is by way of Cow Bay. At the corner in personal charge of the developwhere the road turns off Third Avenue, there is a shack that has been occupied until recently and which by blocking the view makes it a very dangerous corner. Now that the place is unoccupied it is suggested that the building be kut Lake, south of Burns Lake, pulled down and the corner, which is an evil smelling place, be cleaned up.

Possibly there are p'ans in hand for this. If not we suggest that the present is the time for action. Cow Bay is an offense to the eyes and nose and a danger to those who drive or ride in cars, as it is at present.

The reason Ketchikan prospers is because a number of her citizens believe in her heart and soul.

"George, Oi've heard of Shrove Tuesday, an' Ash Wednes- that-I had it in the holidays it is to obey, when you are young and day, but Oi've never 'eard of Nut Sunday!" -London Opinion. Belleville Ontario.

News of the Mines

AROUND PRINCE RUPERT New Ore Strike on Mountain Boy Holding; Porter-Idaho Tram Nearing Completion; Rich Ore on Silverado

A new six-foot vein of rich ore was recently encountered on the Silver Mask group, which forms a part of the holdings of the Mountain Boy Mining Co. at Stewart, adjoining the Mountain Boy proper to the west. The new ore is reported to be very similar to the highest grade found on the Mountain Boy, being copper sulphides mixed with bunches and stringers of native silver. Four additional smaller veins have also been located, some of them

with similar high-grade ore and "some carrying galena in massive form. There are some who pre- PRINCE WOULD dict that the Mountain Boy may be developed into a rival of the famous Premier mine.

From the forks of Marmot River to Green Point Cabin, the first leg of the Porter-Idaho tramway is now operating and a temporary tram has been built from the Talks About It With mine down to the glacier, material while, the Premier Gold Mining Co. is making good progress to-

Reports continue to drift into Stewart about exceptionally rich ore being struck in the long up- be there in June. Mr. Hunt owns a raise which is being driven in the ranch nearby. The interview was Silverado mine, which is being granted in St. Jame's Palace and foloperated by the Premier Gold lows in part:
