## APPEAL FOR EQUAL RATE ON RAILWAY

British Columbia Asks Same Transportation Cost as Eastern Canada

OTTAWA, Oct. 16.—An appeal to the Dominion government for an extension of reductions of freight rates on grain and grain products westbound was brought yesterday by the United Farmers of British Columbia.

The appeal to the cabinet asked it to instruct the Board of Railway Commissioners to amend its general order No. 448 to abolish the mountain differential and to put British Columbia on the same rate basis on westbound shipments as eastbound grain. They also asked to have abolished the "theoretical mileage" where distances vary between the two railways and to reduce rates on fruit from British Columbia to prairie points to the same comparative basis as rates between points in eastern Canada of equal mileage.

The argument is being continued.

## HATRY CASE HARD BLOW TO CREDIT

Liability of English Firm Something Like Hundred Million Dollars

LONDON, Oct. 16 (by Mail).—With liabilities estimated at \$100,000,000 and assets that are largely problematical, the failure of the Hatry group of companies is by far the worst blow suffered by the London Stock Exchange for over half a century. But heavy though it is the financial loss is not the weightiest part of the calamity. Hatry and his associates have surrendered themselves to the authorities and are now the subject of a state prosecution. The charges against them, as formulated by the Crown, involve the forgery and uttering of scrip certificates to enormous amounts.

"Such transactions," said counsel, in opening the case for the Director of Public Prosecutions, "deliberately carried out in the City of London by persons entrusted with the issuing of loans to municipal corporations is, I believe, unprecedented." It is, and the loss likely to fall on the general public will probably be small as compared with the suffering by the Banks and the members of the Stock Exchange, who are legally bound to give good title to all securities passing through their hands. It is this aspect of the matter which is having a serious repercussion on financial business. It is obviously impossible to subject to searching scrutiny and enquiry every financial document. Something must be left to credit and confidence; and both, at the moment, have been badly undermined.
