team Exploded

N ENTIRELY DIFFERENT kind of cereal is Quaker Puffed Wheat. Airy deliciousness and toasted crunchiness are combined with all the nutriment of the grain supreme. The wheat bran is retained, but you would not notice it, so delicately is it concealed.

- toothsome and tempting

Puffing the wheat grain to eight times its natural size cooks it thoroughly and explodes millions of food cells in each grain. Rich stores of protein, carbohydrates and minerals are released for easy digestion. Each puffed grain has a tempting, nut-like flavour that always intrigues a lagging appetite.

Always have Quaker Puffed Wheat ready to serve at any meal or at any time between meals. It is relished when fickle appetites set other food aside.
