# You'll like the Easy-Riding Comfort of the Ford Car

THE Ford car is one of the asiest-riding cars on the road because of its low centre of gravity, minimum unsprung weight, Houdaille hydraulic shock absorbers and the unique construction of its transverse springs.

Furthermore, you are as comfortable in mind as in body when you drive the Ford car. You have confidence in the performance of the car because you know something

of the quality that has been built into it.

Remeber these two points when you select your next car. These are combined to an uncommon degree in the Ford.

Come in and drive a Ford car yourself through thickest traffic, up steepest hills, over roughest roads. A thirty-minute demonstration will convince you that there is nothing quite like it anywhere in simplicity of design, quality, price and performance.
