...Man. 6—The 35-  
...of the Northwest Air  
...of the RCAF will par-  
...the northern Mani-  
...festival here July 8-12.

BARRED PATHWAY  
The Smoky River on the Al-  
berta-B.C. boundary was dis-  
covered in 1792 by Alexander  
Mackenzie on his journey to the  
Pacific.

## icious HONEY BUN RING

Hot goodies come puffin' from your oven in quick time with new Fleischmann's Fast DRY Yeast! No more spoiled cakes of yeast! No more last-minute trips—this new form of Fleischmann's Yeast keeps in your cupboard! Order a month's supply.

**HONEY-BUN RING**

1/4 c. milk, 1/2 c. granulated sugar, 1/2 tsp. salt and 1/4 c. yeast; cool to lukewarm. Measure into a large bowl. Add lukewarm water, 1 tsp. oil and sugar; stir until sugar dissolved. Sprinkle with 1 c. Fleischmann's Fast Rising Yeast. Let stand 10 mins., stir well.

Boiled milk mixture and well-beaten egg and 1 tsp. lemon rind. Stir in 2 c. bread flour; beat until smooth. Work in 2 c. (about) bread flour. Knead until elastic. Place in bowl and grease top of dough. Cover and set in warm place, free from draught. Let rise until doubled in bulk. Punch down dough and roll out into an oblong about 9" wide and 24" long; loosen dough. Combine 1/2 c. lightly-packed brown sugar and 1/2 c. liquid honey; spread over dough and sprinkle with 1/2 c. broken walnuts. Beginning at a long side, loosely roll up like a jelly roll. Lift carefully into a greased 8 1/2" tube pan and join ends of dough to form a ring. Brush top with melted butter. Cover and let rise until doubled in bulk. Bake in moderately hot oven, 375°, 45-50 minutes. Brush top with honey and sprinkle with chopped walnuts.

## Headache?...take a Disprin

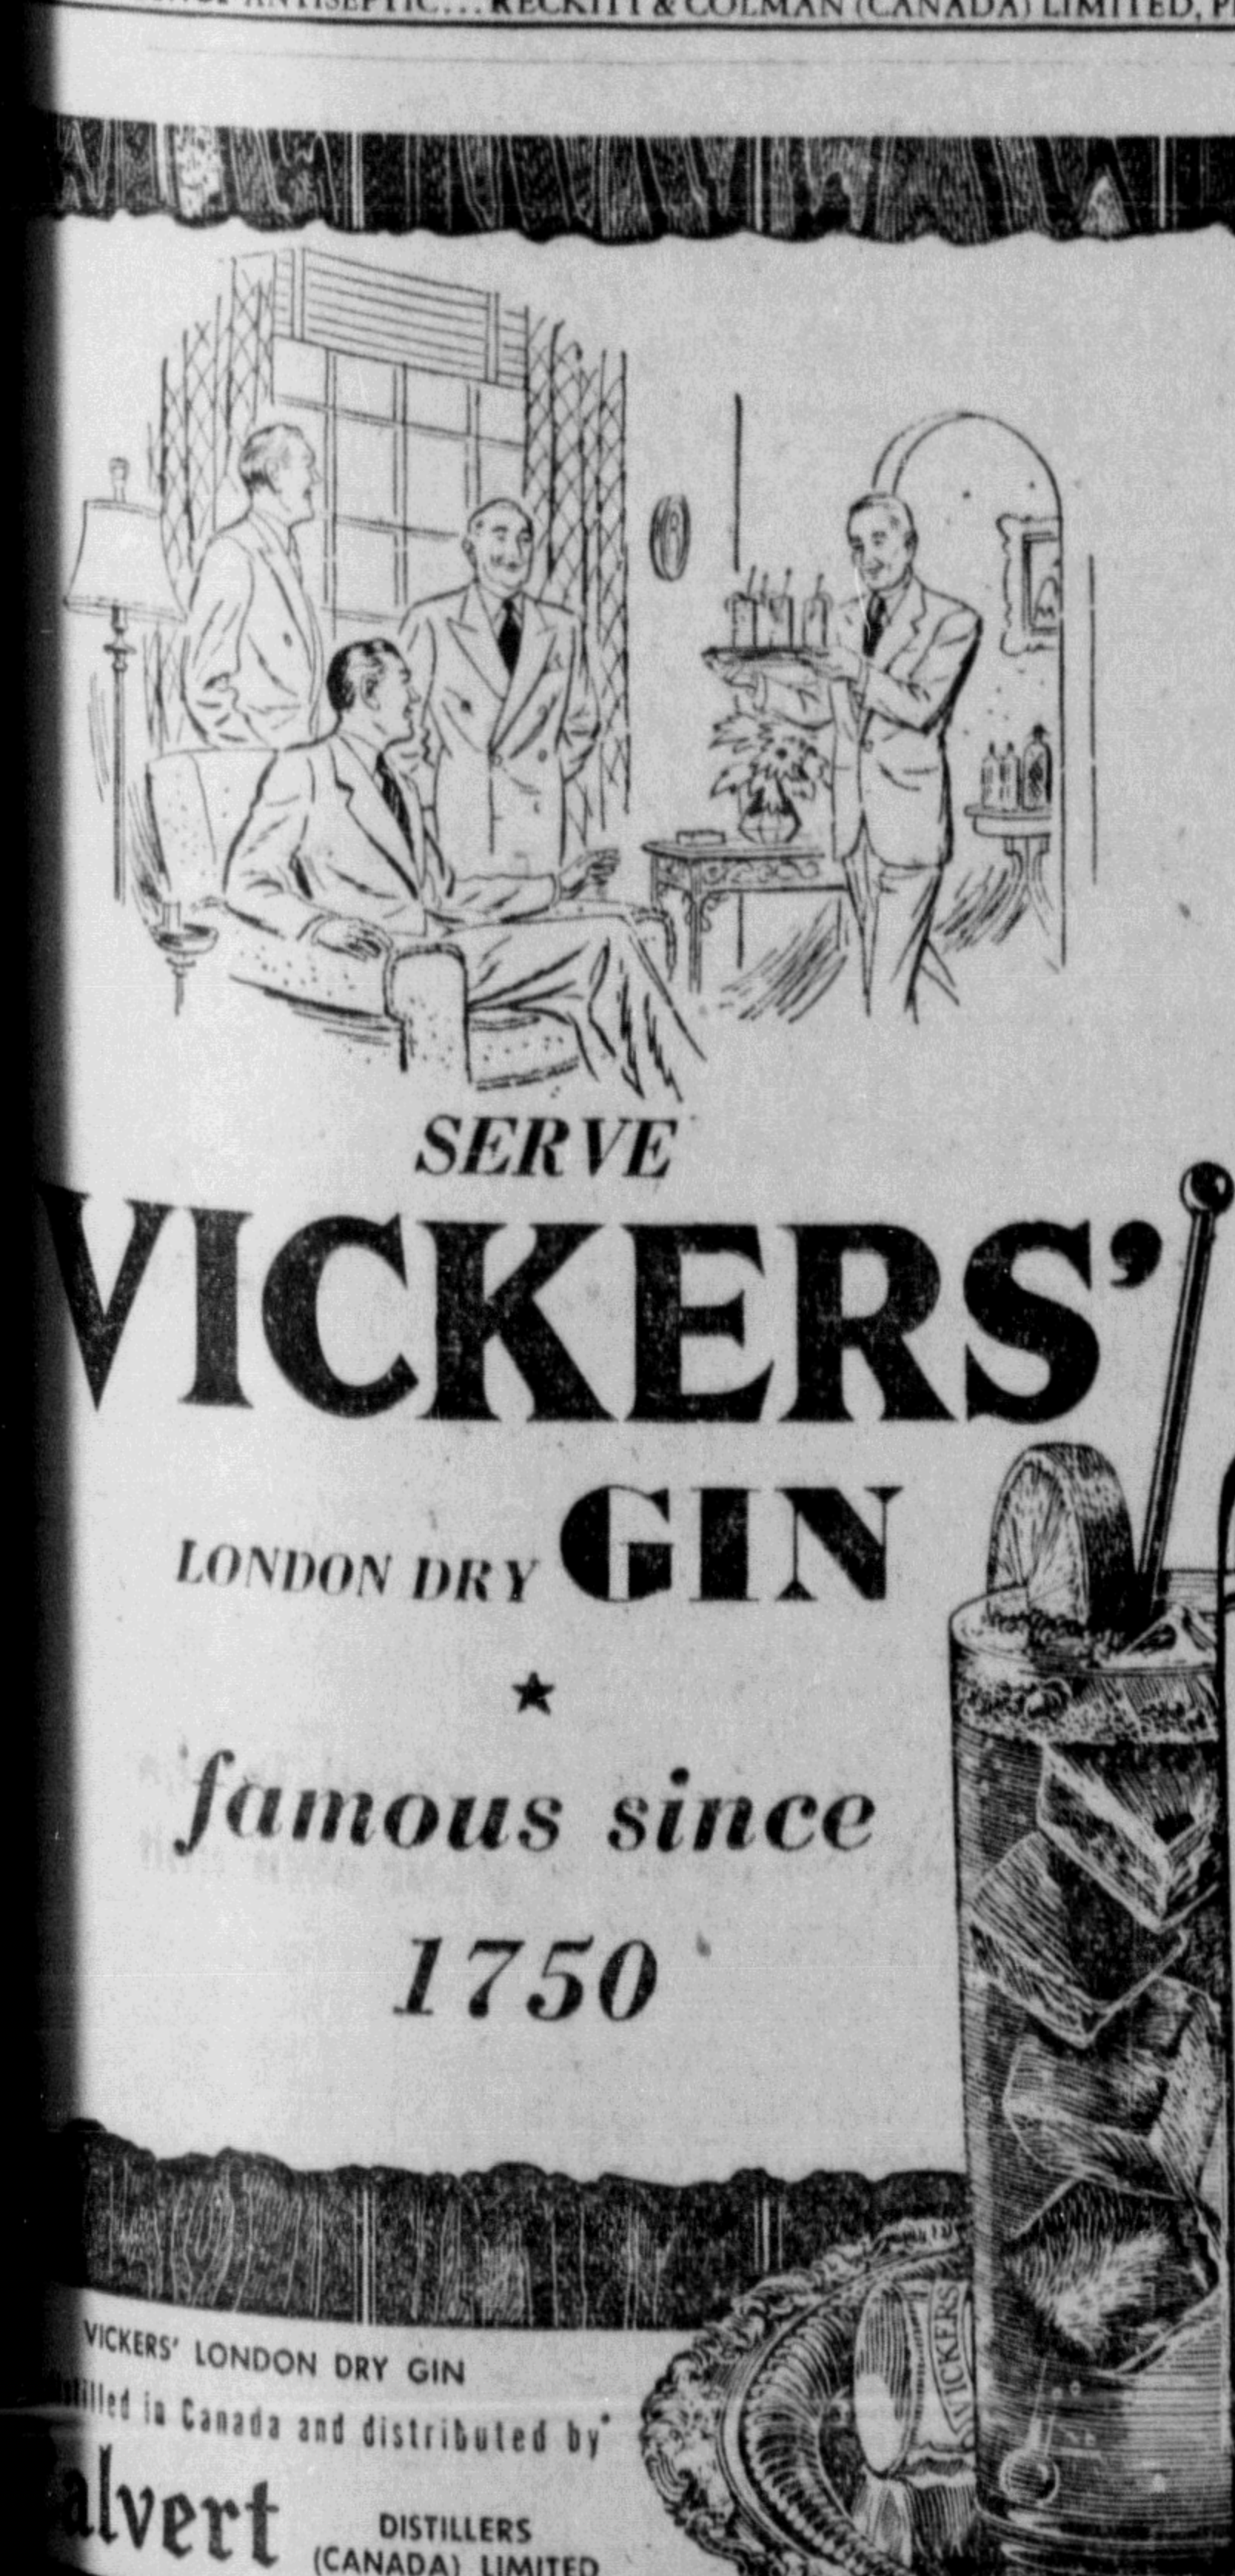

DISPRIN? Because DISPRIN is soluble and substantially neutral. Taken in water as recommended, it enters the stomach as a solution and not as undissolved particles. It is therefore less liable to cause stomach discomfort.

DISPRIN is readily absorbed. Because it definitely dissolves (not merely suspends) DISPRIN permits speedy absorption and gives relief without delay.

DISPRIN is palatable. Even children will take it readily.

## Gardening....

**LOTS OF TIME**—For every plant or seed lost through late planting there are probably a dozen that perish through being put in too soon. There's nothing to be gained by getting in a dither. True, certain grass seed, peas, nursery stock, and such lovers of cool weather, can hardly be put in too soon. But with the great majority of the flowers and vegetables we grow in Canada there is no terrible rush. The main growing period, speaking generally, will be June and early July and often those things which are planted a week or two later than the first will catch up. Of course, with most vegetables experienced gardeners advise planting not once but several times and at about a fortnight or three-week intervals. This brings them along in succession, spreading the harvesting or good-eating season over weeks instead of days. To extend that season still further it is also advisable to use at least one early and one late maturing variety of each sort.

**SPREAD OUT**—Except where the summer is unusually hot and dry one can go on planting beans, beets, carrots, lettuce and such vegetables and some of the quick-growing annual flowers too, right up to mid-July with good chances of getting a crop or bloom. In a few sections of the country where first frosts do not usually arrive until October, and summers are cool and moist, one can also plant early spring type vegetables like lettuce, peas and spinach along in late July or early August with fair chances of success.

**POP NEW HOMES**—For those who have just moved into new homes, usually the ground is in pretty rough or raw condition. About all one can expect the first year in permanent work is to

### Science Progresses

For 50 years we have used little white tablets—acetylsalicylic acid—for relief of pain. Today this familiar pain-killer is available in a new form without the disadvantages of acidity, insolubility and bitter taste. It is called 'DISPRIN' and is sold at druggists everywhere.

'DISPRIN' is available in Bottles of 26 tablets or Handy Pocket Folders of 8.

things levelled out for the lawn and a layout made on paper. Even under these conditions, however, one does not need to go without some pretty satisfactory decoration. Of course we can't grow trees, shrubs and perennial vines overnight. We can't expect to have all the roses, peonies, iris, etc., we would like the very first year. We can't have real hedges. But it is amazing what one can do with annuals alone, and in just a few weeks. The best plan is to get in early whatever nursery stock and perennial flowers are available and financially possible. Then in between these can be used all sorts of annuals which will soon look as if they had always been there. There are big, bushy annuals like cosmos, dahlias, cannas, castor oil and spider plants, ornamental sunflowers or helianthus, African marigolds and giant larkspur that can be used in the place of flowering shrubbery. Then there are quick-growing climbing plants, scarlet runner beans, morning glories, climbing nasturtium, sweet peas, hops and such for covering trellis or fence. And as for solid beds, edging and whatnot there are at least a hundred annual flowers from which to choose.

**TRANSPLANTING**—If there is any secret about successful transplanting, and every gardener must do a lot of this, the answer is plenty of moisture. Under normal conditions it is quite possible to water too often if not too much, and a hose in the hands of the careless is not always an unmixed blessing. But in transplanting some extra watering is almost vital. In this business it is important to take as much soil with the plant or shrub as possible so that the fine roots are not broken or disturbed. Then the roots must be covered firmly with good, fine soil and dampened down with water. If the sun is hot it is good to shade for a few hours. Better still, transplant in the cool evening.

## Urges Aid to Fight Drugs

**NEW YORK (CP)**—Women today have unprecedented opportunities to take part in all phases of human affairs, but are not making the most of them.

That is the view of Nellie Taylor Ross, as told to interviewers on a visit to New York. And Mrs. Ross ought to know about the opportunities, for more than one has knocked at her door.

As the first woman director of the United States mint, she has since 1933 supervised the minting of all the country's coins, besides directing the activities of eight institutions concerned in assaying, handling and safeguarding them.

Earlier, she had been Wyoming's first woman governor, serving her husband's unexpired term following his death in 1925.

"It's a wonderful thing to be alive in the world today, and a woman—especially an American woman," Mrs. Ross said.

"In the professions they are forging their way upward. In the sciences they are making important contributions... in politics and government women's influence is sufficiently potent that both political parties seek energetically to win their favor."

### PLACE IN BUSINESS

In the business world, too, women have made themselves a major factor, having acquired a large part of the nation's wealth. "Statistics state, I believe, that they own outright more than half the wealth and control the spending of about 80 per cent of it," she said.

On the other hand, Mrs. Ross said women had shown a lack of responsibility toward combatting juvenile delinquency, particularly drug addiction among teen-agers which has increased 300 per cent since the Second World War.

Since the teaching of children at home and in school is woman's special province, it is their business to bestir themselves as groups and individuals to combat the destructive narcotics traffic.

Unless women by their efforts at home, in business and professions create a more wholesome atmosphere in which to live and bring up children, they are falling short of their opportunities, Mrs. Ross said.

**PROTEST STAG-HUNTING**  
DILVERTON, Somerset, England (CP)—Protests against the killing of two stags in this Exmoor village recently were answered by E. R. Lloyd, secretary of the Devon and Somerset staghounds: "Townsmen don't understand hunting," he said. "They only look on one side of it."

**EARLY SETTLERS**  
A sawmill was built at Stratroy Ont., as early as 1832 but the townsite was not laid out until 1805.

## Prison Priest To Abbey

**VANCOUVER (CP)**—Rev. Alfred F. Carlyle, British Columbia prison chaplain who personally aided 10,000 persons in his long career, is going home.

The 78-year-old Roman Catholic priest will re-enter the monastery he founded more than 40 years ago at Prinknash Abbey in Gloucestershire and there will spend the remainder of his life.

"I am a little blind, a little deaf, a little wobbly in the legs—but I feel fine," said the beloved man who has spent 28 years in British Columbia.

He was a missionary among the Indians of the Kootenay and Okanagan, later a parish priest at Princeton and Ocean Falls and then prison chaplain in Vancouver.

As an Anglican, Father Carlyle founded the first Benedictine monastery to be established in the Church of England since the Reformation.

In 1913, the monastery renounced allegiance to the Anglican Church and was received into the Church of Rome.

A slight stroke forced him to retire from active work in 1949. He has been in poor health since. Recently he was given extended leave of absence from the diocese.

His motto was: "Hate the sin, but love the sinner."

### GIANT'S MOUTHFUL

**GALMPTON, Devon, England (CP)**—Villagers will bake a gooseberry pie weighing more than 100 pounds on Midsummer Day to celebrate the Festival of Britain.

## Marriage at Prince George

**Copper River Girl Is Beautiful Bride**

**PRINCE GEORGE**—A trellis covered with fern, pussy willow and narcissus made a charming background for the candlelight ceremony uniting in marriage Helen, daughter of Mr. and Mrs. George Somerville of Copper River and William John Bunton, son of Mr. and Mrs. F. W. Bunton of Prince George.

The marriage was performed at the home of Mr. and Mrs. M. A. Bader, Sixth Avenue. Rev. Gordon G. McL. Boothroyd officiated.

The bride, who was given away by her father, wore a beautiful princess-styled ballerina gown of white lace, with off-the-shoulder neckline and bouffant skirt. Her shoulder-length veil fell softly from a Juliette cap. Her only ornament was a string of pearls, the gift of the groom, and she carried a white prayerbook.

Her corsage bouquet was composed of two large mauve orchids.

Her only attendant, Mrs. M. A. Bader, chose a dress of navy blue organza with white flower sprays, made in princess style in ballerina length with sweetheart neckline. Her corsage was of white gardenias, and she also wore a Juliette cap.

Gordon Swanky was the

groomsman for Mr. Bunton.

### RECEPTION

About 90 guests gathered at the reception at the Prince George Hotel ballroom which followed the marriage service.

The happy couple were assisted in receiving by their parents,

Mrs. Somerville choosing for the occasion a gown in royal blue, with which she wore navy and white accessories, and Mrs. Bunton a navy model with which she wore grey accessories.

The bride's table was centered with a three-tiered square wedding cake, flanked by silver candlesticks and lighted tapers. The toast to the bride was proposed by Mr. Arthur Bader and suitably responded to by the groom.

A delicious luncheon was catered by the Priscilla Evening Circle of Knox United Church. Rhythm Aces orchestra played for dancing, which was highlighted by a series of numbers rendered by the Harmony Kings Quartette. The sister of the groom, Miss Elizabeth Bunton, gave a delightful rendition of "At Dawning."

Out of town guests at the wedding included Mr. and Mrs. G. Somerville of Copper River, and Mrs. W. R. Comstock of Quesnel, maternal grandmother of the groom.

For their honeymoon trip, Mr.

and Mrs. Bunton are en route to Toronto and New York, after which they will reside in Prince George, where the groom is associated with his father in the Fraser River Hardware Company.
