

the driving of the lower tunnel on the Tiger property at Alice Arm

which is being developed by the Utility Mining and Finance Co. The rock has shown mineralization for the past 25 feet. A Knox is superintendent in charge of operations.

Shareholders of the Toric Mines Ltd., meeting in Vancouver recently, ratified the deal with the Britannia Mining & Smelting Co. for the taking over of the property. The Toric company gives the Britania company, under the deal. an option to purchase all the assets and undertakings of the Toric company for 750,000 shares in a company to be incorporated by the Britania company having an authorized share capits? of 3.000,000 \$1 par value shares, Britannia also having the option to purchase all or part of these 750 000 shares. The shares shall be paid over at stated times and amounts within five years. The first payment of 100.000 shares is to be made one year and a half after the signing of the agreement.

"Development is improving the appearance of the mine with increasing rapidity and, while progress is naturally slow, anxiety as to depth is largely removed," states Prof. J. M. Turnbull of the University of British Columbia, consulting engineer, in his latest report on the Topley Richfield mine. "Four feet of high-grade gold, silver and lead ore encountered is in the face of No. 2 E cross-cut on the 200-foot level and corresponds to drill hole 8 U. This cross-cut is about 30 feet long, so that the new ore seems to: lie 30 feet in the footwall of the ore followed so far north by the north drift on this level. It is probably a second vein, although the whole cross-cut is mineralized with lowgrade ore between the veins. The new ore is quite high grade, but! has not been drifted on yet and is not likely to continue as high grade as this for any great length. It is, nevertheless, a great improvement over the 100-foot level and indicates that improvement in depth may prove quite important at deeper levels. Assays near the face give as high as \$6 in gold and 152.7 ounces silver. The south drift is about 15 feet long to date and shows 15 ounces of ore assaying gold \$5.20, silver 10.1 ounces with lowe grade ore alongside of it. It is probably too near
