WORK OF COAST MISSIONARIES

The work of the coast missionaries who carry not only tion year, he entered the service the gospel but good cheer and medical aid, and at times do of the Bank of Montreal at Hamrescue work, is one worthy of all commendation. On Fri- Sir Vincent that he grew with day night the untiring efforts of Captain Oliver were ac- the bank and the bank grew with knowledged when a presentation was made to that veteran Canada, the man and the bank missionary. On a previous occasion the work of Canon playing leading parts in the Rushbrook of the AnglicanChurch was the subject of com- growth of the country. mendation through the church and the press. Also the Sir Vincent's career in the efforts of Rev. James Gillett of Massett was mentioned. Bank of Montreal was one of

Those who live far from other human habitation particularly appreciate the work of these missionaries, especially the lighthouse keepers, hand loggers and others who

are almost wholly isolated.

We are glad to join with the people of the United 1903 when he was appointed as-Church in expressing appreciation of the untiring efforts of the noble men who spend their lives in the work of trying to make the lives of their fellows happier.

SALVATION ARMY'S NEW HEAD

(Edmonton Journal)

It is a heavy task that General Higgins is assuming as was elected president. Although the head of the Salvation Army. But his broad experience at the annual meeting of the and the marked ability that he has displayed in the various posts that he has held give confidence that under his leadership the organization will emerge successfully from those of Sir Charles Gordon, he its troubles and be a more powerful force for good than accepted the new position of ever. There seems to be no question about his obtaining Chairman of the Board of Directhe loyal support of the mass of the Army members and fors and was a regular attendant his position is greatly strengthened by the assurance that at his office until his illness. he has received from Evangeline Booth, the sister of the The honor of baronetcy was deposed general and the commander in the United States conferred upon him on Sept. 15, that that branch can be counted upon to unite behind him. The rumors that it would secede can have little basis in view of her statement.

Though Miss Booth was prepared to step into the place general. occupied by her father and her brother and was proposed for it at the meeting of the high council, she has not allow- the Bank of Montreal Sir Vined its failure to select her to affect her attitude. She puts cent was associated with many the Army's interests above any personal considerations and believes that it has now reached "safer channels." of the Royal Trust Company, a Grave difficulties have still to be surmounted, but a be-Railway, chairman of the Canadginning has been made towards establishing its affairs on

a much sounder basis.

"One Who Knows," writing recently in the British Weekly, emphasized how serious was the situation that had arisen. He described Bramwell Booth as having really created the Army through his wonderful organizing powers. While he did not question that those who sum- the last few years and especially moned the high council were "entirely unselfish and quite" logically convinced in their determination to effect a bank. Annually he went overdrastic change in the Army's autocracy," he feared the consequences of their revolutionary action. At the same time, he held that some such crisis as that which had attracted the whole world was certain to develop sooner or ted in his annual report, carried later, as "autocracy, so admirable and essential in making a start. always ends in a ditch."

If this is so, the course adopted by the high counci COL. L. W. HARRISON, D. S. O. should not lack complete justification for long. It is at least to be hoped that this will prove the case and that under the new order of things the army's prestige and ef-

fectiveness will steadily increase.

ELECTRIC EYE NEVER MISSES A TRICK

TATHEN 38c. of every dollar paid in industrial wages and salaries in British Columbia comes from lumbering, her ten-year production increase of 138.7 per cent. is vitally important to everyone.

Thirty per cent. of our Province's entire industrial production of 251 million dollars in 1926 was contributed by lumbering and its allied industries. British Columbia now ranks third in the Dominion in industrial importance, and forest products dominate.

Involved in British Columbia's lumbering industry is capital of more than 100 million dollars . . . 20,000 people are employed . . . 330 mills operated.

Without question this gigantic business is destined to continue at the same pace.

Climate, soil and drainage have produced our vast forests of soft woods . . . the greatest in the world! One-third of the British Empire's entire timber supply is in British Columbia. Today, the demand for soft woods is four times that of hard woods . . . and with the last great stand of soft woods located in our Province, continued progress and prosperity are certain.

Great as our timber stands are, our government realizes the necessity of safeguarding the future of this vast industry and is devoting much time, study and thought to the question of scientific reforestration, fire prevention and conservation.

Lumbering brought 84 million dollars to British Columbia in 1926 (the value of the cut that year), an increase of 49 million dollars over 1916. Every year more than 30 million dollars worth of supplies are purchased to enable this great industry to carry on.

Foreign markets have been sought . . . and captured. Water borne export of lumber has enjoyed exceptional growth. Ships laden with 2,616,419,000 feet board measure left our ports during 1922-1926 . . . an increase over the period of 1912-1916 equal to 984%. The log scale jumped 111% during the same period!

This activity represents real money in constant circulation. It keeps thousands of men busy . . . influences every phase of commercial life . . . builds markets for our farm products . . . spells "BRITISH COLUMBIA" the world

Add to this the sash and door factories, and pulp and paper production, which alone jumped from \$15,450,000 in 1916 to \$72,327,000 in 1926, and you have an idea of the enormous importance and far reaching influence which this, our chief provincial enterprise, is bound to exercise on the welfare and earnings of each and every citizen.

Smow orly and Analmathan are

the distring. There is no acros
