WHY AN ATTACK?

A few days ago the B. C. Packers proposed to open an office in Prince Rupert. On Saturday, two days after the announcement was made, we were asked to publish a lengthy letter attacking them and sneering at the proposal as having any benefit to the city. The letter was refused. No one thinks the B. C. Packers want to come here for their health. They are here because they think they will benefit from doing so. That is why we all are here. We are here because this is the best place we know in which to carry on the kind of business in which we are engaged. If it were not so we should be elsewhere. The fishermen are here because this is the best place for them to fish. We are glad to have them fish here. If the B. C. Packers are making any move that will tend to make Prince Rupert a better or more prosperous city, we are with them. We want any and all big interests to come here as long as they do not oppress anybody and as long as their presence is a benefit to the community. Doubtless the big fishing company will deal mostly with the wholesalers. We all expect that. No one is misled. We are not concerned who they do business with, as long as they buy here and bring some money into town. The more they spend here the more the city will benefit. We also welcome the representatives of the Consolidated Mining & Smelting Company, who are to open an mousselines lead the field. office here. It is the people who do things who are needed here just now. Anybody can sit back and criticize the with horsehair to give the desired operations of the big companies, but it takes brains to or- flare, is the medium for this ganize and carry on big work.

for the best results.

CONTRACT REPORT OF THE TO THE STATE OF THE TRACK STREET

FOOLISH SOCIALISTS

Those who hold socialistic beliefs and who prate about the wealth of the world being all the product of labor are over, consists of four wide cirable to enjoy modern luxuries because others are working cular inserts applied to the bodhard while they theorize. They forget that if socialism ice in points. is ever to amount to anything it must come by means of big organizations. The big race has to learn to rise above the petty and learn to handle big things in a big way before the utopia of which they dream can come to pass. Where years ago nations were composed of a few thousand people, today the inhabitants are reckoned in millions and we are talking of world alliances and federations. Great men are seeing great developments as the result of the great work that is being done. Carping criticism by little men gets a country nowhere. What is needed today is men of wide vision who can do things or get them done. Today we want big people here and have expressed ourselves clearly by deciding to sell our power franchise to one of the biggest companies in Canada. They are not here for their health and if we display a tendency to criticize and snarl at them they will not want to come. We need them and they can use us. As long as we get what we want we are willing that they shall get what they want. That is cooperation. Carping criticizm has held Prince Rupert back long enough. Let us show a spirit of mutual helpfulness which will give us a chance to become a real factor in the life of the country.

Crisp, flaring materials are most popular for evening frocks. Of these the taffetas, tulles and White mousseline, stiffened frock, while silver pailettes sprinkled unevenly over the material lend it a delightfully imaginative quality.

The model is made with the regulation long-waisted bodice with V-neck. The skirt, how-

CONSTRUCTION 1916 2800000 Going up!

FTER all, there's no place like British Columbia in A which to work and live and play! Here, there are no long "off seasons" to cut down a man's working time. Our temperate climate keeps a man fit ... enables him to produce more ... earn more.

The producers' average weekly wage in British Columbia is \$28.39 . . . 49% higher than the rest of Canada. In 1926 seventeen industries increased weekly wages by \$12.95! Actually in ten years our annual payroll has grown from 78 million dollars to 175 million dollars . . . the greatest advance by far of any Province during that period. This, of course, does not include agricultural workers, professionals, clerks and others. British Columbia's gross payroll is estimated at 210 million dollars!

Construction, that outward evidence of the faith we have in our province, has played a large part in the wage situation. In ten years British Columbia's construction activity has gone up ten times. In 1916 it involved only \$2,800,000 . . . for 10 months in 1927 it amounted to \$27,277,000!
