PUBLICITY FOR PRINCE RUPERT

The Northern British Columbia Power Company is giving Prince Rupert and Stewart some good publicity in connection with the advertising of the formation of the new company. They are featuring the city as the future outlet for the Peace River and they ought to know. We hope they will continue to keep the city in the public eye and also be successful in their work of industrializing the district.

ELASTIC OFF TARIFF

The elastic U. S. tariff has lost its elasticity. Congress refuses to grant the power to the president to make changes at will on recommendation of the tariff commission. That is an excellent thing for U.S. and for her neighbors. Under the elastic provisions no one ever knew just what to expect. The tariff might be raised at any time. With that provision absent both the American people and Canadians can feel greater security to do business with each other. It takes Congress longer to act than it would the president.

GUSTAV STRESEMANN

Germany has lost a great statesman in Gustav Stresemann. Following the war and revolution he was still a monarchist, but gradually he accepted the present situation and was not long in swinging into line and taking his place as one of the Republican leaders.

Stresemann began to attract international attention when in August, 1923, he was chosen chancellor to succeed Wilhelm Cuno. It was then that he greatly relieved the tenseness of the situation in the Ruhr Valley by substituting his policy of reconciliataion for that of passive resistance, which had been inaugurated by his prede-

The German foreign minister further established himself as a statesman of international calibre in March, 1927, when he presided at the meeting of the League Council with tact and skill. Affable, approachable and willing to talk, he became a favorite with the newspaper correspondents assigned to the league.

The crowning recognition of his policies of peace and conciliation came in December, 1926, when with Foreign the people of Peace River and at Minister Braind of France and Austen Chamberlain of the same time place Prince Rupert Great Britain he shared the Nobel Peace Prize for that

You'll like the Easy-Riding Comfort of the Ford Car

THE Ford car is one of the easiest-riding cars on the road because of its low centre of minimum unsprung weight, Houdaille hydraulic shock absorbers and the unique construction of its transverse springs.

Furthermore, you are as comfortable in mind as in body when you drive the Ford car. You have confidence in the performance of the car because you know something

of the quality that has been built into it.

Remeber these two points when you select your next car. These are combined to an uncommon degree in the Ford.

Come in and drive a Ford car yourself through thickest traffic. up steepest hills, over roughest roads. A thirty-minute demonstration will convince you that there is nothing quite like it anywhere in simplicity of design, quality, price and performance.
