"THE SQUAW MAN" IS FIRST RATE DRAMA

Old Play Brought up to Date by Latest Movie Methods.

Someone has said, in order to successfully entertain the public the dramatist must make them laugh, make them wait, make them cry. "The Squaw Man" does all of these things. The Lasky company used it as its premiere production. It was directed by Cecil B. De Mille and now, after a lapse of several years, it has been revived, reproduced, completely changed as to cast and investiture and appears in the form of a perfect film drama, a modern version of Edwin Milton Royle's famous play.

Cecil B. De Mille, in the intervening years, has achieved much in the way of advanced methods of technique, having brought to perfection the talents in this direction he exhibited even in the earliest days of his entry into the motion picture business. He has greater facilities today than he had when "The Squaw Man" was first produced, and these have been utilized in every possible way to enhance the production. In a word, he has had the rare chance of seeing his picture and then doing it all over again. An all-star cast of players has been chosen.

The picture was seen at the Westholme last night and will be shown again tonight.

DEMAND FOR FURS IS STEADILY INCREASING

St. Louis, August 16.—A strong demand for furs of all kinds has prevailed of late. The available stocks, particularly of American staples, are probably the smallest ever known in the history of the trade.

The Russian Government has placed restrictions on the shipping out of that country of furs which will naturally curtail the supply.

Now that peace is practically declared and the embargo on shipments to Germany and her allies lifted, a new source of demand may be expected.

RUPERT MOSQUITOS ARE VERY MODEST

Professor Dyar of Washington is Collecting Them for National Museum.

Professor H. G. Dyar, of the National Museum, Washington, D. C., accompanied by his assistant Miss Aseyeh Allen, are in the city for a few days on their way south. Professor Dyar is a noted entomologist and has been paying particular attention to mosquitoes. This is his third season spent in Canada, and he has discovered several new varieties of the insect pest and has found that the same brand of mosquito has different habits which vary according to the climate.

Dr. Dyar has worked his way clear across Canada and this summer has visited the Yukon and Alaskan coast towns on his way south. He returned from Terrace on Thursday night, where he secured several specimens of the kind of mosquito unknown in Prince Rupert. Dr. Dyar did find mosquitoes in Prince Rupert, but they are of the woods variety, which are the most modest, and only sting humans as the last resort.

At Mission City, there is a Dominion entomologist with whom Dr. Dyar will compare notes on his way back to Washington.
