Co-operative Marketing Further Discussed At Meet

At a meeting of halibut boat owners in the City Hall last night, the proposed new company for the co-operative marketing of halibut was further discussed. In view of the fact that there were only about 20 owners at the meeting, a committee of six was delegated to meet the various owners individually in order to obtain their views on question.

Business at the meeting was otherwise of a routine nature. Capt. David Ritchie, president of the Canadian Halibut Vessel Owners' Association, occupied the chair.

TO Official Opening Last Night By BE HELD BY ROTARY CLUB NEXT THURSDAY

At the meeting of the Rotary Club yesterday, it was announced that T. H. Johnson, president of the Canadian Fisheries Association, would have charge of the special fish luncheon of the club next week. President George Bryant made the announcement.

D. B. Finn, Director of Fisheries Experimental Station, Gives Address

The importance of refrigeration in the preservation of foods of all kinds and the consequent importince of the new building at the Fisheries Station and of the work to be done there, was stressed by D. B. Finn, director of the station here, in an address to the Rotary Club at IS SUCCESSFUL their luncheon yesterday.

Mr. Finn stated that cold was the ideal preservative, but that in preserving a live thing like an apple it must not be too cold. If an apple were frozen it would be killed and begin at once to disintegrate. The problem they had before them was The opening day of the Moose to devise means of holding foods of suc- all kinds for a long time without cessful fair crowds being in at- causing a chemical change. In life tendance both in the afternoon there was a system of balanced rereactions, but in death this balance While the doors opened yester- was destroyed.

Mr. Finn went on to tell of the day afternoon at 3 o'clock, it was not until 8. o'clock in the evening manner in which the body was built up by the conversion of solubla matter into insoluble. Changes continued after death and the aim Mordie. During the evening there was to treat food substances so as was a delightful program by the to cause a minimum of change. They tried to freeze without rup-With the ladies' general comturing the cells or removing the ice mittee consisting of Mrs. A. G. crystals which formed when the material was frozen.

Other factors entering in were the drying of frozen materials. This N. Mussallem in charge for the was prevented to some extent by men those conducting the various cerling it with a coat of ice. Head of Meteorological Station at Victoria Talks About Weather

Week-End VICTORIA, Nov. 22. - F. Napier Denison, director of the Dominion Meteorological Observatory here, who last spring forecast an abnormally dry summer and fall on the Pacific Northwest, in an interview today suggested that the coming winter would be as cold or colder than last year. As for the Puget Sound precipitation, which is causing much anxiety owing to the lack of power through failure of the water, Mr. Denison said it may continue light for months to come.
