ROAD MOST IMPORTANT NEED OF PRINCE RUPERT TODAY

Now that two of the ministers of the crown are in the T state without fear of contra- Sunday city would be a good time to impress upon the Provincial diction that he brought not one Government the fact of the almost complete isolation of particle of evidence to substanthe city. Probably the Government does not realize that tiate this assertion, but simply although the city has been in existence for twenty years made this sweeping statement, the Government has built little more than five miles of without a single fact to support road. All the roads we have over and above that have been and now present to the general built and paid for by the city without any herp whatever public, the fishermen's evidence from the Government.

For a number of years the people of the city and the commission. newspapers have been hammering away at this road build- One of the proposed fish traps ing program. Finally after much effort, the member for trap operating there in 1925. the city was able to secure recognition of the trunk road man biological professor (governsystem as one that was to be built and a beginning was mental) was stationed there, and made on Kaien Island. Also plans were made and sound- took from that trap 659 sockeye ings taken for a bridge across Galloway Rapids and some salmon, placed tags upon each five miles or thereabout of slashing done on the mainland leading toward the canneries. This was a beginning and conducted between the dates a pledge had been given that the bridge would be built this year and the road work continued at the same time.

Prince Rupert people were often very dissatisfied at recaptured that same year. 1925. the progress made by the late Government in connection with the road and this militated against them in the last election. Greater speed was urged. Then the Government there whereabouts as positively changed and instead of getting greater speed, as was con- no subject for discussion by fidently expected, the people were told that nothing what- either proponent or opponent. ever would be done except to make an aerial survey.

THE NEW ERA IN TRANSPORTATION

During the early days of the history of the city roads are open for anyone's perudid not matter much. There was the railway and the water sal. and these were our highways. Now everything is chang. They are government statistics ing. It is proposed to spend some of the money contributed and not to be lightly thrown by Prince Rupert to the Provincial Exchequer in adver- aside as of no moment. tising the province and a larger amount in constructing tured out of 659, 80 were recaproads in the south. We are being asked to pay for their tured in the Naas River, B.C., luxuries and are getting nothing. Is it any wonder we ask 14 were captured in waters leadfor a new Province, where we should collect our own rev- ing to the Naas River, 13 were enue and expend it in the way which would benefit us captured in the Skeena River. most. We could then built the road without difficulty. We could avoid the folly of having an expensive government house, or huge parliament buildings and costly in Alaska.

In other words 80 per cent. of legislatures with large number of representatives. By the recaptured tagged sockeye studying economy we could build up the new province in salmon were caught in British such a manner as to rebound to our own benefit.
