New Engineering Method At Columbia Cellulose

Cited at Engineering Convention

MONTREAL—Columbia Cellulose at Prince Rupert was cited today as how improved engineering methods now make it possible to construct large pressure tanks at the site of their final location rather than in an engineering plant. This new method of manufacture overcomes great transportation problems and lowers costs.

P. E. Savage, M.E.I.C., of the Dominion Bridge Company, described how this work is done, in a technical paper given before the members of The Engineering Institute of Canada, today, at their sixty-fifth annual general and professional meeting which is being held in Montreal.

Mr. Savage used the huge digesters which are being constructed for the Columbia Cellulose Company at their plant near Prince Rupert as an example to illustrate how such work can be done by this new construction method. These digesters are huge tanks, 60 feet long and twenty feet in diameter made of shaped steel plates welded together. They are required to stand an internal pressure of 125 pounds to the square inch. After the plates are welded, the entire finished tanks must be heat-treated so that the shells will be of uniform strength throughout.

Until the development described by Mr. Savage this heat-treating had to be done in a special furnace located at the manufacturer's plant and the size of digesters was seriously restricted by limitations of rail shipment. Vessels too large to be shipped complete had to be shipped in sections and assembled at their final location by riveting—a more costly method.

SHIPPED IN SECTIONS

Mr. Savage explained how the digesters were shipped to British Columbia in sections, joined together by means of welding, and then heat-treated in their final locations.

A special type of welding electrode was used in the fabrication and welders were trained to apply these. All the welds were X-rayed using radioactive materials from the atomic energy plant at Chalk River, Ontario, and special containers had to be developed to protect the welders and others in the vicinity from radiation. A special dark room had to be set up for the development of films, and apparatus was designed and erected to take the place of the stress-relieving furnace which is used for smaller work.

This stress-relieving apparatus was remarkable. It was a heating unit capable of heating 20,000 cubic feet of air per minute to a maximum temperature of 1400 degrees. This temporary furnace was fired by a special type of oil burner and heated gases were passed from it through the digester and back through. Special equipment had to be designed to distribute the

Ontario Bank is Robbed, \$9600

TORONTO (CP)—Three masked gunmen robbed the branch of the Royal Bank of Canada at nearby Woodbridge of \$9600 yesterday. The thieves cleaned out the cages of two tellers and fled in an automobile after shooting at two bank customers who tried to give an alarm. Both shots were wild.

Col. Ralston Is Defended

John Francois Pouliot Criticizes Former Minister, Now Dead

OTTAWA (CP)—Charge that statements by Col. J. L. Ralston, former minister of defence, caused loss of thousands of Allied lives in World War II threw the House of Commons into a bitter, running turmoil last night.

It was made by Jean Francois Pouliot, Liberal, Temiscouata, central figure in House of Commons storms many times in the past.

It was attacked as "vicious, nasty, unwarranted and nonsensical" by Opposition members.

Two Opposition party leaders and two cabinet ministers, as well as members of parties in Opposition, entered the fray as it gained momentum and ran more than ninety minutes off end on.

Provocation came from Mr. Pouliot's statement that, after Col. Ralston's resignation from the cabinet late in 1944 on the conscription issue, he made statements about weakness in the Allied line on the western front which led to a major German attack.

Mr. Pouliot cited the instance to back his contention that it was unwise to discuss important military matters in public.

PEARKE'S TRIBUTE

Major-General G. R. Pearkes V.C. (Progressive-Conservative, Nanaimo) and a cluster of other members joined in praising Col. Ralston as a great Canadian and a great public servant.

Mr. Pouliot kept accusing them of distorting his remarks.

Col. J. A. Ross (Progressive-Conservative, Souris) said Mr. Pouliot should withdraw his remarks.

Casualties Are Near Million

WASHINGTON (CP)—Enemy casualties in Korea through to April 30 totalled 893,663, the Army estimated today. This represents an increase of 68,102 over the figure released through to April 21.

A spokesman said he could not give the United Nations casualties for the same period.

North Koreans suffered 534,146 casualties and the Chinese Communists 359,516 since the beginning of hostilities.

WEATHER

(Synopsis)

Rain has been general throughout the night over southwestern British Columbia as a minor weather system moved eastward over Washington. This will become showery by this afternoon.

Cloudy skies and scattered showers will continue over the greater part of the province today and tomorrow as a relatively extensive low pressure area at high levels persists just off the coast.

(Forecast)

Vancouver City, Lower Fraser Valley, Strait of Georgia regions — Rain this morning becoming cloudy with showers this afternoon. Cloudy with scattered showers tonight and Saturday. Winds northwest 15 occasionally reaching 20 about midday today and becoming light overnight. Continuing mild. Lows tonight and highs tomorrow — at Vancouver airport, Abbotsford and Nanaimo 50 and 60.

North Coast region — Cloudy today with sunny intervals this afternoon. Variable cloudiness tomorrow. Light winds. Little change in temperature. Lows tonight and highs tomorrow — at Port Hardy 48 and 58. Sandspit 45 and 52. Prince Rupert 45 and 56.

President Is Deposed

New Ruler Takes Over In Republic of Panama

PANAMA, Panama (CP)—Panama's police, army and public opinion gave the country a new president last night after four days and riots and revolution in which at least 12 persons were killed and hundreds wounded.

After a three-hour battle at the presidential palace, the national police, the country's only armed force, hauled the deposed president, Arnulfo Arias, off to jail.

Nine persons died in fighting and hundreds were wounded.

Arias' successor, Alcibiades Arosemena, is expected to move today into the palace.

Arias touched off a wave of violence Monday with a decree outlawing the 1946 constitution. He said he had acted against a Communist plot.

Critical Situation is Seen by Gen. Marshall

WASHINGTON, D.C. (CP)—Secretary of State George Marshall said today that risk of war with Russia in the Far East is "more acute by far" than the hazard of Soviet aggression in Western Europe.

Col. Stone is Called Home

WITH THE CANADIANS IN KOREA (CP)—Lt. Col. J. R. Stone left his troops today and flew to Canada in what may be a race against death.

Col. Stone, commander of the Princess Patricia's in Korea, learned by cable last night that his two-year-old daughter, Moira, has undergone an operation for removal of an eye afflicted by cancer and that the other is affected by a tumor.

Major Pat Tighe of Victoria took over command of the Princess Patricia's on Col. Stone's departure.

Walter G. Broad, for many years Canadian customs officer at Stewart and now stationed in Victoria, is revisiting the district. He came north on the Prince Rupert and, after making the round trip to Ketchikan, disembarked here last evening. He will pay a visit at Terrace before returning south.

Korean Front Quiet With Offensive Due

UN PATROLS MOVE FORWARD

TOKYO (CP)—United Nations troops shoved ahead another three miles on the eastern Korean front today. In the west they dug in to meet an expected Red offensive which some observers believe may develop within the next few weeks owing to increased movements of troops, tanks and artillery behind enemy lines.

South Koreans made an eastward advance north of the 38th parallel. They met only light opposition. One infantry company marched into Inje without firing a shot.

Elsewhere along the front it was quiet except for restless, probing patrols.

There was continual movement back of the Communist lines.

B29's today bombed air strips at Sariwon and Sinmak on the Red supply line to the western front from Pyongyang, the North Korean capital.

It was the seventh consecutive day of raids designed to thwart a possible Red air offensive.

Would Call Off Bridge Contract

VANCOUVER — Mayor Fred Hume proposed yesterday that the contract for a new bridge across False Creek at Granville Street be scrapped and that False Creek between Cambie and Granville Street be, instead, filled in.

There is a back out clause in the contract held by Dawson & Wade and B. C. Bridge and Dredging Co. but the city would have to compensate the contractors.

Mrs. E. H. O'Neill and son, Michael, arrived in the city on last night's train from Winnipeg for a week's visit with Mrs. O'Neill's brother and sister-in-law, Mr. and Mrs. James Gorman, Borden Street. Next week they will proceed to Vancouver.
